Evidence for Linguistic Relativity Susanne Niemeier, René Dirven, 2000-01-01 This volume has arisen from the 26th International LAUD Symposium on Humboldt and Whorf Revisited Universal and Culture Specific Conceptualizations in Grammar and Lexis While contrasting two or more languages the papers in this volume either provide empirical evidence confirming hypotheses related to linguistic relativity or deal with methodological issues of empirical research These new approaches to Whorf's hypotheses do

not focus on mere theorizing but provide more and more empirical evidence gathered over the last years They prove in a very sophisticated way that Whorf's ideas were very lucid ones even if Whorf's insights were framed in a terminology which lacked the flexibility of linguistic categories developed over the last quarter of this century especially in cognitive linguistics To date there is sufficient proof to claim that linguistic relativity is indeed a vital issue and the current volume confirms a more general trend for rehabilitating Whorf's theory complex and also offers evidence for it It contains articles written by scholars from various fields of linguistics including phonology psycholinguistics language acquisition historical linguistics anthropological linguistics and cross cultural semantics which all contribute to a re evaluation and partial reformulation of Whorf's thinking

Romance Languages and Linguistic Theory 2004 Jenny Doetjes, Paz González, 2006-01-01 This volume brings together a selection of papers from the eighteenth Going Romance symposium held at Leiden University 9-11 December 2004 These papers cover a broad range of topics in phonology morphology syntax semantics historical linguistics and acquisition in a variety of Romance languages

Saami Linguistics Ida Toivonen, Diane Carlita Nelson, 2007 The papers in this volume describe and analyze an array of intriguing linguistic phenomena as they occur in the Saami languages ranging from etymological nativization of loanwords to the formation of deadjectival and denominal verbs Saami displays a number of characteristics that are unusual from a cross linguistic perspective including partial agreement on verbs a three way quantity distinction in consonants and spectacular consonant gradation The eight papers presented here approach these and other issues from diverse theoretical perspectives in morphology phonology and syntax The volume includes an extensive research bibliography which will be helpful for anyone interested in Saami linguistics

Clinical Linguistics Elisabetta Fava, 2002 This book covers different aspects of speech and language pathology and it offers a fairly comprehensive overview of the complexity and the emerging importance of the field by identifying and re-examining from different perspectives a number of standard assumptions in clinical linguistics and in cognitive sciences The papers encompass different issues in phonetics phonology syntax semantics and pragmatics discussed with respect to deafness stuttering child acquisition and impairments SLI William's Syndrome deficit fluent aphasia and agrammatism The interdisciplinary complexity of the language cognition interface is also explored by focusing on empirical data from different languages Bantu Catalan Dutch English German Greek Hebrew Italian Japanese and Spanish The aim of this volume is to stress the growing importance of the theoretical and methodological linguistic tools developed in this area to bring under scrutiny assumptions taken for granted in recent analyses which may not be so obvious as they may seem to investigate how even apparently minimal choices in the description of phenomena may affect the form and complexity of the language cognition interface

Historical and Comparative Linguistics Raimo Anttila, 1989-01-01 In any course of historical and comparative linguistics there will be students of different language backgrounds different levels of linguistic training and different theoretical orientation This textbook attempts to mitigate the problems raised by this heterogeneity in a number of ways

Since it is impossible to treat the language or language family of special interest to every student the focus of this book is on English in particular and Indo European languages in general with Finnish and its closely related languages for contrast The tenets of different schools of linguistics and the controversies among them are treated eclectically and objectively the examination of language itself plays the leading role in our efforts to ascertain the comparative value of competing theories This revised edition 1989 of a standard work for comparative linguists offers an added introduction dealing mainly with a semiotic basis of change a final chapter on aspects of explanation particularly in historical and human disciplines and added sections on comparative syntax and on the semiotic status of the comparative method *Topics in Cognitive Linguistics* Brygida Rudzka, 1988 This volume presents new developments in cognitive grammar and explores its descriptive and explanatory potential with respect to a wide range of language phenomena These include the formation and use of locationals causative constructions adjectival and nominal expressions of oriented space morphological layering tense and aspect and extended uses of verbal predicates There is also a section on the affinities between cognitive grammar and early linguistic theories both ancient and modern Theoretical Issues in Contrastive Linguistics Jacek Fisiak, 1981-01-01 Contrastive Linguistics roughly defined as a subdiscipline of linguistics which is concerned with the comparison of two or more subsystems of languages has long been associated primarily with language teaching Apart from this applied aspect however it also has a strong theoretical purpose contributing to our understanding of language typology and language universals Issues in theoretical CL which also feature in this volume are the choice of model the notions of equivalence and contrast and directionality of descriptions Languages used for illustration in this volume include English German Danish and Polish

Romance Linguistics 2006 José Camacho, Nydia Flores-Ferrán, Liliana Sánchez, Viviane Déprez, María José Cabrera, 2007-11-21 This volume presents selected papers from the 36th LSRL conference held at Rutgers University in 2006 It contains twenty two articles of current approaches to the study of Romance linguistics Well known researchers present their findings in areas such as of syntax and semantics phonology psycholinguistics sociolinguistics The volume contains scholarly research in areas such as parenthetical null topic construction expletives number and language change performative verbs in colonial court Spanish aspect shift palatalization in Romanian melodic contours in Majorcan Catalan variation in verb type and position and deviance in early child bilingualism among many others It is a well rounded selection of research topics that will enrich and widen our understanding of Romance languages **New Perspectives on Romance Linguistics** Chiyo Nishida, Jean-Pierre Y. Montreuil, 2006-08-31 This is the first of two volumes emanating from the Linguistic Symposium on Romance Languages held at the University of Texas at Austin in February 2005 It features the keynote address delivered by Denis Bouchard on exaptation and linguistic explanation as well as seventeen contributions by emerging and internationally recognized scholars of Spanish French Italian as well as Rumanian While the emphasis bears on formal analyses the coverage is remarkably broad as topics range from morphology syntax semantics pragmatics and language

acquisition Each article seeks to represent a new perspective on these topics and a variety of frameworks and concepts are exploited distributive morphology entailment theory grammaticalization information structure left periphery polarity lattice spatial individuation thematic hierarchy etc This volume will challenge anyone interested in current issues in theoretical Romance Linguistics **English Historical Linguistics 2006** Maurizio Gotti, Marina Dossena, Richard Dury, 2008 The papers collected in this volume were first presented at the 14th International Conference on English Historical Linguistics Bergamo 2006 Alongside studies of syntax morphology lexis and semantics published in two sister volumes many innovative contributions focused on geo historical variation in English A carefully peer reviewed selection including two plenary lectures appears here in print for the first time bearing witness to the increasing scholarly interest in varieties of English other than so called standard English In all the contributions well established methods of historical dialectology combine with new theoretical approaches in an attempt to shed more light on phenomena that have hitherto remained unexplored or have only just begun to be investigated Perceptual dialectology is also taken into consideration and state of the art tools such as electronic corpora and atlases are employed consistently ensuring the methodological homogeneity of the contributions
