## **Linking Objects And Linking Phenomena:**

Linking Objects and Linking Phenomena Vamik Volkan, 2025-07-31 Vamik Volkan brings a breadth of theory academic rigor and clinical study to the subject of complicated mourning. He focuses on the at times bizarre ways in which bereaved persons maintain contact with the dead by means of inanimate objects or psychic phenomena invested with magical powers which he calls linking objects and linking phenomena. For these individuals their mourning reproduces the same ambivalence that characterized their lifetime relationships with the deceased and they simultaneously long for and dread a return from the grave. The linking object or phenomenon enables the mourner to maintain the illusion of external control over the dead person and extends the mourning process indefinitely. Volkan carefully distinguishes this established pathological mourning from neurotic depression and normal mourning. Grief in itself is not a mental disorder and he provides original contributions to our understanding of grieving from both a phenomenological and metapsychological point of view. Volkan introduces his clinical research, describes helpful exercises and psychotherapeutic techniques and offers examples of a revolutionary brief psychotherapy called re-grief therapy. Continuing case studies bring the rich theory to life including illuminating clinical illustrations of the replacement child and demonstrate the effectiveness of psychoanalytic treatment. On the theoretical side Volkan compares linking objects with transitional objects, fetishes, talismans and inanimate objects considered magical by psychotics. *Linking Objects and Linking Phenomena* Vamik D. Wandering Spirits Janne Flora, 2019-03-28 It is common to think of the Arctic as remote, perched at the farthest reaches of the world, a simple and harmonious isolated utopia. But the reality as Janne Flora shows us is anything but. In *Wandering Spirits* Flora reveals how deeply connected the Arctic is to the rest of the world and how it has been affected by the social, political, economic and environmental shifts that ushered in the modern age. In this innovative study Flora focuses on Inuit communities in Greenland and addresses a central puzzle: their alarmingly high suicide rate. She explores the deep connections between loneliness and modernity in the Arctic, tracing the history of Greenland and analyzing the social dynamics that shaped it. Flora's thorough, sensitive engagement with the families that make up these communities uncovers the complex interplay between loneliness and a host of economic and environmental practices, including the widespread local tradition of hunting. *Wandering Spirits* offers a vivid portrait of a largely overlooked world in all its fragility and nuance while engaging with core anthropological concerns of kinship and the structure of social relations.

**Continuing Bonds** Dennis Klass, Phyllis R. Silverman, Steven Nickman, 2014-05-12  
 First published in 1996 This new book gives voice to an emerging consensus among bereavement scholars that our understanding of the grief process needs to be expanded The dominant 20th century model holds that the function of grief and mourning is to cut bonds with the deceased thereby freeing the survivor to reinvest in new relationships in the present Pathological grief has been defined in terms of holding on to the deceased Close examination reveals that this model is based more on the cultural values of modernity than on any substantial data of what people actually do Presenting data from several populations 22 authors among the most respected in their fields demonstrate that the health resolution of grief enables one to maintain a continuing bond with the deceased Despite cultural disapproval and lack of validation by professionals survivors find places for the dead in their on going lives and even in their communities Such bonds are not denial the deceased can provide resources for enriched functioning in the present Chapters examine widows and widowers bereaved children parents and siblings and a population previously excluded from bereavement research adoptees and their birth parents Bereavement in Japanese culture is also discussed as are meanings and implications of this new model of grief Opening new areas of research and scholarly dialogue this work provides the basis for significant developments in clinical practice in the field

One implores that we cure him of his fear of dogs Another offers the fear of aloneness as the rationale of her staying in a bad marriage Yet another avoids all athletic activity due to the fear of physical injury And a fourth one lives in utter denial of passing time to avoid facing his fear of death Despite its ubiquitous presence fear has received little direct attention in psychoanalytic literature This book aims to fill this lacuna It explicates various intensities of fear e g apprehension dread panic and terror It delineates the boundaries between fear and anxiety and demonstrates how phobic states constitute an admixture of these two emotions **My Work With Borderline Patients** Harold F.
