Linguistic Interference And Convergent Change:

Linguistic Interference and Convergent Change V. J. Rozencveig, 2017-12-04 No detailed description available for Linguistic Interference and Convergent Change **Linguistic Interference and Convergent Change** Viktor Iľevich Rozentšveig, 1976 No detailed description available for Linguistic Interference and Convergent Change **Transfer and Interference in Language**, 1984-01-01 The topic of this bibliography in its broadest sense is the subject of a wide range of academic disciplines Given these circumstances the particular associations and connotations of the terms transfer and interference in each of these areas are legion with resultant differences in meaning in the disparate literature on these subjects And yet it is in one way or another contact and interaction of languages in the speaker hearer and learner in language acquisition contexts as well as in society in general which is basic to these two concepts throughout the various disciplines The discovery of this basic unitary notion is surely one of the reasons for the new interest in these phenomena In light of all this a bibliography cannot at present avoid being highly selective in order to demarcate an interdisciplinary area of research in its own right and with its own status The establishment of such an area is one of our main aims The focus of interest in this bibliography admittedly is directed towards the psycholinguistics of language contact and interaction

contact and the conditions under which bilingual speakers master their every day life in bilingual communities Its nine contributions cover both theoretical and typological aspects such as the classification of languages the role of language contact linguistic complexity and spontaneous speech innovations and convergence and divergence processes in translation morpho syntax and phonology phonetics Taken together these studies provide challenges for linguistic theories that generalize from situations of monolingualism suggesting instead that a sound linguistic theory cannot be a theory for just one single isolated language but must be a theory for at least two languages It must also account for the fact that some structures involved in contact situations are not kept apart but develop in such a way that the distance decreases between the languages involved *Bilingualism in the Spanish-Speaking World* Jennifer Austin, María Blume, Liliana Sánchez, 2015-04-23 An introduction to bilingualism in the Spanish speaking world looking at topics including language contact bilingual societies code switching and language choice

feature values for the same functional category in both languages to the activation of features related to the informational structure of the sentence These mechanisms are illustrated in detail by the presence of overt determiners canonical SVO word order and the absence of accusative marking in bilingual Quechua and by neutralization of case and gender distinctions in direct object pronouns as well as in the emergence of null pronouns with definite antecedents in bilingual Spanish
