Horrible Workers Donald A. Nielsen, 2005-01-01 The cultural logic contained within Emile Durkheim's work specifically categories he puts forth in *Suicide* creates the ground for *Horrible Workers*. This book is constructed to allow its readers to study the cases of Max Stirner, Arthur Rimbaud, Robert Johnson and the Charles Manson Circle independently of one another or in a comparative fashion. A Companion to Aesthetics Stephen Davies, Kathleen Marie Higgins, Robert Hopkins, Robert Stecker, David E. Cooper, 2009-04-27 A COMPANION TO AESTHETICS This second edition of *A Companion to Aesthetics* examines questions that were among the earliest discussed by ancient philosophers such as the nature of beauty and the relation between morality and art while also addressing a host of new issues prompted by recent developments in the arts and in philosophy including coverage of non Western art traditions and of everyday and environmental aesthetics. The volume also canvases debates regarding the nature of representation, the relation between art and truth and the criteria for interpretation which are among the most hotly discussed topics in contemporary philosophy. In this extensively revised and updated edition 168 alphabetically arranged articles provide comprehensive treatment of the main topics and writers in aesthetics. Major additions include historical overviews from the prehistoric to the present and a section on the individual arts. *A Companion to Aesthetics* will serve students of philosophy, literary criticism and cultural studies as well as the educated general reader both as a work of reference and with its many substantial essays as a guide to the best thinking about the arts from the ancient Greeks to the dawn of the twenty first century.

The Zen Arts Rupert Cox, 2013-11-05 The tea ceremony and the martial arts are intimately linked in the popular and historical imagination with Zen Buddhism and Japanese culture. They are commonly interpreted as religious/aesthetic pursuits which express core spiritual values through bodily gesture and the creation of highly valued objects. Ideally the experience of practising the Zen arts culminates in enlightenment. This book challenges that long held view and proposes that the Zen arts should be understood as part of a literary and visual history of representing Japanese culture through the arts. Cox argues that these texts and images emerged fully as systems for representing the arts during the modern period produced within Japan as a form of cultural nationalism and outside Japan as part of an orientalist discourse. Practitioners' experiences are in fact rarely referred to in terms of Zen or art but instead are spatially and socially grounded. Combining anthropological description with historical criticism Cox shows that the Zen arts are best understood in terms of a dynamic relationship.

between an aesthetic discourse on art and culture and the social and embodied experiences of those who participate in them
