Airway Smooth Muscle in Health and Disease R.F. Coburn, 2012-12-06 I organized this book because there is a need to put together in book form recent advances in our knowledge of how airway smooth muscle works in health and in disease After a period when it seemed that progress was very slow there has been in the past few years an incredibly rapid gathering of knowledge in this area In particular our understanding has improved regarding the cascades of events that follow the initial binding of agonist to plasma membrane receptors and that lead to the cross bridge movements that determine contraction This advance in our knowledge was stimulated by use of single and whole cell channel recordings of plasma membrane currents and by description of the I₃ receptor GTP binding protein adenylate cyclase cAMP coupling system which serves as a model for other coupling mechanisms The discovery of the receptor activated inositol phospholipid transduction system has greatly stimulated research and led to advances in our understanding of mechanisms involved in smooth muscle contraction Major advances were also triggered by the development of indicators for measuring free cytosolic calcium concentration and starting the unraveling of 2 the events involved in Ca dependent activation of contractile

proteins. Although most of the studies that led to our current understanding of these areas were performed on nonairway smooth muscle, these studies usually add to our understanding of airway smooth muscle and there is an enlarging body of data that have been obtained on airway smooth muscle.

Highlights in Asthmology F.B. Michel, J. Bousquet, P.

Godard, 2012-12-06 F B Michel Asthmology is the neologism I suggested for ideas which were acceptable at the begin the title of a book published in 1981 on the state of the 20th century and in particular bronchial asthma. 4.5 to Pasteur's concept of one cause one illness many syndromes like high blood pressure or asthma are the result of the publications on this subject. It is one of the overlapping of hereditary factors and a few suggestions that I have the weakness to required factors. This is one reason why asthma feel somewhat proud of. In fact this word has had the career I hoped it would and may be not really an illness in the real sense judging by the frequency with which it is of the word but a clinical and functional respiratory syndrome. I used in both written and spoken language it did answer a need I had no intention of. The innate terrain transmitted by suggesting one more neologism but it heredity can possibly concern two factors seemed to me that the word asthmology. The bronchial hyperreactivity factor BHR had an element of novelty and above all is often present in early childhood and its produced the necessary awareness of the reality is a result of the studies of large need to bring together within a kind of groups of homo and heterozygotic twins.
