Assembling Arguments Jonathan Buehl, 2016-01-20 Scientific arguments and indeed arguments in most disciplines depend on visuals and other nontextual elements however most models of argumentation typically neglect these important resources In *Assembling Arguments* Jonathan Buehl offers a concentrated study of scientific argumentation that is sensitive to both the historical and theoretical possibilities of multimodal persuasion as it advances two related claims First rhetorical theory when augmented with methods for reading nonverbal representations can provide the analytical tools needed to understand and appreciate multimodal scientific arguments Second science an inherently multimodal enterprise offers ideal subjects for developing general theories of multimodal rhetoric applicable across fields In developing these claims Buehl offers a comprehensive account of scientific persuasion as a multimodal process and develops a simple but productive framework for analyzing and teaching multimodal argumentation Comprising five case studies the book provides detailed treatments of argumentation in specific technological and historical contexts argumentation before World War I when images circulated by hand and by post argumentation during the mid twentieth century when computers were beginning to bolster scientific inquiry but images remained hand crafted products and argumentation at the turn of the twenty first century an era

of digital revolutions and digital fraud Each study examines the rhetorical problems and strategies of specific scientists to investigate key issues regarding visualization and argument 1 establishing new instruments as reliable sources of visual evidence 2 creating novel arguments from reliable visual evidence 3 creating novel arguments with unreliable visual evidence 4 preserving the credibility of visualization practices and 5 creating multimodal artifacts before and in the era of digital circulation Given the growing enterprise of rhetorical studies and the field's contributions to communication practices in all disciplines rhetoricians need a comprehensive rhetoric of science one that accounts for the multimodal arguments that change our relation to reality *Assembling Arguments* argues that such rhetoric should enable the interpretation of visual scientific arguments and improve science writing instruction *Im-Inventing Arguments* Mauk, MAUK METZ, 2008-01-01

Arguing Constructively Dominic A. Infante, 1987-12-01 A refreshing fusion of interpersonal human relations and argumentation This clear and engaging volume is unique because of its dual focus On the one hand the purpose is to instruct on the methods of argumentation theory This represents a set of principles methods and strategies of argument that have evolved from the time of Ancient Greece On the other hand the intent is to teach human relations in argumentative situations specifically how to manage interpersonal relations during arguments Books on argumentation and debate have tended to say little about how arguing can affect the relationship one has with an adversary How do you prevent harm to a valued friendship for instance Moreover books on interpersonal communication have had little to say about arguing Instead the emphasis is on achieving satisfying relations with others The author shows that recent research makes it clear that argumentation and interpersonal communication are complementary areas of communication *Arguing constructively* in informal interpersonal and small group contexts is a skill that can bring about good outcomes Instruction on building and maintaining satisfying relations with other people is lacking if it does not deal with how to do this while arguing especially since argumentative communication probably will occur throughout a relationship This book has been written to correct what has been perhaps too narrow a focus in the areas of argumentation and interpersonal communication **Writing as a Way**

of Staying Human in a Time that Isn't Nate Mickelson, 2019-01-30 The human element of our work has never been more important As Robert Yagelski explains in *Writing as a Way of Being* 2011 the ideological and social pressures of our institutions put us under increasing pressure to sacrifice our humanity in the interest of efficiency These problems only grow when we artificially separate self world and mind body in our teaching and everyday experiences Following Yagelski and others *Writing as a Way of Staying Human in a Time that Isn't* proposes that intentional acts of writing can awaken us to our interconnectedness and to ways in which we as individuals and in writing communities might address the social and environmental challenges of our present and future world Featuring essays drawn from a range of contexts including college composition and developmental reading and writing professional and legal writing middle school English dissertation projects academic conferences and an online writing group the collection outlines three ways writing can help us stay human

caring for ourselves and others honoring the times and spaces of writing and promoting justice Each essay describes specific strategies for using writing as a means for staying human in inhuman times The authors integrate personal stories descriptions of classroom assignments and activities and current research in writing studies Their work shows that writing can contribute to personal social and political transformation by nurturing vulnerability compassion and empathy among students and instructors alike

The IEEE Guide to Writing in the Engineering and Technical Fields David Kmiec, Bernadette Longo, 2017-08-30 Helps both engineers and students improve their writing skills by learning to analyze target audience tone and purpose in order to effectively write technical documents This book introduces students and practicing engineers to all the components of writing in the workplace It teaches readers how considerations of audience and purpose govern the structure of their documents within particular work settings The IEEE Guide to Writing in the Engineering and Technical Fields is broken up into two sections Writing in Engineering Organizations and What Can You Do With Writing The first section helps readers approach their writing in a logical and persuasive way as well as analyze their purpose for writing The second section demonstrates how to distinguish rhetorical situations and the generic forms to inform train persuade and collaborate The emergence of the global workplace has brought with it an increasingly important role for effective technical communication Engineers more often need to work in cross functional teams with people in different disciplines in different countries and in different parts of the world Engineers must know how to communicate in a rapidly evolving global environment as both practitioners of global English and developers of technical documents Effective communication is critical in these settings The IEEE Guide to Writing in the Engineering and Technical Fields Addresses the increasing demand for technical writing courses geared toward engineers Allows readers to perfect their writing skills in order to present knowledge and ideas to clients government and general public Covers topics most important to the working engineer and includes sample documents Includes a companion website that offers engineering documents based on real projects The IEEE Guide to Engineering Communication is a handbook developed specifically for engineers and engineering students Using an argumentation framework the handbook presents information about forms of engineering communication in a clear and accessible format This book introduces both forms that are characteristic of the engineering workplace and principles of logic and rhetoric that underlie these forms As a result students and practicing engineers can improve their writing in any situation they encounter because they can use these principles to analyze audience purpose tone and form

Reconnecting Reading and Writing Alice S. Horning, Elizabeth W. Kraemer, 2013-09-06 Reconnecting Reading and Writing explores the ways in which reading can and should have a strong role in the teaching of writing in college Reconnecting Reading and Writing draws on broad perspectives from history and international work to show how and why reading should be reunited with writing in college and high school classrooms It presents an overview of relevant research on reading and how it can best be used to support and enhance writing instruction

Arguments and Arguing Thomas A.

Hollihan, Kevin T. Baaske, 2022-05-06 Arguing is a fundamental human activity it is a process of making sense of the world and negotiating understandings with others Arguing can be and often is healthy for both relationships and societies The values of the community are shaped through people sharing their opinions offering reasons in support of their beliefs and deliberating Hollihan and Baaske present techniques for effective analysis logical reasoning and socially constructive argumentation They illustrate their discussions of theory and practice with multiple engaging examples The book focuses on narrative argument as a story backed by evidence to evaluate courses of action or to resolve conflicts A chapter on visual argumentation highlights the power of visual elements in arguments Effective arguing requires a sensitivity to the demands of different argumentative contexts Readers will become familiar with the elements of argument essential for politics the law debate business and relationships Narrative arguments are rational arguments Learning about the narrative reasoning process helps us tell more convincing credible and compassionate stories and to become better critics of the stories we hear

Rhetoric & Dialectic in the Time of Galileo Jean Dietz Moss, William A. Wallace, 2003 Examines the teaching and practice of the twin arts of argumentation rhetoric and dialectic in the time of Galileo Galileo was an ardent controversialist on behalf of his astronomical theories yet many today are unacquainted with the kinds of argument that became a focal point in his famous trial The authors combine their vast knowledge of rhetoric history and philosophy to explain the background of the dispute between science and religion They present an engaging discussion of the prevailing modes of rhetorical and scientific arguments in Northern Italy during the Renaissance They display primary texts on the arts of rhetoric and dialectic by authors whose thought was known to Galileo
