Linguistic Reconstruction Its Potential And Limitations In New Perspective:

Linguistic Reconstruction, Its Potential and Limitations in New Perspective Henrik Birnbaum, 1978 *Linguistic Reconstruction* Henrik Birnbaum, 1976-07 Linguistic structure entities levels processes Methods of reconstruction Diachrony reconstruction and prediction Grouping genealogy and typology Phonological reconstruction Morphological reconstruction and the nature of linguistic change Syntactic reconstruction Semantic reconstruction Distant genetic relationship and typology toward the reconstruction of preprotolanguages the case of Nostratic Linguistic change and reconstruction **Linguistic Reconstruction** Anthony Fox, 1995 How and why are languages constantly changing Historical linguistics seeks to find out by going beyond the history of individual languages to discover the general principles which underlie language change But our evidence is severely limited Most of the world's languages are still unwritten and even in areas with long written traditions such as Europe and the Near East documentary evidence stretches only a little way back along the path of the historical development of languages How then can we uncover our long linguistic prehistory and what can it tell us about language change This new textbook is an accessible general guide for students with an elementary knowledge of linguistics to the methods and theoretical bases of linguistic reconstruction and of newer less well established principles such as the application of linguistic universals and language typology and quantitative techniques Finally he reviews the principles for establishing language relationships and for uncovering information about the homelands and cultures of the prehistoric speakers of reconstructed languages *Papers from the VIth International Conference on Historical Linguistics, Poznań, 22-26 August 1983* Jacek Fisiak, 1985-01-01 This volume presents a selection of papers from the 6th International Conference on Historical Linguistics ICHL which was held in 1983 in Poznań Poland **Proceedings of the Fourteenth International Congress of Linguists. Volume 3** Werner Bahner, Joachim Schildt, Dieter Viehweger, 2022-12-05 No detailed description available for BAHNER PROC 14TH INT CONF LING V 3 P14ICL E BOOK *Papers from the 6th International Conference on Historical Linguistics* Jacek Fisiak, 1985-01-01 This volume presents a selection of papers from the 6th International Conference on Historical Linguistics ICHL which was held in 1983 in Poznań Poland *The Laws of Indo-European* N. E. Collinge, 1985-01-01 This book collects all the named laws of Indo-European presents each in its original form and rationale and then provides an evaluation of all major attacks revisions and exploitations along with a full bibliography and index Complete thorough exhaustive **Historical Linguistics, 1987** Henning Andersen, E. F. K. Koerner, 1990 The volume contains 37 papers originally presented at the 8th International Conference on Historical Linguistics in Lille France The papers bring historical data to bear on issues in theoretical linguistics both descriptive and diachronic or deal with specific questions in the history of individual languages The theoretical issues range from phonology over morphology and syntax to the lexicon as well as questions of historical dialectology language contact the theory of linguistic change and problems of comparative reconstruction The languages discussed are Finno-Ugric and Indo-European

most of the papers dealing with Germanic and Romance languages especially English and French but some being devoted to Greek Celtic Slavic and Hittite Toward Proto-Nostratic Allan R. Bomhard, 1984-01-01 This book represents the culmination of the author's work to date it incorporates and updates previous articles and adds much new material This book is not nor was it ever intended to be a comparative grammar of either the Indo European or the Afroasiatic language families It is rather a comparison of Proto Indo European with Proto Afroasiatic While this is not the first attempt to demonstrate that Proto Indo European and Proto Afroasiatic are genetically related it is the first to use the radical revision of the Proto Indo European consonantal system proposed by Thomas V Gamkrelidze Paul J Hopper and Vja eslav V Ivanov Moreover unlike previous endeavors this is the first to make extensive use of data from the non Semitic branches of Afroasiatic The assumptions underlying this investigation of the possibility of the common genetic origin of Proto Indo European and Proto Afroasiatic differ considerably from the assumptions made in other works on Nostratic the methodological approach followed in this monograph has been one of rigorous adherence to the time honored principles of comparative reconstruction

Historical Syntax in Cross-Linguistic Perspective Alice C. Harris, Lyle Campbell, 1995-09-21 In this major new work Alice Harris and Lyle Campbell set out to establish a general framework for the investigation of linguistic change Systematic cross linguistic comparison of syntactic change across a wide variety of languages is used to construct hypotheses about the universals and limits of language change more generally In particular the authors seek to move closer towards describing the range of causes of syntactic change to develop an understanding of the mechanisms of syntactic change and to provide an understanding of why some languages undergo certain changes and not others The authors draw on languages as diverse as Pipil and French Georgian and Estonian and the data presented is one of the book's great strengths Rigor and precision are combined here with a great breadth of scholarship to produce a unique resource for the study of linguistic change which will be of use to scholars and students alike *Aspects of the Phonology of the Slavonic Languages* J. Ian Press, 2024-12-09

The New Sound of Indo-European Theo Vennemann, 2011-06-01 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing **Studies in Language Origins** Walburga von Raffler-Engel, Jan Wind, Abraham Jonker, 1991-08-22

The question of language origin has fascinated people for years The contributions in the present book stem primarily from the papers presented at the Third International Meeting of the Language Origins Society LOS held at Vanderbilt University in Nashville Tennessee June 1988 The contributors approach the problem not only from the viewpoint of linguistics but also from that of anatomy physiology social sciences physical anthropology paleoanthropology paleontology comparative zoology general biology ethology evolutionary biology and psychology

Principles of Historical Linguistics Hans Henrich Hock, 2021-10-25 Historical linguistic theory and practice consist of a large number of chronological layers that have been accepted in the course of time and have acquired a permanence of their own These range from neogrammarian conceptualizations of sound change analogy and borrowing to prosodic lexical morphological and syntactic change and to present day views on rule change and the effects of language contact To get a full grasp of the principles of historical linguistics it is therefore necessary to understand the nature of each of these layers This book is a major revision and reorganization of the earlier editions and adds entirely new chapters on morphological change and lexical change as well as a detailed discussion of linguistic palaeontology and ideological responses to the findings of historical linguistics to this landmark publication

Theoretical Bases of Indo-European Linguistics Winfred P. Lehmann, 2015-01-28 This book presents for the first time in English a complete critical survey of the theory and methodology of Indo European linguistics from its origins two centuries ago to the present day

Research Guide on Language Change Edgar C. Polomé, 2011-06-15

TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing

The Rise and Fall of Languages Robert M. W. Dixon, 1997-12-11 A different approach to the theories on language evolution and change

Fragments of Languages, 2024-10-07 The book deals with the concept of fragmentation as applied to languages and their documentation It focuses in particular on the theoretical and methodological consequences of such a fragmentation for the linguistic analysis and interpretation of texts and hence for the reconstruction of languages Furthermore by adopting an innovative perspective the book aims to test the application of the concept of fragmentation to languages which are not commonly included in the categories of Corpussprache Tr mmersprache and Restsprache This is the case with diachronic or diatopic varieties of even

well known languages which are only attested through a limited corpus of texts as well as with endangered languages In this latter case not only is the documentation fragmented but the very linguistic competence of the speakers due to the reduction of contexts of language use interference phenomena with majority languages and consequent presence of semi speakers

Nostratic Joseph C. Salmons, Brian D. Joseph, 1998 The Nostratic hypothesis positing a common linguistic ancestor for a wide range of language families including Indo European Uralic and Afro Asiatic has produced one of the most enduring and often intense controversies in linguistics Overwhelmingly though both supporters of the hypothesis and those who reject it have not dealt directly with one another s arguments This volume brings together selected representatives of both sides as well as a number of agnostic historical linguists with the aim of examining the evidence for this particular hypothesis in the context of distant genetic relationships generally The volume contains discussion of variants of the Nostratic hypothesis A Bomhard J Greenberg A Manaster Ramer K Baertsch K Adams C Hodge A Vovin with responses and additional discussion by E Hamp B Vine W Baxter and B Comrie

Archaeology and Language I Roger Blench, Matthew Spriggs, 2003-09-02
Archaeology and Language I represents groundbreaking work in synthesizing two disciplines that are now seen as interlinked linguistics and archaeology This volume is the first of a three part survey of innovative results emerging from their combination Archaeology and historical linguistics have largely pursued separate tracks until recently although their goals can be very similar While there is a new awareness that these disciplines can be used to complement one another both rigorous methodological awareness and detailed case studies are still lacking in literature Archaeology and Language I aims to fill this lacuna Exploring a wide range of techniques developed by specialists in each discipline this first volume deals with broad theoretical and methodological issues and provides an indispensable background to the detail of the studies presented in volumes II and III This collection deals with the controversial question of the origin of language the validity of deep level reconstruction the sociolinguistic modelling of prehistory and the use and value of oral tradition
