Excellence: Can We Be Equal And Excellent Too? Dr. John W. Gardner, 2015-11-06 This is a book about excellence more particularly about the conditions under which excellence is possible in our kind of society but it is also inevitably a book about equality about the kinds of equality that can and must be honored and the kinds that cannot be forced Such a book must raise some questions which Americans have shown little inclination to discuss rationally What are the characteristic difficulties a democracy encounters in pursuing excellence Is there a way out of these difficulties How equal do we want to be How equal can we be What do we mean when we say Let the best man win Can an equalitarian society tolerate winners Are we overproducing highly educated people How much talent can the society absorb Does society owe a living to talent Does talent invariably have a chance to exhibit itself in our society Does every young American have a right to a college education Are we headed toward domination by an intellectual elite Is it possible for a people to achieve excellence if they don't believe in anything Have the American people lost their sense of purpose and the drive which would make it possible for them to achieve excellence

American Higher Education Transformed, 1940-2005 Wilson Smith, Thomas Bender, 2008-04-11 This long awaited sequel to Richard Hofstadter and Wilson Smith's classic anthology American Higher Education A Documentary History presents one hundred and seventy two key edited documents that record the transformation of higher education over the past sixty years The volume includes such seminal documents as Vannevar Bush's 1945 report to President Franklin D Roosevelt Science the Endless Frontier the U S Supreme Court decisions in Brown v Board of Education and Sweezy v New Hampshire and Adrienne Rich's challenging essay Taking Women Students Seriously The wide variety of readings underscores responses of higher education to a memorable often tumultuous half century Colleges and universities faced a transformation of their educational goals institutional structures and curricula and admission policies the ethnic and economic composition of student bodies an expanding social and gender membership in the professoriate their growing allegiance to and dependence on federal and foundation financial aids and even the definitions and defenses of academic freedom Wilson Smith and Thomas Bender have assembled an essential reference for policymakers administrators and all those interested in the history and sociology of higher education

The Encarta Book of Quotations Bill Swainson, 2000-09-30 Here

are 25 000 quotations drawn from the history politics literature religions science and popular culture of the world ranging from the earliest Chinese sages through Shakespeare to the present day The Good Leader Lee Thayer,2018-05-24 There have been many thousands of books and seminars on the subject of leaders and leadership over the past few decades Most make no effort to explain that leadership is amoral It is a power over others that can be used for good or for ill People are subjected to all kinds of abuse by their leaders organizationally or politically and as children they are being poorly led by their parents and teachers The original concept of leadership was that it would be used for good purposesthat those who purported to be leaders would have virtues that would necessarily be good for the people for their communities and for the larger culture This is obviously no longer the case There has been plenty of talk about successful leaders but successful leaders are not necessarily good leaders Merely making the numbers or being successful in some quantitative way does not imply good leadership This book which has already attracted wide attention because it is so outspoken unpacks the concept of leadership Once one knows how to do this identifying the good from the bad becomes much easier The benefits to all of us as individuals and to the world we all share can be remarkable It is time to stop idolizing our leaders It is time to call them to task It is time to help them become what they should be The Good Leader can do this for them and for you *Dumbing Down America* James R. Delisle,2021-09-03 At a time when the U S education system consistently lags behind its international peers Dumbing Down America shows exactly why America can t keep up by providing a critical look at the nation s schools through the eyes of the children whose minds are languishing in countless classrooms Filled with specific examples of how gifted children are being shortchanged by a nation that believes smart kids will succeed on their own Dumbing Down America packs a powerful message If we want our nation to prosper we must pay attention to its most intelligent youth With more than 35 years of experience working with and for gifted children author James R Delisle provides a template of what can and must happen in America s schools if they are to fulfill their mission of educating every child to the fullest potential Dumbing Down America is a must read for any individual who believes that the unfulfilled promises to gifted children must begin to be met in America s schools today not someday Revisiting EFL Assessment Rahma Al-Mahrooqi,Christine Coombe,Faisal Al-Maamari,Vijay Thakur,2017-01-10 This book examines acknowledged practices and demonstrates to teachers how to make the most out of their assessment practices It also explores different assessment methods for skills such as reading writing listening and speaking Forecasting the future of assessment and where concepts like alternative assessment and dynamic assessment are heading it also shows how relatively new teaching methods such as communicative methodologies and problem based learning are reflected in assessment This book represents a forum where contributors have presented their research and innovative ideas and practices on the important topic of assessment and opened a fresh debate on it It offers an excellent reference guide for EFL teachers practitioners researchers and testing and assessment specialists Each chapter examines central issues in assessment and their connection with teaching and learning
