Enriching Teaching and Learning Environments With Contemporary Technologies Durnali, Mehmet, Limon, Ibrahim, 2020-02-07 Educational technologies have revolutionized the learning and teaching environments. Offline, online applications, and social media have changed the conventional learning and teaching habits and competencies. In terms of learners, it has been empirically proven that the use of educational technologies in the classroom makes learning easier and more enjoyable. On the other hand, it also poses threats to students such as cyberbullying and online addiction. While exploiting the opportunities of technological use in the classroom, educators must also remain vigilant and formulate ways to overcome the challenges and risks brought by technology. **Enriching Teaching and Learning Environments With Contemporary Technologies** is an essential research publication that aims to present exemplary practices of technology use and their management in pedagogical purposes in learning and teaching environments. The book also analyzes problems that may arise and develops policies on educational technologies and the exploitation of technology with pedagogical purposes as part of the discussion to solve these challenges. Featuring a wide range of topics such as augmented reality, mass media, and religious education, this book is ideal for educators who want to use technology in class, educational administrators who have responsibilities for developing policies on educational technologies and managing the use of them, and researchers who want to carry out a deep investigation into the subject. Additionally, educational software developers, academicians, instructional designers, curriculum developers, education professionals, and students will also benefit from the research contained within the book.

Innovation, Literacy, and Arts Integration in Multicultural Classrooms Christiane Wood, Laurie Stowell, Merryl Goldberg, 2023-12-11 This textbook offers a foundation for how literacy and arts integration interconnect to advance innovation, accessibility, and equitable classroom learning contexts for K-8 students. Balancing research-backed theory and classroom practice, this book helps readers understand the multiple perspectives, frameworks, and models necessary in the design of learning environments for diverse learners, including sociocultural theories of literacy, new and digital literacies, multiliteracies, culturally responsive pedagogy, critical pedagogy, and art. Written by an author team with decades of experience in teaching literacy, writing, and arts integration across a variety of learning environments, each chapter includes a basis of conceptual framing and research backed by functional case studies and practical classroom practices, as well as discussion questions. Written as a text for foundational literacy, arts integration, and education courses, **Innovation, Literacy, and Arts Integration in Multicultural Classrooms** offers an engaging practical resource for both pre-service and in-service elementary and middle grade teachers and teacher educators.
