## **Lippincotts Pathophysiology Series Hematologic Pathophysiology:**

Hematologic Pathophysiology Fred J. Schiffman, 1998 This volume enables students to master the science and clinical applications of hematologic pathophysiology and develop the problem solving skills that are needed for exams and clinical rotations The book provides a solid overview of hematology and applies scientific principles to actual clinical cases and problems This unique case problem format prepares students to link basic science to clinical medicine as emphasized in today s exams Using actual patient cases to illustrate hematologic principles the book covers the life cycles structures and physiology of red and white blood cells and then discusses hemostasis bone marrow disorders and hematologic malignancies Boxed case problems challenge the student to apply key hematologic principles in a variety of clinical decisions Numerous two color drawings and schematics illustrate all essential concepts and subheads color highlights and tables aid in comprehension and review

Clinical Neuroanatomy for Medical Students Richard S. Snell, 1997 This text provides students with the basic knowledge of neuroanatomy needed to practise medicine Each chapter starts with a neurological case history which sets the scene This is then followed by a chapter outline for quick access to material and chapter objectives to focus the student on the most important material in that chapter
