Objectification and (De)Humanization Sarah J. Gervais, 2013-05-24 People often see nonhuman agents as human like Through the processes of anthropomorphism and humanization people attribute human characteristics including personalities free will and agency to pets cars gods nature and the like Similarly there are some people who often see human agents as less than human or more object like In this manner objectification describes the treatment of a human being as a thing disregarding the person's personality and or sentience For example women medical patients racial minorities and people with disabilities are often seen as animal like or less than human through dehumanization and objectification These two opposing forces may be considered a continuum with anthropomorphism and humanization on one end and dehumanization and objectification on the other end Although researchers have identified some of the antecedents and consequences of these processes a systematic investigation of the motivations that underlie this continuum is lacking Considerations of this continuum may have considerable implications for such areas as everyday human functioning interactions with people animals and objects violence discrimination relationship development mental health or psychopathology The edited volume will integrate multiple theoretical and empirical approaches on this issue The Oxford Handbook of Personality and Social Psychology Kay Deaux, Mark Snyder, 2018-10-30 The second edition of The Oxford Handbook of Personality and Social Psychology uniquely integrates personality and social psychology perspectives together in one volume Contributors explore historical conceptual methodological and empirical foundations that link the two fields together Further this new edition offers readers comprehensive coverage of new and emerging areas of theory research and application and assesses the fields growth and development since the publication of the first edition *A Total Creativity Program for Individualizing and Humanizing the Learning Process: Identifying and measuring creative potential* Frank E.
