Cultures and Materialities of Imagination Stephan S. Sieland, 2020-10-01 In our current digital era imagination and the cultural and material conditions by which it is developed are more crucially than ever implicated in the experienced adversities and contradictions of drug use The technological changes of society underscore the need for rethinking dominant understandings which portray addiction as an immediate and even mindless relation between a person and a substance or behavior only minimally affected by subjective significance and historical alterations of everyday life Indeed from ancient mythology to our modern times drugs have been part of our cultural history Understandings and practices of their uses have developed through cultural ideas and cultural material conditions like traditions rituals and routines Today the omnipresence of digital media in everyday life is massively changing and expanding such cultural and material conditions Digital media equip people with associations between drugs and an incredible abundance of images ideas facts fiction narratives plots soundtracks characters and much more and thereby expanding their imaginable potentials for providing answers to biographical questions People and potential drug use become connected in novel and labyrinthine ways through digital communities and arrangements of everyday life And digital media are part of and transform the cultural material practices in which activities and experiences of intoxication actually take place In the book all these details are extensively analyzed empirically based on qualitative data on the lives of a number of young Danish people who were undergoing treatment for drug related problems at the time of the research An underlying premise of the entire work is that addiction may be seen as a more extreme expression of how the technological developments in our contemporary world more generally speaking magnify the contradictory implications of imagination for modern living Over the recent years psychological research into the significance of the human capacity to imagine for how people deal with and live their lives has received growing attention Yet the complex involvement of imagination in actual living and consequently the theoretical cruxes this engenders continue to amaze and surprise research and researchers This book also contributes to these theoretical ambitions with a substantial work on the concept of imagination It primarily suggests that a critical discussion of how imagining is essentially a contradictory process in everyday life and how it is always grounded in the agency of material aspects ranging anywhere from mundane artifacts over mediated content to advanced technologies is ultimately what makes the scientific study of imagination relevant to understanding and intervening in the dilemmas and crises of modern life and society The book will primarily interest scholars of social psychology of everyday life scholars working conceptually and empirically on imagination scholars of social studies of media materiality and technology

and researchers or practitioners working with addictions

Medieval Romance and Material Culture Nicholas Perkins, 2015 Studies of how the physical manifests itself in medieval romance and

medieval romances as objects themselves Medieval romance narratives glitter with the material objects that were valued and exchanged in late medieval society lovers rings and warriors swords holy relics and desirable or corrupted bodies Romance however is also a genre in which such objects make meaning on numerous levels and not always in predictable ways These new essays examine from diverse perspectives how romances respond to material culture but also show how romance as a genre helps to constitute and transmit that culture Focusing on romances circulating in Britain and Ireland between the twelfth and sixteenth centuries individual chapters address such questions as the relationship between objects and protagonists in romance narrative the materiality of male and female bodies the interaction between visual and verbal representations of romance poetic form and manuscript textuality and how a nineteenth century edition of medieval romances provoked artists to homage and satire
