stimulated fresh developments *The Original Ending of Mark* Nicholas P Lunn,2015-04-30 Although traditionally accepted by the church down through the centuries the longer ending of Mark's Gospel 16:9-20 has been relegated by modern scholarship to the status of a later appendage The arguments for such a view are chiefly based upon the witness of the two earliest complete manuscripts of Mark and upon matters of language and style This work shows that these primary grounds of argumentation are inadequate It is demonstrated that the church fathers knew the Markan ending from the very earliest days well over two centuries before the earliest extant manuscripts The quantity of unique terms in the ending is also seen to fall within the parameters exhibited by undisputed Markan passages Strong indications of Markan authorship are found in the presence of specific linguistic constructions a range of literary devices and the continuation of various themes prominent within the body of the Gospel Furthermore the writings of Luke show that the Gospel of Mark known to this author contained the ending Rather than being a later addition the evidence is interpreted in terms of a textual omission occurring at a later stage in transmission probably in Egypt during the second century *Theology and Practice in Early Christianity* Troy W. Martin,2020-08-12 Early Christianity did not originate in a vacuum but in a world of linguistic social religious and cultural richness and diversity The twenty two seminal essays in this volume some previously published some newly written represent almost three decades of research by Troy W Martin to understand how early Christianity developed in the ancient world The broad ranging investigations in these essays give attention not only to the linguistic and rhetorical features of early Christian texts but also to the social philosophical physiological and medical contexts in which these texts were written The essays provide new understandings of early Christian conceptions of salvation and of the virtues of faith hope and love that characterized early Christian communities They include new medical and physiological explanations of early Christian sacraments pneumatology and eschatology and furthermore investigate early Christian communal life and practice including the veiling of women male female relationships and time keeping The essays include reception histories that describe their influence on subsequent research and place them within the context of contemporary research and scholarship Those familiar with the well trodden ground of New Testament studies will find in these essays new insights and previously unexplored comparative material for understanding early Christianity and the world in which it originated *Studies in the Early Text of the Gospels and Acts* D.
