Inventing Western Civilization:

Inventing Western Civilization Thomas Carl Patterson,1997 In this wonderful book Thomas Patterson effectively dethrones the concept of civilization as an abstract good transcending human society Martin Bernal Drawing on his extensive knowledge of early societies Thomas C Patterson shows how class sexism and racism have been integral to the appearance of civilized societies in Western Europe He lays out clearly and simply how civilization with its designs of civilizing and being civilized has been closely tied to the rise of capitalism in Western Europe and the development of social classes *Inventing Western Civilization* Thomas C. Patterson,1997-01-01 In this wonderful book Thomas Patterson effectively dethrones the concept of civilization as an abstract good transcending human society Martin Bernal Drawing on his extensive knowledge of early societies Thomas C Patterson shows how class sexism and racism have been integral to the appearance of civilized societies in Western Europe He lays out clearly and simply how civilization with its designs of civilizing and being civilized has been closely tied to the rise of capitalism in Western Europe and the development of social classes **The Meaning of Israel** Åsmund Borgen Gjerde,2025-08-01 Why did social democrats in the 1940s and 1950s idealise Zionism and Israel And why did the New Left of the 1960s denounce Israel as an apartheid state and a bridgehead of imperialism The Meaning of Israel Anti Zionism and Philo Zionism in the Postwar Left a case study of Norway offers new and intriguing answers to both questions Previous national case studies of left ideas about Israel have tended to explain with reference to national peculiarities of the country in question e g guilt over the Holocaust in the case of Germany This book by contrast considers its findings about Norway in the context of what we know from other national case studies and uses this approach to suggest explanations that may be valid across national boundaries The Meaning of Israel argues that left ideas about Zionism and Israel have been inextricably intertwined with ideas about civilisation Post war social democrats used ideas about Zionism and Israel to assuage their anxiety about the future of civilisation and to reaffirm the viability of this very concept The anti Zionism of the New Left on the other hand grew out of a broader rejection of ideas of civilisation The book will appeal to academics and general readers interested in the history of the Left Israel and anti semitism **Bodies in Contact** Tony Ballantyne,Antoinette Burton,2005-01-31 This reader on world history emphasizes the centrality of raced sexed and classed bodies as sites on which imperial power was imagined and exercised in order to examine the effects of global politics capital and culture on everyday spaces and local c **War Power, Police Power** Mark Neocleous,2014-02-12 In this the first book to deal with the concepts of war power and police power together Mark Neocleous conducts a critical exploration of the ways in which war power and police power are intertwined in the form of state violence and exercised in social *Whither Ukraine?* Scott A. Jones,2018-05-08 This title was first published in 2002 Examining the development of and rationale behind the Ukrainian export control system this text uses an original theoretically informed case study methodology to explain how and why Ukraine has continued to emphasize the importance of not only maintaining but augmenting its export control

system Furthermore it assesses the utility of four international relations approaches in explaining non proliferation export control development This ground breaking study on Ukrainian politics and economics is ideally suited to audiences of European Ukrainian and US policy makers academics and specialists in security and political economy Western Privilege Amélie Le Renard,2021-09-21 Nearly 90 percent of residents in Dubai are foreigners with no Emirati nationality As in many global cities those who hold Western passports share specific advantages prestigious careers high salaries and comfortable homes and lifestyles With this book Am lie Le Renard explores how race gender and class backgrounds shape experiences of privilege and investigates the processes that lead to the formation of Westerners as a social group Westernness is more than a passport it is also an identity that requires emotional and bodily labor And as they work hook up parent and hire domestic help Westerners chase Dubai s promise of socioeconomic elevation for the few Through an ethnography informed by postcolonial and feminist theory Le Renard reveals the diverse experiences and trajectories of white and non white male and female Westerners to understand the shifting and contingent nature of Westernness and also its deep connection to whiteness and heteronormativity Western Privilege offers a singular look at the lived reality of structural racism in cities of the global South The War Against the Past Frank Furedi,2024-08-20 A war is being waged against the Past Whether it s toppling statues decolonising the curriculum or erasing terms from our vocabulary a cultural crusade is underway designed to render the past toxic It is condemned as enemy territory and has become the target of venomous hate What is at stake in provoking such a strong sense of societal shame towards Western history In this book Frank Furedi mounts a fierce defence of the past and calls for a fight back against the delegitimization of its ideals and accomplishments Casting the past as a story of shame has become a taken for granted outlook permeating the educational and cultural life of western society from the top down Its advocates may see it as a cultural imperative but a society that loses touch with its past will face a permanent crisis of identity Squandering the wisdom provided by our historical inheritance means betraying humanity s positive achievements Challenging this great betrayal Furedi argues is one of the most important battles of our time **Violence and Civilization** Roderick Campbell,2013-12-31 This collection of essays begins with the premise that violence in its relationship to order is a central element of history Taking a broad definition of violence including structural and symbolic violence the contributions move beyond the problematic of civilization s mitigating or foundational role instead seeing violence as inherently social and perhaps socially inherent if variable The question then becomes what forms of harm are authorized or banned in which social orders and how they change over time Beginning with a theoretical introduction this interdisciplinary volume includes seven papers representing cultural anthropology history archaeology and international relations The papers range from China to the Americas and from the 2nd millennium BCE to the 21st century CE Some deal with long term developments while others focus on a single time and place Many treat the issue of the visibility invisibility of violence while all in one way or another deal with the role of violence in the re production of community Together the volume aims to paint with a few strokes the

outlines of a deep historical anthropology of social violence The volume is based on the proceedings of a symposium hosted at Brown University **Understanding Early Civilizations** Bruce G. Trigger, 2003-05-05 This book offers the first detailed comparative study of the seven best documented early civilizations ancient Egypt and Mesopotamia Shang China the Aztecs and adjacent peoples in the Valley of Mexico the Classic Maya the Inka and the Yoruba Unlike previous studies equal attention is paid to similarities and differences in their sociopolitical organization economic systems religion and culture Many of this study's findings are surprising and provocative Agricultural systems technologies and economic behaviour turn out to have been far more diverse than was expected These findings and many others challenge not only current understandings of early civilizations but also the theoretical foundations of modern archaeology and anthropology The key to understanding early civilizations lies not in their historical connections but in what they can tell us about similarities and differences in human behaviour

All Roads Lead to Rome Rhiannon Garth Jones, 2025-05-20 Explore the timeless influence of Rome in this compelling book that reveals how its legacy continues to shape our world today From ancient emperors to modern pop culture the concept of Rome has been a powerful symbol of identity power and legitimacy for over 1 500 years Divided into three themes religion empire and culture this book uncovers the enduring impact of Rome on art politics and society Whether you're interested in history contemporary global issues or simply curious about why Rome remains relevant this book offers a fresh perspective on the lasting significance of one of history's greatest civilizations

The Idea of the West Alastair Bonnett, 2017-04-29 The West is on everyone's lips it is defended celebrated hated But how and why did it emerge And whose idea is it This book is about representations of the West Drawing on sources from across the world from Russia to Japan Iran to Britain it argues that the West is not merely a Western idea but something that many people around the world have long been creating and stereotyping The Idea of the West looks at how the great political and ethnic forces of the last century defined themselves in relation to the West addresses how Soviet communism Asian spirituality Asian values and radical Islamism used and deployed images of the West Both topical and wide ranging it offers an accessible but provocative portrait of a fascinating subject and it charts the complex relationship between whiteness and the West

Europe and the Americas Jeremy Smith, 2006-08-01 This volume takes up current debates in comparative and historical sociology that deal with multiple modernities and civilizations It does

so through an examination of patterns of state formation civilization and the development of capitalism in the interaction of European and American worlds over three centuries The early part of the argument explores cutting edge theoretical debates around the nature of early modern formations *The Fourth Economy* Ron Davison,2011 The simple but sweeping premise of this book is that a fourth entrepreneurial economy is emerging This will be as different from the information economy as that was from the industrial economy before it Last century we popularized knowledge work transforming from an industrial economy dependent on child labor to an information economy dependent on adult education This century we will popularize entrepreneurship changing what it means to be an employee Since medieval times the West has been defined by agricultural industrial and information economies These three economies have transformed religion politics and finance An emerging entrepreneurial economy promises to transform business Perhaps the most interesting prediction is that social invention will be as common for the next generation as technological invention became in the last century *The Fourth Economy* Inventing Western Civilization is a wildly optimistic book that will change how you think about the past and your future Is Science Multicultural? Sandra Harding,1998-02-22 Explores what the last few decades of European American feminist and postcolonial science and technology studies can learn from each other This book proposes new directions for thinking about objectivity method and reflexivity in light of the new understandings developed in the post World War II world **European Regions and Boundaries** Diana Mishkova,Balázs Trencsényi,2017-07-01 It is difficult to speak about Europe today without reference to its constitutive regions supra national geographical designations such as Scandinavia Eastern Europe and the Balkans Such formulations are so ubiquitous that they are frequently treated as empirical realities rather than a series of shifting overlapping and historically constructed concepts This volume is the first to provide a synthetic account of these concepts and the historical and intellectual contexts in which they emerged Bringing together prominent international scholars from across multiple disciplines it systematically and comprehensively explores how such meso regions have been conceptualized throughout modern European history Race and Racism in Modern Philosophy Andrew Valls,2005 An innovative substantial intervention in critical race theory this book brings together an impressive roster of thinkers to trace the question of race in modern philosophical inquiry and explore its influence on contemporary philosophy
