

HOW TO USE A CONDOM

Step 1

Check the expiry date. Carefully tear the packet open. Don't use your teeth or scissors!

Step 2

Make sure the penis is erect (hard) before you put the condom on. Check condom is the right way so it unrolls easily.

Step 3

Pinch the air out of the end of the condom. This leaves space for semen / cum.

Step 4

Roll the condom down to the base of the penis near the balls. Wear it the whole time you are having sex.

Step 5

Put some water-based lubricant on the outside of the condom – especially for anal sex to avoid tearing.

Step 6

Time for some fun! If you think the condom has broken or come off during sex pull out and replace the condom.

Step 7

After sex, when you pull out hold the condom near the base of the penis. This is best done when the penis is still hard.

Step 8

Tie a knot in the end of the condom and throw it in the bin (not the toilet!)

Adapting Health Communication to Cultural Needs Piet Swanepoel,Hans Hoeken,2008 The question of what constitutes effective health communication has been addressed mainly by scholars working in American and European cultural contexts Many people who could benefit most from effective health communication however come from different cultures A prime example is the threat posed by HIV AIDS to the people of South Africa Although it is generally acknowledged that health communication needs to be tailored to the target audience s characteristics with cultural background being one of the most salient ones little research has been done on how to achieve this In this book we bring together leading scholars in the field of health communication as well as communication scholars from South Africa As such it can serve as an example of the

promises and the limitations of general health communication theories to local praxis as well as provide guidelines for the development of better health communication in South Africa
