From Substance To Subject Studies In Hegel:

From Substance to Subject Nathan Rotenstreich, 2012-12-06 **Against Value in the Arts and Education** Sam Ladkin, Robert McKay, Emile Bojesen, 2016-05-18 Against Value in the Arts and Education proposes that it is often the staunchest defenders of art who do it the most harm by suppressing or mollifying its dissenting voice by neutralizing its painful truths and by instrumentalizing its ambivalence The result is that rather than expanding the autonomy of thought and feeling of the artist and the audience art's defenders make art self satisfied or otherwise an echo chamber for the limited and limiting self description of people's lives lived in an audit culture a culture pervaded by the direct and indirect excrescence of practices of accountability This book diagnoses the counter intuitive effects of the rhetoric of value It posits that the auditing of values pervades the fabric of people's work lives their education and increasingly their everyday experience The book uncovers figures of resentment disenchantment and alienation fostered by the dogma of value It argues instead that value judgments can behave insidiously and incorporate aesthetic ethical or ideological values fundamentally opposed to the value they purportedly name and describe The collection contains contributions from leading scholars in the UK and US with contributions from anthropology the history of art literature education musicology political science and philosophy **J.M.E. McTaggart** Ramesh K. Sharma, 2015-12-03 J M E McTaggart seeks to critically expound and appraise the British philosopher's thought with respect to three principal themes of his philosophy substance self and immortality Ramesh Kumar Sharma guides the reader through the labyrinths of McTaggart's intricate arguments and defends many of McTaggart's highly unorthodox doctrines and conclusions While doing this Sharma draws on the works of among others Berkeley Hegel and Leibniz and at the same time attacks numerous modern day physicalist theories that propound mind brain identity as against the presumed reality of the self and consciousness This work is thus recommended both for philosophers and researchers interested in 1 such perennial metaphysical subjects as reality existence possibility the basic ontological categories of substance qualities and relations universals 2 the question of the reality of the self 3 McTaggart's overall vision of the universe or Absolute and his rejection of the more or less predominant view that the Absolute is God 4 McTaggart's unique doctrine after Plato of the immortality of the self combined with the self's pre existence post existence and plurality of lives and 5 his extraordinary but important views on perception **The State and Civil Society: Studies in Hegel's Political Philosophy** Z. A. Pelczynski, 1984-11 This book discusses the state and civil society which were distinguished by Hegel as two stages in the dialectical development from the family to the nation Subjects of Desire Judith Butler, 2012 Originally published 1999 With new foreword **Studies in Hegel's Philosophy of Religion** James Macbride Sterrett, 1890

Essays in Jewish Philosophy in the Modern Era Nathan Rotenstreich, 2023-12-14 This volume contains a collection of fifteen essays on Jewish Philosophy The essays deal with Moses Mendelssohn Hermann Cohen Franz Rosenzweig Martin Buber Abraham J Heschel and Gershom G Scholem The book starts with a lucid overview of nineteenth century Jewish

Philosophy it can be regarded as a companion volume to the author's Jewish Philosophy in Modern Times Nathan Rotenstreich 1914-1993 was Professor of Philosophy at the Hebrew University of Jerusalem and Vice President of the Israeli Academy of Sciences and Humanities *Hegel's Quest For Certainty* Joseph C. Flay, 1985-06-30 In a major contribution to Hegel scholarship Professor Flay has written two books in one The first is a close and original reading of the Phenomenology of Spirit and the second an invaluable source book containing a bibliography more than 450 titles and footnotes which discuss in detail the secondary resource material *Studies in the Methodology of Natural and Social Sciences* Igor Hanzel, 2010 Studies in the Methodology of Natural and Social Sciences explore from the point of view of philosophy philosophy of science methodology and semantics the methods of pretheoretical empirical measurement theory construction and methods of measurement that are already based on scientific theories This exploration targets both the natural and the social sciences In the field of natural sciences subject to theoretical and metatheoretical analyses are Huygens experimental and computational methods for determining the acceleration of gravity the methods of constructing a thermometer and Newtonian mechanics With respect to the field of social science it analyzes Marx's methods of theory construction presented in his work in the area of economics the methodological approaches employed in David Ricardo's theory of value sociological Grounded Theory Rational Choice Theory and Historical Sociology A significant attention is given to the philosophical reconstruction of the categories employed in the measurement methods and in the methods of construction of the analyzed theories **The Idea of Hegel's "Science of Logic"** Stanley Rosen, 2024-05-31 Although Hegel considered Science of Logic essential to his philosophy it has received scant commentary compared with the other three books he published in his lifetime Here philosopher Stanley Rosen rescues the Science of Logic from obscurity arguing that its neglect is responsible for contemporary philosophy's fracture into many different and opposed schools of thought Through deep and careful analysis Rosen sheds new light on the precise problems that animate Hegel's overlooked book and their tremendous significance to philosophical conceptions of logic and reason Rosen's overarching question is how if at all rationalism can overcome the split between monism and dualism Monism which claims a singular essence for all things ultimately leads to nihilism while dualism which claims multiple irreducible essences leads to what Rosen calls the endless chatter of the history of philosophy The Science of Logic he argues is the fundamental text to offer a new conception of rationalism that might overcome this philosophical split Leading readers through Hegel's book from beginning to end Rosen's argument culminates in a masterful chapter on the Idea in Hegel By fully appreciating the Science of Logic and situating it properly within Hegel's oeuvre Rosen in turn provides new tools for wrangling with the conceptual puzzles that have brought so many other philosophers to disaster *Praxis and Method (RLE: Gramsci)* Richard Kilminster, 2014-04-24 This sociological critique of the philosophy of praxis looks at the importance of the concept in the social theory of leading influential Western Marxists such as Lukács Gramsci Korsch Horkheimer Marcuse and Adorno in the inter war period It offers a detailed critique of Marx

and Hegel and explores the validity and implications for sociology of two of Marx's ideas which the later theorists made the centre piece of their social theory first that true theory is authenticated by praxis and second its corollary that certain major social transformations should and would in practice render sociology redundant Routledge Library Editions: Gramsci Various Authors, 2022-07-30 In the years since the publication of the Prison Notebooks the interest and importance of Antonio Gramsci's contribution to Marxist thought and political analysis has become widely recognised The concern to explore and identify the structures of the capitalist state is both the principal characteristic of Gramsci's theoretical and political writings and also the inspiration for his writings on Italian history This set re issues four volumes by leading commentators on Gramsci's politics and philosophy which were originally published between 1979 and 1981 **The Philosophy of Baruch Spinoza** Richard Kennington, 2018-03-02 This volume is a collection of articles that looks at the work of Baruch Spinoza through his metaphysics his philosophy of politics and religion and alternative approaches to Spinoza

Phenomenology on Kant, German Idealism, Hermeneutics and Logic O.K. Wiegand, Robert J. Dostal, Lester Embree, J.J. Kockelmans, J.N. Mohanty, 2013-06-29 Joseph 1 Kockelmans Pennsylvania State University In July of 1999 Prof Dr Thomas M Seebohm turned 65 years old and thus entered mandatory retirement His friends colleagues and former students thought that it would be fitting to celebrate the event of his retirement with a volume of essays in his honor in order to render homage to a great human being an outstanding and dedicated teacher a highly regarded philosopher and scholar but above all a dear friend and colleague When the editors thought about a unifying theme for the anthology they finally settled on the research interests of Professor Seebohm in their view the vast domain of his competence and interests would leave all participants the freedom to select a topic of their own choice that would nonetheless lie within this large realm as well as within the area of their own research interests Professor Seebohm's research interests encompass work in Phenomenology Hermeneutics German Idealism Kant in particular History of Philosophy Philosophy of the formal sciences of Logic in particular Philosophy of History Methodology and Philosophy of the Human Sciences including Psychology and Sociology History of 19th Century British Empiricism Mill American Pragmatism Analytic Philosophy Philosophy of Law and Practical Philosophy the development of the history of philosophy in Eastern Europe especially in the Middle Ages but also in the nineteenth century *Prolegomena to Any Future Materialism* Adrian Johnston, 2019-09-15 Adrian Johnston's trilogy *Prolegomena to Any Future Materialism* aims to forge a thoroughly materialist yet antireductive theory of subjectivity In this second volume *A Weak Nature Alone* Johnston focuses on the philosophy of nature required for such a theory This volume is guided by a fundamental question How must nature be rethought so that human minds and freedom do not appear to be either impossible or inexplicable within it Asked differently How must the natural world itself be structured such that sapient subjects in all their distinctive peculiarities emerged from and continue to exist within this world In *A Weak Nature Alone* Johnston develops his transcendental materialist account of nature through engaging with and weaving together five main

sources of inspiration Hegelian philosophy Marxist materialism Freudian Lacanian metapsychology Anglo American analytic neo Hegelianism and evolutionary theory and neurobiology Johnston argues that these seemingly but not really strange bedfellows should be brought together so as to construct a contemporary ontology of nature Through this ontology nonnatural human subjects can be seen to arise in an immanent bottom up fashion from nature itself **Zizek and Media Studies** M. Flisfeder, L. Willis, 2014-04-09 Film media and cultural theorists have long appealed to Lacanian theory in order to discern processes of subjectivization representation and ideological interpellation Here the contributors take up a Zizekian approach to studies of cinema and media raising questions about power ideology sexual difference and enjoyment **Marx's 'Grundrisse' and Hegel's 'Logic' (RLE Marxism)** Hiroshi Uchida, 2015-04-17 Marx's Grundrisse is acknowledged as the vital link between Marx's early and late work It is also a crucial text in elucidating Marx's debt to the idealist philosopher G W F Hegel This book first published in 1988 is the first full length study of that relationship in a thorough textual analysis which makes the connections explicit and also the Grundrisse's relations to the works of Adam Smith and Aristotle This book argues that Marx's critique of political economy and his critique of Hegel are double interrelated Not only did Marx adapt Hegelian logic in order to analyse the economic categories crucial to modern society but it is argued that those logical categories were themselves seen as reflections of the productive processes of contemporary commercial society Uchida reveals a conceptual structure common to the apparently rarefied world of Hegelian conceptual logic and to the supposedly common sensical world of economic science Demonstrating this is a considerable achievement and it allows us to consider precisely what is valuable today in Marx's critical commentary on this conceptual structure and on the type of society in which it is manifested Uchida's subject like Marx's is the force of capital on modern life The Philosophy and Politics of Bruno Bauer Douglas Moggach, 2003-03-27 This is a comprehensive study in English of Bruno Bauer a leading Hegelian philosopher of the 1840s Inspired by the philosophy of Hegel Bauer led an intellectual revolution that influenced Marx and shaped modern secular humanism In the process he offered a republican alternative to liberalism and socialism criticized religious and political conservatism and set out the terms for the development of modern mass and industrial society Based on in depth archival research this book traces the emergence of republican political thought in Germany before the revolutions of 1848 Professor Moggach examines Bauer's republicanism and his concept of infinite self consciousness He also explores the more disturbing aspects of Bauer's critique of modernity such as his anti-Semitism This book will be eagerly sought out by professionals in political philosophy political science and intellectual history **The Modern Schoolman**, 1975 **Philosophical and Theological Papers, 1958-1964** Bernard Lonergan, 1996-03-09 The period during which Bernard Lonergan delivered the eleven lectures in this volume was one of important transition for him he was moving rapidly toward a new conception of theology and its method and he was on the verge of what is now recognized as a major breakthrough in his thought on method the idea that came to him in February 1965 of the eight functional specialities While

the lectures maintain a continuity with Lonergan's previous work they also reveal new and significant ideas especially in regard to his drive toward a new conception of theology as a whole and his particular concern for the relevance of theology to the spiritual life The lectures here include The Redemption Method in Catholic Theology The Philosophy of History The Origins of Christian Realism Time and Meaning Consciousness and the Trinity Exegesis and Dogma The Mediation of Christ in Prayer The Analogy of Meaning Philosophical Positions with Regard to Knowing and Theology as Christian Phenomenon This volume provides a key to understanding the development of Lonergan's philosophical and theological thought his major influences and the pivotal moments of transition in the road leading up to Method in Theology and beyond
