## **Human Ecology As Human Behavior Essays In Environmental And Development Anthropology:**

**Human Ecology as Human Behavior** John W. Bennett, 2017-07-05 Human interaction with the natural environment has a dual character By turning increasing quantities of natural substances into physical resources human beings might be said to have freed themselves from the constraints of low technology survival pressures However the process has generated a new dependence on nature in the form of complex socionatural systems as Bennett calls them in which human society and behavior are so interlocked with the management of the environment that small changes in the systems can lead to disaster Bennett s essays cover a wide range from the philosophy of environmentalism to the ecology of economic development from the human impact on semi arid lands to the ecology of Japanese forest management This expanded paperback edition includes a new chapter on the role of anthropology in economic development Bennett s essays exhibit an underlying pessimism if human behavior toward the physical environment is the distinctive cause of environmental abuse then reform of current management practices offers only temporary relief that is conservationism like democracy must be continually reaffirmed Clearly presented and free of jargon Human Ecology as Human Behavior will be of interest to anthropologists economists and environmentalists

**Human Ecology as Human Behavior** John William Bennett, 1993-01-01 Human interaction with the physical environment has a dual character By turning increasing quantities of natural substances and other living species into natural resources human beings might be said to have freed themselves from the constraints of the natural world However this freedom has resulted in population increases and environmental damage that make human beings ever more dependent on nature In Human Ecology as Human Behavior John W Bennett one of the few anthropologists concerned with contemporary environmental issues goes to the heart of this paradox to provide a wide ranging cross disciplinary inquiry into the behavioral aspects of environmental problems and economic development Bennett s essays are headed by an exposition of basic theory followed by presentations of his major field studies of resource management

*Classic Anthropology* John William Bennett, *Classic Anthropology* is Bennett's label for the work produced by anthropologists during the period 1915-1955 which many believe represents the most productive era in the discipline's history. It is also one that can never be repeated given the fact that most of anthropology's basic data, the ideas and customs of tribal peoples have been extinguished or greatly transformed by modernization and nationalization. The book is composed of some fifteen essays. Among the issues examined are the emergence of a functionalist viewpoint in ethnology, the difficulties of developing a theory of human behavior because of the focus on culture, the search for concepts of culture to serve specialized needs, the neglect of social psychology by the culture and personality field, how value judgments emerged willy nilly or conversely were neglected in ethnological research, how applied anthropology was challenged by Action Anthropology and how the interdisciplinary anthropology of the late 1940s was submerged in the postwar effort to return the discipline to traditional roots. Individual anthropologists whose work is examined include among others Bronislaw Malinowski, Leslie Spier, Alfred Kroeber, Ralph Linton, Margaret Mead, Ruth Benedict, Clyde Kluckhohn, Gregory Bateson and Walter Taylor

*Systemic Choices* Gregory A. Daneke, 2010-05-25 The revolution in social scientific theory and practice known as nonlinear dynamics, chaos or complexity derived from recent advances in the physical, biological and cognitive sciences is now culminating with the widespread use of tools and concepts such as praxis, fuzzy logic, artificial intelligence and parallel processing. By tracing a number of conceptual threads from mathematics, economics, cybernetics and various other applied systems theoretics, this book offers a historical framework for how these ideas are transforming the social sciences. Daneke goes on to address a variety of persistent philosophical issues surrounding this paradigm shift ranging from the nature of human rationality to free will. Finally, he describes this shift as a path for revitalizing the social sciences just when they will be most needed to address the human condition in the new millennium. *Systemic Choices* describes how praxis and other complex systems tools can be applied to a number of pressing policy and management problems. For example, simulations can be used to grow a number of robust hybrid industrial and/or technological strategies between cooperation and competition. Likewise, elements of international agreements could be tested for sustainability under adaptively evolving institutional designs. Other concrete applications include strategic management, total quality management and operational analyses. This exploration of a wide range of technical tools and concepts will interest economists, political scientists, sociologists, psychologists and those in the management disciplines such as strategy, organizational behavior, finance and operations. Gregory A. Daneke is Professor of Technology Management, Arizona State

**The Profit of the Earth** Courtney Fullilove, 2017-04-18 While there is enormous public interest in biodiversity food sourcing and sustainable agriculture romantic attachments to heirloom seeds and family farms have provoked misleading fantasies of an unrecoverable agrarian past The reality as Courtney Fullilove shows is that seeds are inherently political objects transformed by the ways they are gathered preserved distributed regenerated and improved In *The Profit of the Earth* Fullilove unearths the history of American agricultural development and of seeds as tools and talismans put in its service Organized into three thematic parts *The Profit of the Earth* is a narrative history of the collection circulation and preservation of seeds Fullilove begins with the political economy of agricultural improvement recovering the efforts of the US Patent Office and the nascent US Department of Agriculture to import seeds and cuttings for free distribution to American farmers She then turns to immigrant agricultural knowledge exploring how public and private institutions attempting to boost midwestern wheat yields drew on the resources of willing and unwilling settlers Last she explores the impact of these cereal monocultures on biocultural diversity chronicling a fin de siècle Ohio pharmacist's attempt to source Purple Coneflower from the diminishing prairie Through these captivating narratives of improvisation appropriation and loss Fullilove explores contradictions between ideologies of property rights and common use that persist in national and international development ultimately challenging readers to rethink fantasies of global agriculture's past and future
