This book's empirically sound multi-disciplinary approach balances technical, rational and artistic/intuitive design elements to accommodate the complex, fluctuating capacities of human learning. In-depth chapters cover design principles, social and environmental factors in learning, the importance of senses and emotions, and links between body and brain. This bold, unique perspective shift will enrich the work of learning scientists, instructional designers, educational technologists, and beyond. **The Global Classroom** Jeffrey S. Lantis, Leigh A. Poole, 2025-08-06 *The Global Classroom: An Essential Guide to Study Abroad* Second Edition is a unique international studies text that provides students and practitioners with valuable resources for success in education abroad. The *Global Classroom* addresses the challenges and opportunities of study abroad by encouraging participants to think about their personal academic and professional goals during every step of the process. Not only does it address different ways that study abroad has been re-envisioned and strengthened in the post-pandemic world, it is also intentional in its design to speak to a variety of contemporary issues and concerns. For example, the book addresses many different audiences, including appealing to historically marginalized groups about the value of study abroad and addressing the rights of LGBTQ individuals at home and abroad. It explores how social media has changed how we navigate distance in education abroad and a new section offers resources for mental health at home and abroad. Critically, the book also offers practitioners an academic up-to-date core text for pre-departure orientation programs and provides readers with tools to better link student preparation with considerations like safety, risk management, and response. **Diverse Pedagogical Approaches to Experiential Learning, Volume II** Karen Lovett, 2022-02-11 This second volume of *Diverse Pedagogical Approaches to Experiential Learning* (Palgrave, 2020) contains a new collection of experiential learning (EL) reflections, case studies, and strategies written by twenty-eight authors across sixteen academic disciplines. The authors take on new themes in this collection, including discussions on the intersections of experiential learning with race and privilege, cross-cultural competencies, power and gender, professional development, and vocational discernment, self-inquiry, and reflection, social justice, and more.
