Inventing Europe Pr:

Inventing Europe G. Delanty, 1995-04-19 A critical analysis of the idea of Europe and the limits and possibilities of a European identity in the broader perspective of history This book argues that the crucial issue is the articulation of a new identity that is based on post national citizenship rather than ambivalent notions of unity

Migrating Heritage Perla Innocenti, 2016-04-22 Bringing together an international forum of experts this book looks at how museums libraries and further public cultural institutions respond to the effects of globalisation mobility and migration across Europe It puts forward examples of innovative practice and policies that reflect these challenges looking at issues such as how cultural institutions present themselves to and interact with multicultural audiences how to support networking across European institutions and share practice in core activities such as archiving interpreting and exhibiting artefacts Academics practitioners from museums and public institutions and policymakers explore theoretical and practical approaches from a range of different disciplines such as museum and cultural heritage studies cultural memory studies social anthropology sociology of organizations cultural heritage management and cultural heritage informatics

Europe Stefan Elbe, 2004-03-01 There has been a deliberative but as yet unsuccessful attempt by scholars and policy makers to articulate a more meaningful idea of Europe which would enhance the legitimacy of the European Union and provide the basis for a European identity Using a detailed analysis of the writings of Nietzsche Elbe seeks to address this problem and argues that Nietzsche s thinking about Europe can significantly illuminate our understanding He demonstrates how Nietzsche s critique of nationalism and the notion of the good European can assist contemporary scholars in the quest for a vision of Europe and a definition of what it means to be a European citizen

Discourses and Counter-discourses on Europe Manuela Ceretta, Barbara Curli, 2017-01-12 The European Union plays an increasingly central role in global relations from migration to trade to institutional financial solvency The formation and continuation of these relations their narratives and discourses are rooted in social political and economic historical relations emerging at the founding of European states and then substantially augmented in the Post WWII era Any rethinking of our European narratives requires a contextualized analysis of the formation of hegemonic discourses The book contributes to the ongoing process of rethinking the European project identity and institutions brought about by the end of the Cold war and the current economic and political crisis Starting from the principle that the present European crisis goes hand in hand with the crisis of its hegemonic discourse the aim of the volume is to rescue the complexity the richness the ambiguity of the discourses on Europe as opposed to the present simplification The multidisciplinary approach and the long term perspective permits illuminating scope over multiple discourses historical periods and different languages including that of the European institutions This text will be of key interest to scholars and students of European Union politics European integration European History and more broadly international relations

Creating Europe from the Margins Kristín Loftsdóttir, Brigitte Hipfl, Sandra Ponzanesi, 2023-08-10 This edited volume

explores the idea of Europe through a focus on its margins The chapters in the volume inquire critically into the relations and tensions inherent in divisions between the Global North and the Global South as well as internal regional differentiation within Europe itself In doing so the volume stresses the need to consider Europe from critical interdisciplinary perspectives highlighting historical and contemporary issues of racism and colonialism While recent discussions of migration into Fortress Europe seem to assume that Europe has clearly demarcated geographic political and cultural boundaries this book argues that the reality is more complex The book explores margins conceptually and positions margins and centres as open to negotiation and contestation and characterized by ambiguity As such margins can be contextualized in relation to hierarchies within Europe with different processes involved in creating boundaries and borders between different kinds of Europes and Europeans Deploying case studies from different places such as Iceland Italy Poland Spain Turkey the UK Romania Cyprus Greece Sicily European colonies in the Caribbean and the former Yugoslavia the contributors analyse how different geopolitical hierarchies intersect with racialized subject positions of diverse people living in Europe while also exploring issues of gender class sexuality religion and nationality Some chapters draw attention to the fortification of Europe s borderland while others focus on internal hierarchies within Europe critiquing the meaning of spatial boundaries in an increasingly digitalized Europe In doing so the chapters interrogate the hierarchies at play in the processes of being and becoming European and the ongoing impacts of race and colonialism This timely and thought provoking collection will be of considerable significance to those in the humanities and social sciences with an interest in Europe Chapters 11 and 12 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The Making of Europe's Critical

Infrastructure P. Högselius, A. Hommels, A. Kaijser, E. van der Vleuten, Erik van der Vleuten, 2013-11-26 Europe s critical infrastructure is a key concern to policymakers NGOs companies and citizens today A 2006 power line failure in northern Germany closed lights in Portugal in a matter of seconds Several Russian Ukrainian gas crises shocked politicians entrepreneurs and citizens thousands of kilometers away in Germany France and Italy This book argues that present day infrastructure vulnerabilities resulted from choices of infrastructure builders in the past It inquires which and whose vulnerabilities they perceived negotiated prioritized and inscribed in Europe s critical infrastructure It does not take Europe for granted but actively investigates which countries and peoples were historically connected in joint interdependency and why In short this collection unravels the simultaneous historical shaping of infrastructure common vulnerabilities and Europe

Europeanism John McCormick, 2010-06-03 In Europeanism the author attempts to identify and outline the political economic and social norms and values associated with Europe and Europeans He argues that regardless of the doubts associated with the exercise of European integration and the work of the European Union and regardless of residual identities with states and nations Europeans have much in common Opening chapters deal with the historical development of

European ideas and are followed by chapters addressing European attitudes toward the state including a rejection of state based nationalism new ideas about patriotism and citizenship and the importance of cosmopolitanism the characteristics of politics and government in Europe with an emphasis on communitarianism and the effects of the parliamentary system of government European economic models including the importance of welfarism and sustainable development European social models European attitudes towards values such as multiculturalism and secularism and Europeanist views in regard to international relations emphasizing civilian power and multiculturalism

Routledge Handbook of Cosmopolitanism

Studies Gerard Delanty, 2012-05-23 Over the past two decades there has been great interest in cosmopolitanism across the human and social sciences Where earlier it had largely been a term associated with moral and political philosophy cosmopolitanism has now become a widely used term in the social sciences It is now integral to much of cultural political and social analysis This is the first comprehensive survey in one volume of the interdisciplinary field of cosmopolitan studies With over forty chapters written by leading scholars of cosmopolitanism this book reflects the broad reception of cosmopolitan thought in a wide variety of disciplines and across international borders Both comprehensive and innovative in the topics covered the Handbook of Cosmopolitanism Studies is divided into four sections major theoretical debates where the emphasis is on recent developments cultural topics in the social sciences the politics of cosmopolitanism major world varieties of cosmopolitanism The Handbook answers the need to take modern cosmopolitanism out of its exclusive western context and relate it to the historical experiences of other world cultures This is a major work in defining the emerging field of cosmopolitanism studies Throughout there is a strong emphasis on interdisciplinarity with essays covering philosophy literary theory history international relations anthropology communications studies and sociology The Handbook's clear and comprehensive style will appeal to a wide undergraduate audience across the social sciences and humanities

Cold War Cultures Annette Vowinckel, Marcus M. Payk, Thomas Lindenberger, 2012-03-01 The Cold War was not only about the imperial ambitions of the super powers their military strategies and antagonistic ideologies It was also about conflicting worldviews and their correlates in the daily life of the societies involved The term Cold War Culture is often used in a broad sense to describe media influences social practices and symbolic representations as they shape and are shaped by international relations Yet it remains in question whether or to what extent the Cold War Culture model can be applied to European societies both in the East and the West While every European country had to adapt to the constraints imposed by the Cold War individual development was affected by specific conditions as detailed in these chapters This volume offers an important contribution to the international debate on this issue of the Cold War impact on everyday life by providing a better understanding of its history and legacy in Eastern and Western Europe

Religion and the Struggle for European Union

Brent F. Nelsen, James L. Guth, 2015-03-31 Nelsen and Guth contend that religion or confessional culture plays a powerful role in shaping European ideas about politics attitudes toward European integration and national and continental identities in

its leaders and citizens Catholicism has for centuries promoted the unity of Christendom while Protestantism has valued particularity and feared Catholic dominance These confessional cultures the authors argue have resulted in two very different visions of Europe that have deeply influenced the process of postwar integration Catholics have seen Europe as a single cultural entity that is best governed by a single polity Protestants have never felt part of continental culture and have valued national borders as protectors of liberties historically threatened by Catholic powers Catholics have pressed for a politically united Europe Protestants have resisted sacrificing sovereignty to federal institutions favoring pragmatic cooperation Despite growing secularization of the continent not to mention the impact of Islam confessional culture still exerts enormous influence And the authors conclude European elites must recognize the enduring significance of this Catholic Protestant cultural divide as the EU attempts to solve its social and economic and political crises

Constructing the EU's Political Identity Sabine Saurugger, Mark Thatcher, 2022-10-23 This book examines the construction of the EU's political identity or identities variations in its strength and the nature of its content Drawing on studies both on European nation state formation and on the EU's identity the chapters take a top down approach and analyse how EU institutions in different major policy domains have themselves sought to create political identity through policy making The authors define the construction of EU political identity and set out empirically applicable indicators to assess political identity in policy making They analyse the construction of identity through a process oriented approach that explicitly includes contestation and the existence of rival political identities Comparing across policy domains the contributions suggest that the ability of EU institutions to construct an EU political identity has been limited not only by existing national identities but also by the coexistence of rival EU political identities within policy domains Hence it has been difficult for EU institutions to establish a strong identity with identity being strongest where there are clear external alternatives and limited rival identities within the EU

A Thorn in Transatlantic Relations M. Hampton, 2013-07-31 Americans and Europeans perceive threat differently Americans remain more religious than Europeans and generally still believe their nation is providentially blessed American security culture is relatively stable and includes the deeply held belief that existential threat in the world emanates from the work of evil doers The US must therefore sometimes intervene militarily against evil The European Union EU security culture model differs from traditional European iterations and from the American variant The concept of threat as evil lost salience as Western Europe became more secularist Threats became problems to manage and resolve The upsurge in anti immigrant and anti foreigner sentiment in the midst of economic crisis undermines this model

Handbook of Historical Sociology Gerard Delanty, Engin F Isin, 2003-06-23 This Handbook consists of 26 chapters on historical sociology Part One is devoted to Foundations Part Two moves on to consider major approaches and Part Three is devoted to the major themes in historical sociology Systematic and informative it offers readers the most complete and authoritative guide to historical sociology

Europe in the Media Deirdre Kevin, 2003-09-12 This bk is an attempt to address the subject of Europe as a concept which

has arisen in the wake of the formation of the European Union. Covers Europeanization by reference to the way this concept appears in the media and all the participating countries compares **Ukraine and Europe** Giovanna Brogi Bercoff, Marko Pavlyshyn, Serhii Plokhyy, 2017-01-01 Ukraine and Europe challenges the popular perception of Ukraine as a country torn between Europe and the east. Twenty-two scholars from Europe, North America and Australia explore the complexities of Ukraine's relationship with Europe and its role in the continent's historical and cultural development. Encompassing literary studies, history, linguistics and art history, the essays in this volume illuminate the interethnic, interlingual, intercultural and international relationships that Ukraine has participated in. The volume is divided chronologically into three parts: the early modern era, the 19th and 20th century and the Soviet post-Soviet period. Ukraine in Europe offers new and innovative interpretations of historical and cultural moments while establishing a historical perspective for the pro-European sentiments that have arisen in Ukraine following the Euromaidan protests **In the Wake of the Balkan Myth** D. Norris, 1999-08-25 This book focuses on issues concerning identity in terms of Balkan and non-Balkan cultures and examines questions of modernity and the ever-present dread of primitivism which is highlighted in certain types of narratives. David A. Norris examines the emergence and development of the term Balkan itself, textual representations of the region and negative imagery from the perspective of Balkan authors and in Western literature **Fabricating Europe** António Nóvoa, M. Lawn, 2007-05-08 Fabricating Europe has within it a core idea, a crucial but imprecise idea, that of a European educational space which transnational governance networks and cultural and economic projects are creating now. Yet the perceptible creation of this contemporary space of European policy making and networking has not been a subject of study. It appears offstage in studies of national systems in which national and professional identity, political organization, policy formation and public-private markets are all viewed as contained within the borders of the state. Fabricating Europe is concerned with the new possibilities to be discerned and imagined in the European public and institutional spaces and discourses in education and the lack of impetus within the broad area of educational studies to meet the task of creating analyses and responses **European Union Public Law** Damian Chalmers, Adam Tomkins, 2007-09-24 Since its publication in 2006, European Union Law has quickly established itself as one of the leading textbooks in the field, providing the student with both a comprehensive text and collection of materials. European Union Public Law brings together those sections of the title which look at the constitutional and institutional law of the EU, making it ideal for students undertaking a more focused study of the Union. Its proven successful combination of a highly accessible style, a law-in-context approach which looks at the law in its wider political and social context and collection of interdisciplinary materials make this an essential text for those students concerned with the institutional and political workings of the Union. European public law students, European studies students and politics students will find this text invaluable at both undergraduate and postgraduate level **Europe's Indians** Vanita Seth, 2010-08-03 A historical and philosophical argument that the classification of humans into racial categories or binaries of

self other is a product of modernity **Europe Unbound** Jan Zielonka, 2003-09-02 Europe Unbound provides an analysis of the enlargement of the European Union and examines from both a theoretical and a political approach issues such as Where does Europe end Should Europe's borders be open or closed How does the evolution of territorial politics impact on the course of European integration This book draws upon such diverse fields as History Sociology Political Science and International Relations and contains contributions from an international range of respected academics
