Experience Conceptual Activity:

The Unity of Mystical Traditions Randall Studstill, 2018-08-14 This book argues that mystical doctrines and practices initiate parallel transformative processes in the consciousness of mystics This thesis is supported through a comparative analysis of Tibetan Buddhist Dzogchen rdzogs chen and the medieval German mysticism of Eckhart Suso and Tauler These traditions are interpreted using a system cybernetic model of consciousness This model provides a theoretical framework for assessing the cognitive effects of mystical doctrines and practices and showing how different doctrines and practices may nevertheless initiate common transformative processes This systems approach contributes to current philosophical discourse on mysticism by 1 making possible a precise analysis of the cognitive effects of mystical doctrines and practices and 2 reconciling mystical heterogeneity with the essential unity of mystical traditions *Sitting with Koans* John Daido

Loori, 2012-06-04 The Zen tradition has just two main meditative practices shikantaza or just sitting and introspection guided by the powerful Zen teaching stories called koans Following in the tradition of *The Art of Just Sitting* endorsed as a A book we have needed for a long long time this new anthology from John Daido Loori illuminates the subtle practice of koan study from many different points of view Includes writings by Robert Aitken William Bodiford Robert Buswell Roko Sherry Chayat Francis Dojun Cook Eihei Dogen Heinrich Dumoulin Hakuin Ekaku Victor Sogen Hori Keizan Jokin Philip Kapleau Chung fen Ming Pen Taizan Maezumi Dennis Genpo Merzel Soen Nakagawa Ruth Fuller Sasaki Sokei an Sasaki Nyogen Senzaki Zenkei Shibayama Eido Shimano Philip Yampolsky Hakuun Yasutani Wayne Yokoyama Katsushiro Yoshizawa *The Koan* Steven Heine, Dale S. Wright, 2000 Koans are enigmatic spiritual formulas used for religious training in the Zen Buddhist tradition This innovative religious practice is one of the most distinctive elements of this tradition which originated in medieval China and spread to Japan and Korea Perhaps no dimension of Asian religious has attracted so much interest in the West and its influence is apparent from beat poetry to deconstructive literary criticism The essays collected in this volume all previously unpublished argue that our understanding of the koan tradition has been severely limited The authors try to undermine stereotypes and problematic interpretations by examining previously unrecognized factors in the formation of the tradition and by highlighting the rich complexity and remarkable diversity of koan practice and literature **From Kant to**

Davidson Jeff Malpas, 2003-09-02 Recent philosophy has seen the idea of the transcendental first introduced in its modern form in the work of Kant take on a new prominence Bringing together an international range of younger philosophers and established thinkers this volume opens up the idea of the transcendental examining it not merely as a mode of argument but as naming a particular problematic and a philosophical style With contributions engaging with both analytic and continental approaches this book will be of essential interest to philosophers and philosophy students interested in the idea of the transcendental and the part that it plays in modern and contemporary philosophy **Seeing More** Samantha

Matherne, 2024-05-07 Samantha Matherne defends a systematic interpretation of the philosopher Immanuel Kants theory of

imagination In contrast with more traditional theories of imagination as a kind of fantasy that we exercise only in relation to objects that are not real or not present Matherne argues that Kant theorizes imagination as something that we exercise just as much in relation to objects that are real and present In short she attributes to Kant a view of imagining as something that pervades our lives In order to bring out this pervasiveness Matherne offers an account of what kind of mental capacity Kant takes imagination to be in general She then explores Kants picture of how we exercise our imagination in perception ordinary experience the appreciation of beauty and sublimity the production of art the pursuit of happiness and the pursuit of morality However she makes the case that Kants analysis of this wide range of phenomena is underwritten by a unified theory of what imagination is as a remarkably flexible cognitive capacity that we can exercise in constrained and creative playful and serious ways

From Text to Literature S. Olsen,A. Pettersson,2005-09-14 The articles in this collection focus attention on the concept of literature and on the relationship between this concept and the concepts of a literary work and a literary text Adopting an analytic approach the articles attempt to clarify how these concepts govern our thinking about the phenomenon of literature in various ways exploring the issues which arise when these concepts are employed as theoretical instruments for describing and analyzing the phenomenon of literature

Experience and History David Carr,2014-07-01 David Carr outlines a distinctively phenomenological approach to history Rather than asking what history is or how we know history a phenomenology of history inquires into history as a phenomenon and into the experience of the historical How does history present itself to us how does it enter our lives and what are the forms of experience in which it does so History is usually associated with social existence and its past and so Carr probes the experience of the social world and of its temporality Experience in this context connotes not just observation but also involvement and interaction We experience history not just in the social world around us but also in our own engagement with it For several decades philosophers reflections on history have been dominated by two themes representation and memory Each is conceived as a relation to the past representation can be of the past and memory is by its nature of the past On both of these accounts history is separated by a gap from what it seeks to find or wants to know and its activity is seen by philosophers as that of bridging this gap This constitutes the problem to which the philosophy of history addresses itself how does history bridge the gap which separates it from its object the past It is against this background that a phenomenological approach based on the concept of experience can be proposed as a means of solving this problem or at least addressing it in a way that takes us beyond the notion of a gap between present and past

Pragmatism, Objectivity, and Experience Steven Levine,2019-01-24 Argues that satisfactory theories of objectivity must include the robust account of experience found in classical pragmatism

Zen Sand Victor Sogen Hori,2003-02-28 *Zen Sand* is a classic collection of verses aimed at aiding practitioners of k an meditation to negotiate the difficult relationship between insight and language As such it represents a major contribution to both Western Zen practice and English language Zen scholarship In Japan the traditional Rinzaï Zen k an curriculum includes the use of jakugo or

capping phrases Once a monk has successfully replied to a k an the Zen master orders the search for a classical verse to express the monk s insight into the k an Special collections of these jakugo were compiled as handbooks to aid in that search Until now Zen students in the West lacking this important resource have been severely limited in carrying out this practice Zen Sand combines and translates two standard jakugo handbooks and opens the way for incorporating this important tradition fully into Western Zen practice For the scholar Zen Sand provides a detailed description of the jakugo practice and its place in the overall k an curriculum as well as a brief history of the Zen phrase book This volume also contributes to the understanding of East Asian culture in a broader sense

G. W. F. Hegel Michael Baur, 2015-05-01 The thought of G W F Hegel 1770 1831 has had a deep and lasting influence on a wide range of philosophical political religious aesthetic cultural and scientific movements But despite the far reaching importance of Hegel s thought there is often a great deal of confusion about what he actually said or believed G W F Hegel Key Concepts provides an accessible introduction to both Hegel s thought and Hegel inspired philosophy in general demonstrating how his concepts were understood adopted and critically transformed by later thinkers The first section of the book covers the principal philosophical themes in Hegel s system epistemology metaphysics philosophy of mind ethical theory political philosophy philosophy of nature philosophy of art philosophy of religion philosophy of history and theory of the history of philosophy The second section covers the main post Hegelian movements in philosophy Marxism existentialism pragmatism analytic philosophy hermeneutics and French poststructuralism The breadth and depth of G W F Hegel Key Concepts makes it an invaluable introduction for philosophical beginners and a useful reference source for more advanced scholars and researchers

The Aconceptual Mind Pauli Pylkkö, 1998-01-01 According to Heidegger naturalistic thinking is naive and unable to deal with its own essence and limitation But these eight thematically intertwined essays face Heidegger s critique of naturalistic thinking habits The author develops a holistic and antirealistic version of naturalism

Max Scheler's Concept of the Person Ron Perrin, 1991-08-12

On Thinking and the World Sandra M. Dingli, 2017-07-05 John McDowell s Mind and World has since its publication in 1994 become a seminal text putting forward many new ideas on the manner in which concepts mediate the relation between minds and the world Yet McDowell s ideas are not easy to comprehend In this book Sandra Dingli both elaborates and simplifies McDowell s ideas in order to give greater clarity to them and to assist in the understanding and appreciation of his work Dingli selects five particular contemporary philosophical topics which McDowell deals with and investigates in detail the implications of particular points of view analysing the current literature on each

topic and drawing out shortcomings and possibilities for overcoming them This work is then both a critique and complement to McDowell's text McDowell's project is to dissolve a number of dualisms such as sensibility and understanding conceptual and non conceptual content scheme and content and reason and nature Dingli critically analyses each of these and claims that a proper understanding of the philosophical method of quietism is important for a correct understanding of this text concluding that McDowell does not go far enough in his attempt to attain peace for philosophy as traditional dichotomies such as that of realism and anti realism still appear to exert a grip on his thinking *Hilary Putnam* Maximilian De Gaynesford,2014-12-18 Putnam is one of the most influential philosophers of recent times and his authority stretches far beyond the confines of the discipline However there is a considerable challenge in presenting his work both accurately and accessibly This is due to the width and diversity of his published writings and to his frequent spells of radical re thinking But if we are to understand how and why philosophy is developing as it is we need to attend to Putnam's whole career He has had a dramatic influence on theories of meaning semantic content and the nature of mental phenomena on interpretations of quantum mechanics theory change logic and mathematics and on what shape we should desire for future philosophy By presenting the whole of his career within its historical context de Gaynesford discovers a basic unity in his work achieved through repeated engagements with a small set of hard problems By foregrounding this integrity the book offers an account of his philosophy that is both true to Putnam and helpful to readers of his work **Language, Truth and Democracy** Margit Gaffal,2020-08-24 The aim of this volume is to investigate three fundamental issues of the new millennium language truth and democracy The authors approach the themes from different philosophical perspectives One group of authors examines the use of language and the meaning of concepts from an analytic point of view the ontology of scientific terms and explores the nature of knowledge in general Another group examines truth and types of relation A third group of authors focuses on the current factors influencing our concept of democracy and its legal foundations and makes reference to moral aspects and the question of political responsibility The chapters provide the reader with an overview of current philosophical problems and the answers to these questions will be decisive for future development **On Craftsmanship** Christopher Frayling,2012-06-18 Craftsmanship has again become fashionable in high places just as it did in the last few recessions The concept of craftsmanship has never been as relevant and timely as it is today Assailed on all sides by among many other tendencies flexible working short termism portfolio careers quick fix training and the cult of celebrity it has recently re entered public debate with a new sense of urgency Why A bestseller in hardback this series of linked essays by the man who ran the Royal College of Art for many years is now available in paperback and explores the crafts in education in history and literature in the contemporary arts landscape in the language in the digital age taking an unsentimental hard headed look at craftsmanship today Only when the romantic cobwebs have been blown away it argues can the key importance of the crafts be fully understood **In the Space of Reasons** Wilfrid Sellars,2007 Sellars 1912 1989 was in the opinion of many the

most important American philosopher of the second half of the twentieth century This collection coedited by Sellars s chief interpreter and intellectual heir should do much to elucidate and clearly establish the significance of this difficult thinker s vision for contemporary philosophy Living with Concepts Andrew Brandel,Marco Motta,2021-06-15 In this anthology philosophers and anthropologists examine a concept too often taken for granted that of the concept itself Concepts are often thought of as mere tools of analysis or as straightforwardly equivalent to signs or symbols But the contributors in this volume challenge these conventional frameworks turning instead to the ways concepts are intrinsically embedded in our forms of life and how they constitute the very substrate of our conscious existence Attending to our ordinary lives with concepts requires not an ascent from the rough ground of reality into the skies of theory but rather acceptance of the fact that thinking is congenital to living with and through concepts The volume offers a critical and timely intervention into both contemporary philosophy and anthropological theory by unsettling the distinction between thought and reality that continues to be too often assumed showing how the supposed need to grasp reality may be replaced by an acknowledgement that we are in its grip Contributors Jocelyn Benoist Andrew Brandel Michael Cordey Veena Das Rasmus Dyring and Thomas Schwarz Wentzer Michael D Jackson Michael Lambek Sandra Laugier Marco Motta Michael J Puett and Lotte Buch Segal **Yearbook of the National Society for the Study of Education** National Society for the Study of Education,1906
