### **Exercise Alternatives for Training**

**Emergency Management Command Center Staffs** Walter G. Green, III, 2000 Emergency management provides the coordination needed to develop an effective community response to disasters This critical public safety function is typically

performed in mobile command posts in the field and in the jurisdiction s emergency operations center Preparing individuals who will work in these facilities to perform their tasks under emergency conditions requires effective and realistic exercise training The Federal Emergency Management Agency provides a five model exercise design for progressive training of emergency management staffs This study examines the history and theoretical basis for exercises From this background it suggests alternatives to these five models to provide greater flexibility in delivery options for specialized training in decision making exercises that will support all phases of emergency management and options for increased realism Among the alternatives suggested are Tactical Decision Games What If Exercises Postal Exercises and a variety of simulation tools The book is accompanied by a detailed appendix that provides specific instructions for each exercise type Handbook ,1994 Item no 0431 K

**Riegel's Handbook of Industrial Chemistry** James A. Kent,2012-12-06 The aim of this book is to present in a single volume an up to date account of the chemistry and chemical engineering which underlie the major areas of the chemical process industry This most recent edition includes several new chapters which comprise important threads in the industry s total fabric These new chapters cover waste minimization safety considerations in chemical plant design and operation emergency response planning and statistical applications in quality control and experimental planning Together with the chapters on chemical industry economics and wastewater treatment they provide a unifying base on which the reader can most effectively apply the information provided in the chapters which describe the various areas of the chemical process industries The ninth edition of this established reference work contains the contributions of some fifty experts from industry government and academe I have been humbled by the breadth and depth of their knowledge and expertise and by the willingness and enthusiasm with which they shared their knowledge and insights They have without exception been unstinting in their efforts to make their respective chapters as complete and informative as possible within the space available Errors of omission duplication and shortcomings in organization are mine Grateful acknowledgment is made to the editors of technical journals and publishing houses for permission to reproduce illustrations and other materials and to the many industrial concerns which contributed drawings and photographs Comments and criticisms by readers will be welcome
