emphasise assessment in the service of prevention of teaching and of mainstreaming and integration It is not enough to understand children s individual strengths and weaknesses The primary objective of assessment is to guide intervention and for that purpose it must have a broader focus and not concentrate exclusively on the target individuals who appear to have disabilities or learning difficulties the learning environment is equally important as a focus for assessment The book is divided into three sections that explore three broad themes empowering children and parents during the assessment process designing assessment so that it supports the integration and mainstreaming of children rather than their segregation and making improvements through specific approaches to assessment

Instructional Models in Reading Steven A. Stahl,David A. Hayes,2013-04-03 This book started with a simple idea examine models of reading instruction that have emerged during the past 20 years These models span a wide range of instruction representing a continuum from highly structured task analytic instruction to child centered and holistic instruction Each model has its own epistemology or views on how reading and instruction are to be defined The different epistemologies indicate different principles of instruction which in turn indicate different practices in the classroom Each model is also supported by a different research base In this volume leading proponents of these different models discuss their ideas about reading instruction thereby encouraging readers to make their own comparisons and contrasts The chapter authors seem to adopt the editors eclectic approach to some greater or lesser extent incorporating aspects of other models into their instruction as they see other goals Thus models of reading instruction are complex Complicating matters further is the fact that teachers hold their own models of reading which may or may not be congruent with those discussed here Although academically developed models influence college preservice and in service instruction teachers own models of reading filter the information that they take from what they learn from these perspectives By carefully examining these variables this book makes a firm contribution toward disciplined inquiry into what it means to teach reading
