The Labour Movement in Britain from Thatcher to Blair Keith Barlow,Geoffrey Keith Barlow,2008 British economic and industrial policy since 1979 is examined using a wide range of sources Was this really new revival of earlier approaches or a rigorous extension of the IMF imposed policies on the 1974 79 Labour Government The question is asked Was the creation of a large pool of unemployed labour necessary for reshaping the economy or was the aim to secure fundamental changes in the relations between capital and organised labour Due to setbacks suffered by trade unions in the 1980s with factory closures and major job losses the author questions Labour s motives in softening any meaningful opposition to the Conservatives supporting ERM in 1990 reducing the role of trade unions in the Party itself and retaining key policies of the Thatcher era especially its trade union laws

and International Labour Standards in Its External Trade Relations Samantha Velluti, 2020-10-12 This book represents a significant and timely contribution to the copious literature of the EU as a global actor providing new insights and fresh perspectives into the promotion of human rights and international labour standards in the EU's external trade relations building on and stimulating further the already well engaged scientific dialogue on this area of research In particular it provides the basis for developing a new analytical structure for better understanding the role of the EU in promoting human rights and international labour standards in global trade and in particular for assessing the extent to which and how normative considerations have influenced the adoption of EU legal instruments and policy decisions This book will appeal to research scholars post graduate students practitioners and human rights activists **Landmark Cases in EU Law, Volume 2** Paul Craig, Robert Schütze, 2025-07-10 From Van Gend en Loos and Costa v ENEL to Cassis de Dijon and Consten and Grundig Landmark Cases in EU Law explores the most important and well known EU law cases in two volumes These volumes show how the European Court of Justice has played a fundamental role in the construction of the European Union in the past 70 years Many EU landmark cases have been controversial yet no one can deny that they have been essential in defining the Union legal order as we find it today Volume 2 explores the substantive cases that have shaped the Union's internal market its competition law as well as its internal and external policies Each of the twenty cases within this volume is placed in its historical and doctrinal context and each chapter also presents the history of its reception by the Court and academia EU Law and Private International Law Jan-Jaap Kuipers, 2011-11-25 European Union Law and Private International Law both attempt to resolve a conflict of laws There is however a certain tension between the two disciplines The present book proposes suggestions to enhance their mutual understanding The Legal Construction of Personal Work Relations Mark Robert Freedland, Nicola Kountouris, 2011-12-15 This book explores the conceptual framework of European employment law focusing on understanding the law's construction of employment relationships The book draws on extensive comparative research of the legal architecture of employment relations in national legal systems and EU law to analyse the traditional model of the contract of employment and the difficulties of using the traditional model to frame modern working relationships The authors then present a new model of the foundations of employment relationships based on the concept of a personal work nexus and explore the potential of their model to shape the future development of employment law Throughout the book the authors analyse the interaction of domestic and EU employment law and discuss the possibility of future legal harmonisation in the area They conclude by exploring the potential for a common framework for European employment law in the context of broader debates surrounding the harmonisation of European private law Teoria e prassi delle relazioni industriali Iacopo Senatori, 2008
