Jodrell Bank Telescopes:

The Jodrell Bank Telescopes Bernard Lovell, 1984 **Out of the Zenith** Bernard Lovell, 1974 Observatories and Telescopes of Modern Times David Leverington, 2017 Radio Observatory and Telescope Index General Index Astronomical Observations Erik Gregersen Associate Editor, Astronomy and Space Exploration, 2009-12-20 Presents an overview of the history of astronomy discusses the tools and technology associated with it profiles noted astronomers and explores the effect of expanding astronomical knowledge on modern society **The Story of Jodrell Bank** Bernard Lovell, 1968 *Science and Spectacle* John Agar, 2014-02-04 Science and Spectacle relates the construction of the telescope to the politics and culture of post war Britain From radar and atomic weapons to the Festival of Britain and later Harold Wilson's rhetoric of scientific revolution science formed a cultural resource from which post war careers and a national identity could be built The Jodrell Bank Radio Telescope was once a symbol of British science and a much needed prestigious project for the Department of Scientific and Industrial Research but it also raised questions regarding the proper role of universities as sites for scientific research **Radio Telescope Reflectors** Jacob W.M. Baars, Hans J Kärcher, 2017-11-18 This book demonstrates how progress in radio astronomy is intimately linked to the development of reflector antennas of increasing size and precision The authors describe the design and construction of major radio telescopes as those in Dwingeloo Jodrell Bank Parkes Effelsberg and Green Bank since 1950 up to the present as well as millimeter wavelength telescopes as the 30m MRT of IRAM in Spain the 50m LMT in Mexico and the ALMA submillimeter instrument The advances in methods of structural design and coping with environmental influences wind temperature gravity as well as application of new materials are explained in a non mathematical descriptive and graphical way along with the story of the telescopes Emphasis is placed on the interplay between astronomical and electromagnetic requirements and structural mechanical and control solutions A chapter on management aspects of large telescope projects closes the book The authors address a readership with interest in the progress of engineering solutions applied to the development of radio telescope reflectors and ground station antennas for satellite communication and space research The book will also be of interest to historians of science and engineering with an inclination to astronomy *Multimessenger Astronomy* John Etienne Beckman, 2021-07-26 Written by a professional astronomer who has worked on a wide spectrum of topics throughout his career this book gives a popular science level description of what has become known as multimessenger astronomy It links the new with the traditional showing how astronomy has advanced at increasing pace in the modern era In the second decade of the twenty first century astronomy has seen the beginnings of a revolution After centuries when all our information about the Universe has come via electromagnetic waves now several entirely new ways of exploring it have emerged The most spectacular has been the detection of gravitational waves in 2015 but astronomy also uses neutrinos and cosmic ray particles to probe processes in the centres of stars and galaxies The book is strongly oriented towards measurement and technique Widely illustrated with

colourful pictures of instruments their creators and astronomical objects it is backed with descriptions of the underlying theories and concepts linking predictions observations and experiments The thread is largely historical although obviously it cannot be encyclopaedic Its point of departure is the beginning of the twentieth century and it aims at being as complete as possible for the date of completion at the end of 2020 The book addresses a wide public whose interest in science is served by magazines like Scientific American lively intelligent readers but without university studies in physics

Space Has No Frontier John Bromley-Davenport,2014-01-01 An exploration of Lovell s life and achievements in the scientific and political context of the time The extraordinary life of Bernard Lovell began before World War I and his story encompasses many of the great events of the last 100 years World War II the invention of radio astronomy the space race the Moon landings the exploration of the solar system the Cold War the Cuban missile crisis and the defense of Britain against nuclear attack It can now be revealed that he was also a spy The great radio telescope which Lovell built became and remains one of the most important scientific instruments in the world The Jodrell Bank Observatory and the Lovell Telescope have held their place at the frontier of research for 55 years His legacy remains great as can be seen from the extensive media coverage and personal tributes that his death in 2012 attracted all over the world With the 70th anniversaries of many wartime events in which he played a crucial role as well as the recent declassification of information relating to his activities as an agent in the Cold War this biography is sure to have a broad and timely interest

Front Page Physics A.J Meadows,M.M Hancock-Beaulieu,1994-01-01 From the beginning of the newspaper industry scientific developments research and results have been reported in the press and more than once hit the headlines Presented in language that can be understood by all

journalists have tirelessly detailed all exciting humorous and major developments in all areas of science In this book ten decades of newspaper article clippings on physical science have been compiled and placed in context with explanatory commentaries Each decade is preceded with a calendar of events giving the reader a chronological overview as to the content This book will undoubtedly fascinate surprise and amuse whether read from cover to cover or simply dipped into at random

The Spiral Structure of Our Galaxy W. Becker, G. Contopoulos, 2012-12-06 The idea of the organization of a Symposium on Spiral Structure came at a special meeting of Commission 33 on Spiral Structure during the 12th General Assembly of the IAU in Prague 1967 So much interest was shown during this meeting that one of us proposed a special Symposium on the Spiral Structure of Our Galaxy for 1969 The response was immediate and it was finally agreed upon holding the Symposium in Basel a center of galactic research in the center of Europe During the next months a special List of Problems related to this Symposium was sent to many prospective participants by the president of Commission 33 This stimulated an increase of interest in problems of galactic spiral structure and a concentrated effort on some problems The organizing Committee of the Symposium was composed of Drs L Woltjer president W Becker A Blaauw B J Bok G Contopoulos F J Kerr C C Lin S W McCuskey and S B Pikel ner Most of the work for the organization of the Symposium was carried by Dr L Woltjer The Local Committee composed of Drs W Becker U W Steinlin R P Fenkart and G A Tammann made every effort to secure the success of the Symposium Most of the credit goes to Dr Steinlin The Symposium was supported financially by the IAU and by the Swiss National Science Foundation The meetings took place at the University of Basel which provided also secretarial help and many other facilities

Our Present Knowledge of the Universe Bernard Lovell, 1967

Making Space for Science Jon Agar, Crosbie Smith, 2016-01-06 In recent years there has been a growing recognition that a mature analysis of scientific and technological activity requires an understanding of its spatial contexts Without these contexts indeed scientific practice as such is scarcely conceivable Making Space for Science brings together contributors with diverse interests in the history sociology and cultural studies of science and technology since the Renaissance The editors aim to provide a series of studies drawn from the history of science and engineering from sociology and sociology and science from literature and science and from architecture and design history which examine the spatial foundations of the sciences from a number of complementary perspectives

The Rise of Radio Astronomy in the Netherlands Astrid Elbers, 2016-11-23 Radio astronomy was born during the Second World War but as this book explains the history of early Dutch radio astronomy is in several respects rather anomalous in comparison to the development of radio astronomy in other countries The author describes how these very differences led the Netherlands to become one of the world leaders in radio astronomy Dominated by the Leiden astronomer Jan Hendrik Oort the field embarked on an era of success and to this day the country still holds a leading position To tell this story the book focuses on three key events in the period 1940 1970 namely the construction of the radio telescopes in Kootwijk 1948 in Dwingeloo 1956 and in Westerbork 1970 These projects show that Dutch radio

astronomers must not be seen as merely scientists but also as strategic lobbyists networkers and organizers in a specific political and economic context It was in the process of planning designing and constructing these instruments that the interests of the astronomers industrial partners politicians and lobby groups merged to create today s existing research centers for radio astronomy *A Single Sky* David P.D. Munns,2012-10-26 How radio astronomers challenged national borders disciplinary boundaries and the constraints of vision to create an international scientific community For more than three thousand years the science of astronomy depended on visible light In just the last sixty years radio technology has fundamentally altered how astronomers see the universe Combining the wartime innovation of radar and the established standards of traditional optical telescopes the radio telescope offered humanity a new vision of the universe In *A Single Sky* the historian David Munns explains how the idea of the radio telescope emerged from a new scientific community uniting the power of radio with the international aspirations of the discipline of astronomy The radio astronomers challenged Cold War era rivalries by forging a united scientific community looking at a single sky Munns tells the interconnecting stories of Australian British Dutch and American radio astronomers all seeking to learn how to see the universe by means of radio Jointly this international array of radio astronomers built a new community style of science opposing the glamour of nuclear physics *A Single Sky* describes a communitarian style of science a culture of interdisciplinary and international integration and cooperation and counters the notion that recent science has been driven by competition Collaboration or what a prominent radio astronomer called a blending of radio invention and astronomical insight produced a science as revolutionary as Galileo s first observations with a telescope Working together the community of radio astronomers revealed the structure of the galaxy **University Perspectives** Michael James Swanton,Frederick Raphael Jevons,1970
