European Social Science in Transition Meinolf Dierkes,1992 **European Social Science in Transition** Meinolf Dierkes,Bernd Biervert,1992-01-01 European Social Science in Transition Meinolf Dierkes,Bernd Biervert,1992 **The Making of the European Union** Max Haller,2012-12-06 Outstanding social scientists economists sociologists political scientists and policy researchers discuss in this book the issue of the social aspects of European integration For each field they sketch out the main problems provide a survey on the relevant literature and point to areas wherein more research is needed The science and research policy of the European Union is examined critically both in terms of relevant social issues and in terms of its organizational efficacy **Social Science** Gerard Delanty,1997 It is argued that the conception of social science emerging today is one that involves a synthesis of radical constructivism and critical realism The crucial challenge facing social science is a question of its public role growing reflexivity in society has implications for the social production of knowledge and is bringing into question the separation of expert systems from other forms of knowledge IBSS: Sociology: 1993 Vol 43 International Committee for Social Science Information and Documentation,1994 This bibliography lists the most important works published in sociology in 1993 Renowned for its international coverage and rigorous selection procedures the IBSS provides researchers and librarians with the most comprehensive and scholarly bibliographic service available in the social sciences The IBSS is compiled by the British Library of Political and Economic Science at the London School of Economics one of the world s leading social science institutions Published annually the IBSS is available in four subject areas anthropology economics political science and sociology *Social Science* Delanty, Gerard,2005-06-01 What is social science Does social scientific knowledge differ from other kinds of knowledge such as the natural sciences and common sense What is the relation between method and knowledge This concise and accessible book provides a critical discussion and comprehensive overview of the major philosophical debates on the methodological foundations of the social sciences From its origins in the sixteenth century when a new system of knowledge was created around the idea of modernity the author shows how the philosophy of social science developed as a reflection on some of the central questions in modernity Visions of modernity have been reflected in the self understanding of the social sciences From the positivist dispute on explanation vs understanding to controversies about standpoint to debates about constructivism and realism Delanty outlines the major shifts in the philosophy of social science He argues that social science is an intellectual framework for the transformation of the social world The new edition is updated and expanded throughout with the latest developments in the field including a new chapter on feminist standpoint epistemology and additional material on neo positivism pragmatism and reflexivity This is one of the most ambitious and wide ranging texts in recent years on debates on method and the contemporary situation of social science It is of interest to undergraduate students and postgraduates as well as to professional researchers with an interest in the philosophy of the social sciences and social theory **European societies** Steffen Mau,Roland

Verwiebe,2010-10-08 This comprehensive textbook provides a thorough analysis of the nature of European societies across the expanded EU member states Using a wealth of data the authors compare the different dimensions of the territorial and social order of Europe and address a range of issues relating to Europeanisation and key topics such as inequality migration poverty population and family the labour market and education Presented in a student friendly way this book also helps unravel people s attitudes towards Europe European integration and citizens of other European countries It will be an essential read for under and post graduate students and academics of sociology European studies social stratification social policy and political sciences Tracing the Life Cycle of Ideas in the Humanities and Social Sciences Arjuna

Tuzzi,2018-10-30 This book demonstrates how quantitative methods for text analysis can successfully combine with qualitative methods in the study of different disciplines of the Humanities and Social Sciences HSS The book focuses on learning about the evolution of ideas of HSS disciplines through a distant reading of the contents conveyed by scientific literature in order to retrieve the most relevant topics being debated over time Quantitative methods statistical techniques and software packages are used to identify and study the main subject matters of a discipline from raw textual data both in the past and today The book also deals with the concept of quality of life of words and aims to foster a discussion about the life cycle of scientific ideas Textual data retrieved from large corpora pose interesting challenges for any data analysis method and today represent a growing area of research in many fields New problems emerge from the growing availability of large databases and new methods are needed to retrieve significant information from those large information sources This book can be used to explain how quantitative methods can be part of the research instrumentation and the toolbox of scholars of Humanities and Social Sciences The book contains numerous examples and a description of the main methods in use with references to literature and available software Most of the chapters of the book have been written in a non technical language for HSS researchers without mathematical computer or statistical backgrounds **Nature: Reconfiguring the**

social David Inglis,John Bone,Rhoda Wilkie,2005 Many influential stances within the social sciences regard nature in one of two ways either as none of their concern which is with the social and cultural aspects of human existence or as wholly a social and cultural fabrication But there is also another strand of social scientific thinking that seeks to understand the interplay between social and cultural factors on one side and natural factors on the other These volumes contain the main contributions that have been made within each of these streams of thought The selections illustrate to the reader the complexity of the various positions within these streams and the strengths and limitations of each perspective A new introduction places these articles in their historical and intellectual context and the volumes are completed with an extensive index and chronological table of contents *Cosmopolitan Europe* Ulrich Beck,Edgar Grande,2014-11-05 Europe is Europe s last remaining realistic political utopia But Europe remains to be understood and conceptualized This historically unique form of international community cannot be explained in terms of the traditional concepts of politics and the state which

remain trapped in the straightjacket of methodological nationalism. Thus if we are to understand cosmopolitan Europe we must radically rethink the conventional categories of social and political analysis. Just as the Peace of Westphalia brought the religious civil wars of the seventeenth century to an end through the separation of church and state, so too the separation of state and nation represents the appropriate response to the horrors of the twentieth century. And just as the secular state makes the exercise of different religions possible, so too cosmopolitan Europe must guarantee the coexistence of different ethnic, religious, and political forms of life across national borders based on the principle of cosmopolitan tolerance. The task the authors have set themselves in this book is nothing less than to rethink Europe as an idea and a reality. It represents an attempt to understand the process of Europeanization in light of the theory of reflexive modernization and thereby to redefine it at both the theoretical and the political level. This book completes Ulrich Beck's trilogy on cosmopolitan realism, the volumes of which complement each other and can be read independently. It is essential reading for anyone interested in the key social and political developments of our time.

The Critique of the State Jens Bartelson, 2001-11. What kind of political order would there be in the absence of the state? Jens Bartelson argues that we are currently unable to imagine what might lurk beyond because our basic concepts of political order are conditioned by our experience of statehood. In this study he investigates the concept of the state historically as well as philosophically, considering a range of thinkers and theories. He also considers the vexed issue of authority: modern political discourse questions the form and content of authority but makes it all but impossible to talk about the foundations of authority. Largely due to the existing practices of political and scientific criticism, authority appears to be unquestionable. Bartelson's wide-ranging and readable discussion of the suppositions and presuppositions of statehood will be of interest to scholars and upper-level students of political theory and social theory and philosophy of social science.

Global Competitiveness and Innovation G. Clark, P. Tracey, 2004-02-27. The key arguments and debates about globalization have raised searching questions about the significance of national and regional borders for the competitive strategies of individuals, firms, and industries. *Global Competitiveness and Innovation* seeks to address these issues by exploring four key topics: the status of economic agents in the emerging global economy; the limits of path dependence and the scope of agent action; the relationship between agents' decision making and their environments; and agents' learning capacities in a world of information and knowledge creation.

Social Studies of Science and Technology: Looking Back, Ahead B. Joerges, H. Nowotny, 2012-12-06. BERNWARD JOERGES AND HELGA NOWOTNY. YET ANOTHER TURN. The thing that doesn't fit is the thing that's most interesting: Richard Feynman. This volume was originally conceived as a contribution to yet another turn, not captured by one of the many adjectives that have served to describe the collective meandering of the scholarly community in search of direction. It was meant to mark the millennial turn, a seemingly purely chronological event but one in search for great meanings and invested with loaded significances. The editors wanted to seize the opportunity of the moment in order to pause and reflect on the sociology and history of social

studies of science and technology The moment came and went and the new millennium barely nine months later thrust its historical marker upon the world through a horrendous and cruel shock in an unforeseen and unforeseeable way Since then the world appears more vulnerable and volatile fragmented and fraught with uncertainty The universal values as bequeathed by the Enlightenment are either refused or appear refuted The dream of a universal civilization which has accompanied the unfolding of the existing multiple modernities in their historically unique trajectories has been discarded and its promises in tatters

The Sociology of Time Jiří Šubrt, 2021-10-26 In a critical comparative study of the sociological literature this book explores the term time and the various interconnections between time and a broad cluster of topics that create a conceptual labyrinth Various understandings of time manifest themselves in the context of many individual social problems there is no single vision in sociology of how to grasp time and address within social theory This book therefore attempts to define an approach to the concept of time and its associated terms duration temporality acceleration compression temporal structures change historical consciousness and others The volume is guided by a critical engagement with three main questions a the formation of human understanding of time b the functioning of temporal structures at different levels of social reality c the role and place of time in general sociological theory

Integrative Systems Approaches to Natural and Social Dynamics M. Matthies, H. Malchow, J. Kriz, 2012-12-06 At the start of the new millennium mankind is challenged by a paradox the greater the apparent knowledge becomes the greater the uncertainty in understanding and predicting how the world works appears This book presents the outline of a new basis of Systems Science and a methodology for its applications in complex environmental economic social and technological systems

Spatial Inequality and Development Ravi Kanbur, Anthony J. Venables, 2005-02-03 What exactly is spatial inequality Why does it matter And what should be the policy response to it These questions have become important in recent years as the spatial dimensions of inequality have begun to attract considerable policy interest In China Russia India Mexico and South Africa as well as most other developing and transition economies spatial and regional inequality of economic activity incomes and social indicators is on the increase Spatial inequality is a dimension of overall inequality but it has added significance when spatial and regional divisions align with political and ethnic tensions to undermine social and political stability Also important in the policy debate is a perceived sense that increasing internal spatial inequality is related to greater openness of economies and to globalization in general Despite these important concerns there is remarkably little systematic documentation of what has happened to spatial and regional inequality over the last twenty years Correspondingly there is insufficient understanding of the determinants of internal spatial inequality This volume attempts to answer the questions posed above drawing on data from twenty five countries from all regions of the world They bring together perspectives and expertise in development economics and in economic geography and form a well researched introduction to an area of growing analytical and policy importance

Discourse and Knowledge Piet Strydom, 2000-11-01 By closely analysing the contributions of such theorists as More

Hobbes Vico Montesquieu Ferguson and Millar to the emergence of sociology in its original form Piet Strydom follows the discursive construction of sociology in the context of the society wide early modern practical discourse about violence and rights Parallels with the nineteenth and twentieth century discourse on poverty and justice and the contemporary discourse of risk and responsibility allow the author to reflect not only on the generation of knowledge through discourse but also on the role that sociology itself plays in this process

The State of Political Science in Western Europe Hans-Dieter Klingemann, 2007-03-20 This volume is the definite statement on the current state of political science as a discipline in Western Europe Detail four chapters portray European developments To know about the historical development the organization of teaching and research professional communication and the chances of students of political science in the job market is of essential importance to political scientists university administrators and policy makers national European and global This is particularly true after the Bologna Declaration when universities across Europe were asked to adopt 1 a system of easily readable and comparable degrees 2 a system based on two cycles 3 the establishment of a common system of credits 4 to increase student and teacher mobility 5 to assure quality standards and 6 to improve the European dimension in teaching The book informs on these general issues and reports country specific developments

Exploration and Contestation in the Study of World Politics Peter J. Katzenstein, Robert Owen Keohane, Stephen D. Krasner, 1999 New insights into the interplay between conflict and cooperation the impact of domestic political structures on foreign policy the role of institutions and the influence of worldviews and causal beliefs on decision making
