Inverse Problems For Partial Differential Equations:

Inverse Problems in Partial Differential Equations David L. Colton, Richard E. Ewing, William Rundell, Society for Industrial and Applied Mathematics, 1990-01-01

Inverse Problems for Partial Differential Equations Victor Isakov, 2006-06-02 A comprehensive description of the current theoretical and numerical aspects of inverse problems in partial differential equations Applications include recovery of inclusions from anomalies of their gravity fields reconstruction of the interior of the human body from exterior electrical ultrasonic and magnetic measurement By presenting the data in a readable and informative manner the book introduces both scientific and engineering researchers as well as graduate students to the significant work done in this area in recent years relating it to broader themes in mathematical analysis

Inverse Problems for Partial Differential Equations Victor Isakov, 1998

Introduction to Inverse Problems for Differential Equations Alemdar Hasanov Hasanoglu, Vladimir G. Romanov, 2021-08-02 This book presents a systematic exposition of the main ideas and methods in treating inverse problems for PDEs arising in basic mathematical models though it makes no claim to being exhaustive Mathematical models of most physical phenomena are governed by initial and boundary value problems for PDEs and inverse problems governed by these equations arise naturally in nearly all branches of science and engineering The book's content especially in the Introduction and Part I is self contained and is intended to also be accessible for beginning graduate students whose mathematical background includes only basic courses in advanced calculus PDEs and functional analysis Further the book can be used as the backbone for a lecture course on inverse and ill posed problems for partial differential equations In turn the second part of the book consists of six nearly independent chapters The choice of these chapters was motivated by the fact that the inverse coefficient and source problems considered here are based on the basic and commonly used mathematical models governed by PDEs These chapters describe not only these inverse problems but also main inversion methods and techniques Since the most distinctive features of any inverse problems related to PDEs are hidden in the properties of the corresponding solutions to direct problems special attention is paid to the investigation of these properties For the second edition the authors have added two new chapters focusing on real world applications of inverse problems arising in wave and vibration phenomena They have also revised the whole text of the first edition

Inverse Problems for Partial Differential Equations Yurii Ya. Belov, 2012-02-14 This monograph is devoted to identification problems of coefficients in equations of mathematical physics It investigates the existence and uniqueness of the solutions for identification coefficient problems in parabolic and hyperbolic equations and equation systems of composite type The problems are studied with the Cauchy data and equations in which the Fourier transform with respect to the chosen variable is supposed to occur Differential properties of the solutions for the original direct problems and their behavior under great values of time are studied on the basis of solution properties for direct problems The identification problems with one or two unknown coefficients are also

investigated For initial boundary value conditions linear and nonlinear parabolic equations are studied **Advances in Inverse Problems for Partial Differential Equations** Dinh-Liem Nguyen, Loc Hoang Nguyen, Thi-Phong Nguyen, 2023-04-12 This volume contains the proceedings of two AMS Special Sessions Recent Developments on Analysis and Computation for Inverse Problems for PDEs virtually held on March 13 14 2021 and Recent Advances in Inverse Problems for Partial Differential Equations virtually held on October 23 24 2021 The papers in this volume focus on new results on numerical methods for various inverse problems arising in electrical impedance tomography inverse scattering in radar and optics problems reconstruction of initial conditions control of acoustic fields and stock price forecasting The authors studied iterative and non iterative approaches such as optimization based globally convergent sampling and machine learning based methods The volume provides an interesting source on advances in computational inverse problems for partial differential equations Inverse Problems for Partial Differential Equations Viktor Isakov, 2006 **Inverse Problems for Partial Differential Equations** Yu. Ya Belov, 2002 This monograph is devoted to identification problems of coefficients in equations of mathematical physics It investigates the existence and uniqueness of the solutions for identification coefficient problems in parabolic and hyperbolic equations and equation systems of composite type The problems are studied with the Cauchy data and equations in which the Fourier transform with respect to the chosen variable is supposed to occur Differential properties of the solutions for the original direct problems and their behavior under great values of time are studied on the basis of solution properties for direct problems The identification problems with one or two unknown coefficients are also investigated For initial boundary value conditions linear and nonlinear parabolic equations are studied Control And Inverse Problems For Partial Differential Equations Gang Bao, Jean-michel Coron, Tatsien Li, 2019-04-03 This book is a collection of lecture notes for the LIASFMA Hangzhou Autumn School on Control and Inverse Problems for Partial Differential Equations which was held during October 17 22 2016 at Zhejiang University Hangzhou China This autumn school is one of the activities organized by Sino French International Associate Laboratory in Applied Mathematics LIASFMA Established jointly by eight institutions in China and France in 2014 LIASFMA aims at providing a platform for many leading French and Chinese mathematicians to conduct in depth researches extensive exchanges and student training in broad areas of applied mathematics The book provides the readers with a unique and valuable opportunity to learn from and communicate with leading experts in control and inverse problems And the readers are exposed not only to the basic theories and methods but also to the forefront of research directions in both fields Inverse Problems in Partial Differential Equations Wenhuan Yu, 1991 Partial Differential Equations and Inverse Problems Carlos Conca, 2004 This proceedings volume is a collection of articles from the Pan American Advanced Studies Institute on partial differential equations nonlinear analysis and inverse problems held in Santiago Chile Interactions among partial differential equations nonlinear analysis and inverse problems have produced remarkable developments over the last couple of decades

This volume contains survey articles reflecting the work of leading experts who presented minicourses at the event Contributors include J Busca Y Capdeboscq M S Vogelius F A Grunbaum L F Matusevich M de Hoop and P Kuchment The volume is suitable for graduate students and researchers interested in partial differential equations and their applications in nonlinear analysis and inverse problems Inverse Problems for Fractional Partial Differential Equations Barbara Kaltenbacher, William Rundell, 2023 As the title of the book indicates this is primarily a book on partial differential equations PDEs with two definite slants toward inverse problems and to the inclusion of fractional derivatives The standard paradigm or direct problem is to take a PDE including all coefficients and initial boundary conditions and to determine the solution The inverse problem reverses this approach asking what information about coefficients of the model can be obtained Some Inverse Problems in Partial Differential Equations University of Minnesota. Institute for Mathematics and Its Applications, Gang Bao, 1994 **Inverse Problems for Partial Differential Equations** University of Guelph.
