Impact Evaluation of Infrastructure Interventions Henrik Hansen,Ole Winckler Andersen,Howard White,2013-09-13 The focus on results in development agencies has led to increased focus on impact evaluation to demonstrate the effectiveness of development programmes This book illustrates the broad range of methods available for counterfactual analysis of infrastructure programmes such as establishment rehabilitation and maintenance of roads water supply and electrical power plants and grids Understanding the impact of interventions requires understanding of the context in which the intervention takes place and the channels through which it is expected to occur For infrastructure interventions it is particularly important to identify the links between the input and the outcomes and impacts because the well being of people the ultimate impact does not change directly as a consequence of the intervention Therefore impact evaluation of infrastructure programmes typically requires mixing both quantitative and qualitative approaches as illustrated in many of the contribution to this edited volume This book was originally published as a special issue of the Journal of Development Effectiveness *Program Evaluation Theory and Practice* Donna M. Mertens,Amy T. Wilson,2012-02-20 This engaging text takes an evenhanded approach to major theoretical paradigms in evaluation and builds a bridge from them to evaluation practice Featuring helpful checklists procedural steps provocative questions that invite readers to explore their own theoretical assumptions and practical exercises the book provides concrete guidance for conducting large and small scale evaluations Numerous sample studies many with reflective commentary from the evaluators reveal the process through which an evaluator incorporates a paradigm into an actual research project The book shows how theory informs methodological choices the specifics of planning implementing and using evaluations It offers balanced coverage of quantitative qualitative and mixed methods approaches Useful pedagogical features include Examples of large and small scale evaluations from multiple disciplines Beginning of chapter reflection questions that set the stage for the material covered Extending your thinking questions and practical activities that help readers apply particular theoretical paradigms in their own evaluation projects Relevant Web links including pathways to more details about sampling data collection and analysis Boxes offering a closer look at key evaluation concepts and additional studies Checklists for readers to determine if they have followed recommended practice A companion website with resources for further learning

document the effectiveness of local development efforts The types of documentation differ by types of project jurisdiction and country but they have a common focus of recognizing the importance of the Community Capitals framework Public agencies in the past have often measured development successes by the number of jobs created and or amount of private investment forthcoming However the impacts of community development reach much deeper than those indicators Strengthening local decision making capacity is a common component of development efforts as is engaging populations that in the past have not been active in decision making These and other considerations are explored in more detail by authors in this volume Local policymakers and practitioners will be continually pressured to provide more documentation of outcomes and readers will gain considerable insights into alternative approaches that can be included in projects but can also see the common elements needed to create a solid measurement system International insights are a special strength of the discussions in this book This book was published as a special issue of Community Development
