Evaluating Social Science Research:

Evaluating Social Science Research Thomas R. Black, 1993-11-22 This volume offers students a basic introduction to assessing the meaning and validity of research in the social sciences and related fields The ability to read published research critically is essential and is different from the skills involved in undertaking research using statistical analysis Thomas R Black explains in clear and straightforward terms how students can evaluate research with particular emphasis on research involving some aspect of measurement The coverage of fundamental concepts is comprehensive and supports topics including research design data collection and data analysis by addressing the following major issues Are the questions and hypotheses advanced appropriate and testable Is the research design sufficient for the hypothesis Are the data gathered valid reliable and objective Are the statistical techniques used to analyze the data appropriate and do they support the conclusions reached

Evaluating Information Jeffrey Katzer, Kenneth H. Cook, Wayne W. Crouch, 1978 This book introduces students to social science research from the consumer's point of view The authors believe that while social science may not require that every student of the discipline will have to conduct research studies it is still essential for students to successfully read understand and evaluate the research published in their field To that end the authors of this text have streamlined their narrative omitting the burden of technical jargon and focusing on the broad elements common to all kinds of social science research such as experimental survey and case study Questions to Ask found at the end of each chapter highlight the specific criteria to consider when evaluating research and offer a clear and accessible presentation of the general principles in social science research

The Evaluation of Research in Social Sciences and Humanities Andrea Bonaccorsi, 2018-01-04 This book examines very important issues in research evaluation in the Social Sciences and Humanities It is based on recent experiences carried out in Italy 2011 2015 in the fields of research assessment peer review journal classification and construction of indicators and presents a systematic review of theoretical issues influencing the evaluation of Social Sciences and Humanities Several chapters analyse original data made available through research assessment exercises Other chapters are the result of dedicated and independent research carried out in 2014 2015 aimed at addressing some of the debated and open issues for example in the evaluation of books the use of Library Catalog Analysis or Google Scholar the definition of research quality criteria on internationalization as well as opening the way to innovative indicators The book is therefore a timely and important contribution to the international debate

Evaluating Social Science Research Paul C. Stern, Linda Kalof, Professor of Sociology and Director of the Animal Studies Program Linda Kalof, 1996 We often decide what to believe and what to question on the basis of a simple rule of thumb like believe the trustworthy source or trust the expert Sometimes however reliable and well informed sources support both sides of the controversy Whom are we to trust How can we make a decision on the issue at hand The second edition of *Evaluating Social Science Research* provides methods for thinking critically about claims of factual knowledge and drawing appropriate conclusions The authors have added new sections to the

book to reflect the new developments in the field since the appearance of the first edition sixteen years ago Included is an expanded discussion of observational method that addresses the issues of validity that are now more clearly understood There is an explicit discussion of quasi experimental research design including an added distinction between equivalent group and nonequivalent group experiments New explanations of the logic of multiple regression analysis casual modeling and meta analysis have been provided as well The new edition while recognizing the limits of each research method retains its emphasis on the importance of observations that may be repeated and checked by other researchers It treats the reader as a key actor who can advance knowledge by cross checking observations and interpretations

Evaluating and Valuing in Social Research Thomas A. Schwandt, Emily F. Gates, 2021-09-17 Much applied research takes place as if complex social problems and evaluations of interventions to address them can be dealt with in a purely technical way In contrast this groundbreaking book offers an alternative approach that incorporates sustained systematic reflection about researchers values what values research promotes how decisions about what to value are made and by whom and how judging the value of social interventions takes place The authors offer practical and conceptual guidance to help researchers engage meaningfully with value conflicts and refine their capacity to engage in deliberative argumentation Pedagogical features include a detailed evaluation case Bridge to Practice exercises and annotated resources in most chapters and an end of book glossary

Evaluating Social Programs and Problems Stewart I. Donaldson, Michael Scriven, 2003-01-30 This book presents visions of how to solve social problems in the 21st century and how programs SHOULD be evaluated not how they will be evaluated

Handbook on Research Assessment in the Social Sciences Engels, Tim C.E., Kulczycki, Emanuel, 2022-04-19 This Handbook provides a comprehensive overview of current developments issues and good practices regarding assessment in social science research It pays particular attention to the challenges in evaluation policies in the social sciences as well as to the specificities of publishing in the area

Evaluating Social Science Research Paul C. Stern, 1979 We often decide what to believe and what to question on the basis of a simple rule of thumb like believe the trustworthy source or trust the expert Sometimes however reliable and well informed sources support both sides of the controversy Whom are we to trust How can we make a decision on the issue at hand The second edition of Evaluating Social Science Research provides methods for thinking critically about claims of factual knowledge and drawing appropriate conclusions The authors have added new sections to the book to reflect the new developments in the field since the appearance of the first edition sixteen years ago Included is an expanded discussion of observational method that addresses the issues of validity that are now more clearly understood There is an explicit discussion of quasi experimental research design including an added distinction between equivalent group and nonequivalent group experiments New explanations of the logic of multiple regression analysis casual modeling and meta analysis have been provided as well The new edition while recognizing the limits of each research method retains its emphasis on the importance of observations that may be repeated

and checked by other researchers It treats the reader as a key actor who can advance knowledge by cross checking observations and interpretations *Academic Literacy in the Social Sciences* Judy Eaton,David N. Morris,2019-03-13

Academic Literacy in the Social Sciences is a practical introductory guide that supports students through the process of understanding and critically evaluating research in the Social Sciences This essential text develops and strengthens students ability to develop research paper topics conduct thorough literature searches critically evaluate research and effectively summarize and share information The textbook is broken down into ten chapters focusing on topics such as theory and research methods in the social sciences citing APA style ethics and integrity and statistics This is an ideal resource for all students in undergraduate courses based in the social sciences [Encyclopedia of Public Administration and Public Policy: K-Z](#) Jack Rabin,2003

From the Nuremberg trials to the Civil Service Reform Act of 1978 to recent budget reconciliation bills the *Encyclopedia of Public Administration and Public Policy* provides detailed coverage of watershed policies and decisions from such fields as privatization biomedical ethics education and diversity This second edition features a wide range of new topics including military administration government procurement social theory and justice administration in developed democracies It also addresses current issues such as the creation of the Department of Homeland Security and covers public administration in the Middle East Africa Southeast Asia the Pacific and Latin America **Understanding Social Science Research** Thomas R Black,2002

The ability to read published research critically is essential and is different from the skills involved in undertaking research using statistical analysis This New Edition of Thomas R Black s best selling text explains in clear and straightforward terms how students can evaluate research with particular emphasis on research involving some aspect of measurement The coverage of fundamental concepts is comprehensive and supports topics including research design data collection and data analysis by addressing the following major issues Are the questions and hypotheses advanced appropriate and testable Is the research design sufficient for the hypothesis Is the data gathered valid reliable and objective Are the statistical techniques used to analyze the data appropriate and do they support the conclusions reached Each of the chapters from the New Edition has been thoroughly updated with particular emphasis on improving and increasing the range of activities for students As well coverage has been broadened to include a wider range of research designs a section on research ethics item analysis the definition of standard deviation with a guide for calculation the concept of power in statistical inference calculating correlations and a description of the difference between parametric and non parametric tests in terms of research questions *Evaluating Social Science Research An Introduction* 2nd Edition will be key reading for undergraduate and postgraduate students in research methodology and evaluation across the social sciences [Encyclopedia of Public Administration and Public Policy - 5 Volume Set](#) Domonic A. Bearfield,Evan Berman,Melvin J. Dubnick,2020-08-14

Now in its third edition *Encyclopedia of Public Administration and Public Policy* remains the definitive source for article length presentations spanning the fields of public administration and public policy It includes entries for Budgeting

Bureaucracy Conflict resolution Countries and regions Court administration Gender issues Health care Human resource management Law Local government Methods Organization Performance Policy areas Policy making process Procurement State government Theories This revamped five volume edition is a reconceptualization of the first edition by Jack Rabin It incorporates over 225 new entries and over 100 revisions including a range of contributions and updates from the renowned academic and practitioner leaders of today as well as the next generation of top scholars The entries address topics in clear and coherent language and include references to additional sources for further study *Foundations of Program Evaluation* William R. Shadish, Thomas D. Cook, Laura C. Leviton, 1991 This book looks back at the origins of program evaluation By summarizing comparing and contrasting the work of seven major theorists of program evaluation it provides an important perspective on the current state of evaluation theory and provides suggestions for improving its practice **Some useful methods for measuring the benefits of social science research** Kilpatrick, Henry E., Jr., 1998-10-12 What are the returns to policy oriented research in the social sciences One presumes that the positive net benefits to society or at least a certain segment of society would be treated as returns but how does one determine what these benefits are Clearly benefits to some social science research are available because society continued to fund it albeit at different levels in different locations and times This paper cannot fully answer the questions of what it is we seek to measure in any empirical sense although it will discuss this issue The returns in the marketplace for social science research are those that exist in the eye of the customer who bears the cost of the research This paper's primary goal is to offer the client some ways of measuring these returns It does this with particular emphasis on methods that are often overlooked even though some of them have been available to the analyst for decades It also explains some of the costs and benefits of each method and explains how some of them may be used together in order to achieve a higher level of efficacy in measurement **Handbook of Complementary Methods in Education Research** Judith L. Green, Judith Green, Gregory Camilli, Patricia B. Elmore, Patricia Elmore, 2012-01-04 Published for the American Educational Research Association by Routledge The Handbook of Complementary Methods in Education Research is a successor volume to AERA's earlier and highly acclaimed editions of Complementary Methods for Research in Education More than any book to date including its predecessors this new volume brings together the wide range of research methods used to study education and makes the logic of inquiry for each method clear and accessible Each method is described in detail including its history its research design the questions that it addresses ways of using the method and ways of analyzing and reporting outcomes Key features of this indispensable book include the following Foundations Section Part I is unique among research books Its three chapters examine common philosophical epistemological and ethical issues facing researchers from all traditions and frames ways of understanding the similarities and differences among traditions Together they provide a tripartite lens through which to view and compare all research methods Comprehensive Coverage Part II the heart of the book presents 35 chapters on research design and

analysis Each chapter includes a brief historical overview of the research tradition examines the questions that it addresses and presents an example of how the approach can be used Programs of Research Part III examines how research programs connected to eight specific lines of inquiry have evolved over time These chapters examine phenomena such as classroom interaction language research issues of race culture and difference policy analysis program evaluation student learning and teacher education Complementary Methods As the title suggests a central mission of this book is to explore the compatibility of different research methods Which methods can be productively brought together and for what purposes How and on what scale can they be made compatible and what phenomena are they best suited to explore Flexibility The chapters in Parts II and III are largely independent Therefore selected portions of the book can be used in courses devoted to specific research methods and perspectives or to particular areas of education Likewise established researchers interested in acquiring new techniques or greater expertise in a given methodology will find this an indispensable reference volume This handbook is appropriate for any of the following audiences faculty teaching and graduate students studying education research education researchers and other scholars seeking an accessible overview of state of the art knowledge about specific methods policy analysts and other professionals needing to better understand research methods and academic and research libraries serving these audiences

Evaluating AIDS Prevention Programs National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on AIDS Research and the Behavioral, Social, and Statistical Sciences, Panel on the Evaluation of AIDS Interventions, 1991-02-01 With insightful discussion of program evaluation and the efforts of the Centers for Disease Control this book presents a set of clear cut recommendations to help ensure that the substantial resources devoted to the fight against AIDS will be used most effectively This expanded edition of *Evaluating AIDS Prevention Programs* covers evaluation strategies and outcome measurements including a realistic review of the factors that make evaluation of AIDS programs particularly difficult Randomized field experiments are examined focusing on the use of alternative treatments rather than placebo controls The book also reviews nonexperimental techniques including a critical examination of evaluation methods that are observational rather than experimental a necessity when randomized experiments are infeasible

Assessing the Quality of Educational Research in Higher Education ,2019-02-11 Tina Besley has edited this collection which examines and critiques the ways that different countries particularly Commonwealth and European states assess the quality of educational research in publicly funded higher education institutions Such assessment often ranks universities departments and even individual academics and plays an important role in determining the allocation of funding to support university research Yet research is only one aspect of academic performance alongside teaching and service or administration components The book focuses on

the theoretical and practical issues that accompany the development of national and international systems of research assessment particularly in the field of education In our interconnected globalised world some of the ideas of assessment that have evolved in one country have almost inevitably travelled elsewhere especially the UK model Consequently the book comprises an introduction eighteen chapters that discuss the situation in ten countries followed by a postscript It gathers together an outstanding group of twenty five prominent international scholars with expertise in the field of educational research and includes many with hands on experience in the peer review process The book is designed to appeal to a wide group of people involved as knowledge workers and knowledge managers academics students and policy makers in higher education and interested in assessment and accountability mechanisms and processes
