Air University Review ,1986-07 **Contested Frontiers in Amazonia** Marianne Schmink,Charles H. Wood,1992-06-24 An interdisciplinary analysis of the process of frontier change in one region of the Brazilian Amazon the southern portion of the state of Par Indigenous Struggle at the Heart of Brazil Seth Garfield,2001-09-18 How the Xavante Indians have reshaped the Brazilian government s policies of nationalism and assimilation **Global Deforestation** Christiane Runyan,Paolo D'Odorico,2016-04-18 A concise but comprehensive interdisciplinary examination of global deforestation for a broad audience of scientists and policymakers Tropical Deforestation C. J. Jepma,2014-02-04 The depletion of the tropical rain forests has attracted considerable attention in recent times and the serious consequences for the global biosphere are widely acknowledged Yet deforestation continues apace and in some areas for example southeast Asia the very existence of the forests is seriously threatened Contrary to popular belief evidence suggests that local economic and living conditions are more significant in this than timber exploitation for exports to the Northern countries Tropical Deforestation A Socio Economic Approach offers a new perspective on the economic imperatives which encourage indigenous populations to encroach upon their own forests and shows how action against deforestation must form part of a wider movement to improve both the living conditions of the local inhabitants and the durability of their national economies Part 1 offers an overview of the processes surrounding deforestation and an assessment of the current situation Part 2 analyses the land use issues and explains the socioeconomic imperatives in the affected regions In an absorbing conclusion Part 3 guides the reader through a series of hypothetical policy scenarios using a specially adapted economic computer model to predict which combinations of policies and trade arrangements might bring about a more beneficial state of affairs *Public Policies and the Misuse of Forest Resources* World Resources Institute,1988-09-30 Six contributors explore the role of governments in accelerating the rate of forest destruction by providing direct and indirect subsidies to support what would otherwise be non commercial logging operations Without these financial incentives most timber operations in the tropics would cease In a series of country by country investigations including examples from the developed and developing worlds this book documents the government policies that are leading to the misuse of forest resources Each is written by an authority on the country and each contains descriptive analytical and empirical material on key policies and their effects The final country analysis focuses on the United States where the consequences of the subsidized timber sales by the US Forest Service from most of the national forests are discussed The book concludes with an overview of the impact of forest policies and the role of bilateral and multilateral agencies in their formulation By directing attention toward the political dimension involved in forest clearance this book will provide a clearer insight into the basic reasons why forests continue to be destroyed despite the outcry raised by conservationists *Hydrological Problems and Environmental Management in Highlands and Headwaters* Martin

Haigh,2017-10-19 This set of papers presents a description of the synthesis of hydrological problems and various environmental implications and management strategies for different highland and headwater regions of the world Regions covered include the Himalayas Russian mountains Amazonia and upland Wales *Air university review, 1982 ,1982*

Latin America's Economy Eliana A. Cardoso,Ann Helwege,1995 Examines broad patterns of development and some economic issues facing Latin American countries Includes a chapter outlining recurrent patterns of economic development and economic crises throughout the past 500 years *The Political Economy of Brazil* Lawrence S. Graham,Robert H. Wilson,2014-07-03 The transition from authoritarian to democratic government in Brazil unleashed profound changes in government and society that cannot be adequately understood from any single theoretical perspective The great need say Graham and Wilson is a holistic vision of what occurred in Brazil one that opens political and economic analysis to new vistas This need is answered in *The Political Economy of Brazil* a groundbreaking study of late twentieth century Brazilian issues from a policy perspective The book was an outgrowth of a year long policy research project undertaken jointly by the Lyndon B Johnson School of Public Affairs and the Teresa Lozano Long Institute of Latin American Studies both at the University of Texas at Austin In this book several noted scholars focus on specific issues central to an understanding of the political and economic choices that were under debate in Brazil Their findings reveal that for Brazil the break with the past the authoritarian regime could not be complete due to economic choices made in the 1960s and 1970s and also the way in which economic resources committed at that time locked the government into a relatively limited number of options in balancing external and internal pressures These conclusions will be important for everyone working in Latin American and Third World development *Entangled Edens* Candace Slater,2002 The skill with which Slater combines various levels and modalities of narrative utilizing her personal experience as a colorful unifying thread is truly remarkable Antonio Candido author of *Antonio Candido On Literature and Society* Howard S Becker editor A very important book that quite gracefully elegantly and persuasively moves beyond the usual myth and history format to put at its center stories about the Amazon and the people who tell them *Entangled Edens* persuasively argues that the Amazon can only be grasped understood and come to terms with through its myths and stories It addresses a very real failing of modern environmentalism which for all its virtues tends to dehumanize and metaphorically depopulate when it does not villainize populations that do share its concerns or share them in very different ways Instead of forcing us to choose between land and people Slater uses the stories and the people who tell them to rethink human relations with nature and each other Richard White author of *The Organic Machine The Remaking of the Columbia River* Elegant erudite profoundly serious *Entangled Edens* is a source of inspiration and knowledge for the reader interested in the Amazon Without the cultural tradition and the life experience of Amazonia s people any analysis of the Amazon risks becoming inconsequential or opportunistic This is one of the powerful messages of this important reflection on the Amazon whose greatest riches are ultimately its people Candace Slater has written a book that will last Milton

Hatoum author of *The Tree of the Seventh Heaven* 1994 and *The Brothers* 2002 **Frontiers of Development in the Amazon** Antonio Augusto Rossotto Ioris, Rafael R. Ioris, Sergei V. Shubin, 2020-06-22 *Frontiers of Development in the Amazon* Riches Risks and Resistances contributes to ongoing debates on the processes of change in the Amazon a region inherently tied to the expansion of internal and external socio economic and environmental frontiers This book offers interdisciplinary analyses from a range of scholars in Europe Latin America and the United States that question the methods of development and the range of socio ecological impacts of those methods by examining the theoretical methodological and empirical dimensions of frontier making along with evaluating and refining existing frameworks Contributors focus on the complex politics of border formation shaped by institutional economic and political forces placing them in relation to ethical imaginary and symbolic elements In doing so contributors explore the dynamic production of identities values and subjectivities covering matters of migratory patterns complex power struggles and intensive at times violent clashes Among other topics this book assesses the recent encroachment of export driven agribusiness into the Amazon Region in the context of recolonization resource exploitation and multiple programs of modernization and national integration Scholars of Latin American studies international development environmental studies and applied social sciences will find this book particularly useful

Through Amazonian Eyes Emilio F. Moran, 1993-08 In this well written comprehensive reasonable yet passionate volume Emilio Moran introduces us to the range of human and ecological diversity in the Amazon Basin By describing the complex heterogeneity on the Amazon s ecological mosaic and its indigenous populations conscious adaptations to this diversity he leads us to realize that there are strategies of resource use which do not destroy the structure and function of ecosystems Finally and most important he examines ways in which we might benefit from the study of human ecology to design and implement a balance between conservation and use *Land Change Science, Political Ecology, and Sustainability* Christian Brannstrom, Jacqueline M. Vadjunec, 2014-01-23 Recent claims regarding convergence and divergence between land change science and political ecology as approaches to the study of human environment relationships and sustainability science are examined and analyzed in this innovative volume Comprised of 11 commissioned chapters as well as introductory and concluding synthesis chapters it advances the two fields by proposing new conceptual and methodological approaches toward integrating land change science and political ecology The book also identifies areas of fundamental difference and disagreement between fields These theoretical contributions will help a generation of young researchers refine their research approaches and will advance a debate among established scholars in geography land use studies and sustainability science that has been developing since the early 2000s At an empirical level case studies focusing on sustainable development are included from Africa Central and South America and Southeast Asia The specific topics addressed include tropical deforestation swidden agriculture mangrove forests gender and household issues
