## **Intellectual Impostures Postmodern Philosophers Abuse Of Science:**

*Fashionable Nonsense* Alan Sokal, Jean Bricmont, 2025-06-25 In 1996 physicist Alan Sokal published an essay in *Social Text* an influential academic journal of cultural studies touting the deep similarities between quantum gravitational theory and postmodern philosophy Soon thereafter the essay was revealed as a brilliant parody a catalog of nonsense written in the cutting edge but impenetrable lingo of postmodern theorists The event sparked a furious debate in academic circles and made the headlines of newspapers in the U S and abroad In *Fashionable Nonsense Postmodern Intellectuals Abuse of Science* Sokal and his fellow physicist Jean Bricmont expand from where the hoax left off In a delightfully witty and clear voice the two thoughtfully and thoroughly dismantle the pseudo scientific writings of some of the most fashionable French and American intellectuals More generally they challenge the widespread notion that scientific theories are mere narrations or social constructions

Intellectual Impostures Jean Bricmont, Alan Sokal, 2011-05-26 When *Intellectual Impostures* was published in France it sent shock waves through the Left Bank establishment When it was published in Britain it provoked impassioned debate Sokal and Bricmont examine the canon of French postmodernists Lacan Kristeva Baudrillard Irigaray Latour Virilio Deleuze and Guattari and systematically expose their abuse of science This edition contains a new preface analysing the reactions to the book and answering some of the attacks

**Philosophy of Language and the Challenge to Scientific Realism** Christopher Norris, 2004 In this book Christopher Norris develops the case for scientific realism by tackling various adversary arguments from a range of anti realist positions Through a close critical reading he shows how they fail to make adequate sense on any rational consistent and scientifically informed survey of the evidence Along the way he incorporates a number of detailed case studies from the history and philosophy of science Norris devotes much of his discussion to some of the most prominent and widely influential source texts of anti realism Also included are the sophisticated versions of verificationism developed albeit in very different ways by thinkers such as Michael Dummett and Bas van Fraassen Central to Norris's argument is a prolonged engagement with the once highly influential but nowadays neglected work of Norwood Russell Hanson This book will be welcomed especially by readers who possess some knowledge of the background debate and who wish to deepen and extend their understanding of these issues beyond an introductory level

coherent future analysis and research of the subject The publication comes at a time of heightened worldwide concern over the standard of science and mathematics education attended by fierce debate over how best to reform curricula and enliven student engagement in the subjects There is a growing recognition among educators and policy makers that the learning of science must dovetail with learning about science this handbook is uniquely positioned as a locus for the discussion The handbook features sections on pedagogical theoretical national and biographical research setting the literature of each tradition in its historical context It reminds readers at a crucial juncture that there has been a long and rich tradition of historical and philosophical engagements with science and mathematics teaching and that lessons can be learnt from these engagements for the resolution of current theoretical curricular and pedagogical questions that face teachers and administrators Science educators will be grateful for this unique encyclopaedic handbook Gerald Holton Physics Department Harvard University This handbook gathers the fruits of over thirty years research by a growing international and cosmopolitan community Fabio Bevilacqua Physics Department University of Pavia

**The God Debaters** Adrian Rosenfeldt, 2022-05-04 This book examines the post 9 11 God debate in the West Through a close study of prominent English God debaters Richard Dawkins Karen Armstrong Christopher Hitchens and Terry Eagleton Adrian Rosenfeldt demonstrates that New Atheist and religious apologist ideas and arguments about God science and identity are driven by mythic autobiographical narratives and Protestant or Catholic cultural heritage This study is informed by criticism of the New Atheist polemic as being positivistic and the religious apologists as propagating sophisticated theology In both cases the God debaters are perceived as disassociating themselves from human lived experience It is through reconnecting the God debaters intellectual ideas to their cultural and social background that the God debate can be grounded in a recognisable human reality that eludes reductive distinctions and disembodied abstractions

**Anthropology and the Human Subject** Brian Morris, 2014 The German philosopher Immanuel Kant famously defined anthropology as the study of what it means to be a human being Following in his footsteps Anthropology and the Human Subject provides a critical comprehensive and wide ranging investigation of conceptions of the human subject within the Western intellectual tradition focusing specifically on the secular trends of the twentieth century Encyclopaedic in scope lucidly and engagingly written the book covers the man and varied currents of thought within this tradition Each chapter deals with a specific intellectual paradigm ranging from Marx s historical materialism and Darwin s evolutionary naturalism and their various off shoots through to those currents of thought that were prominent in the late twentieth century such as for example existentialism hermeneutics phenomenology and poststructuralism With respect to each current of thought a focus is placed on their main exemplars outlining their biographical context their mode of social analysis and the ontology of the subject that emerges from their key texts The book will appeal not only to anthropologists but to students and scholars within the human sciences and philosophy as well as to any person interested in the question What does it mean to be human Ambitions in scope and encyclopaedic in

We Have Never Been Postmodern Steve Redhead, 2011-06-29 Is it possible that various disciplines theorists and cultural commentators have been hurtling down a blind alley in the last thirty years searching for the holy grail of the postmodern What if after all we have never have been postmodern Or what if we are instead now living after postmodernity As global culture rushes off the cliff of catastrophe with its neo liberal neo conservative ideologies mangled in the process this book provides theory at the speed of light designed to capture the fast flickering images of the real gone before you can blink in today s accelerated culture

fortunes of theory suitable for anyone researching teaching or studying in the field However it offers much more than this by tracing the real contribution of poststructuralist thought to core philosophical and critical issues Most importantly Colin Davis's study offers a way forward for the humanities a way forward in which theory will play a crucial part BOOK JACKET

*After Postmodernism* Jose Lopez, Garry Potter, 2005-03-01 What comes after postmodernism A buzzword which began as an energising radical critique became by the 20th Century's end a byword for fracture eclecticism political apathy and intellectual exhaustion The last few years have seen a growing interest in critical realism as a possible alternative way of moving forward The virtues of critical realism lie in its successful provision of a philosophical grounding for the social sciences and humanities and of a methodology applicable to many different fields of analysis *After Postmodernism* brings together some of the best known names in the field to present the first truly interdisciplinary introduction to critical realism The book presents the reader with a compendium of accessible essays illustrating the connection between meta theory theory and substantive research across Sociology Philosophy Literary Studies Politics Media Studies Psychology and Science Studies The flexibility of critical realism is illustrated in the range of topics discussed ranging from quantum mechanics to cyberspace to literary theory nature smoking the future of Marx the unconscious and of course postmodernism and the future of theory itself Contributors Allison Assiter Ted Benton Francis Barker Roy Bhaskar Jean Bricmont Sue Clegg Andrew Collier Justin Cruickshank Robert Fine David Ford Tim Forsyth Rom Harré Pam Higham Philip Hodgkiss Jose Lopez Christopher Norris Bertell Ollman Jenneth Parker Frank Pearce Douglas V Porpora Garry Potter John Scott Philip Tew Charles R Varela Anthony Woodiwiss *Life Evolving* Christian De Duve, 2002 A Nobel laureate discusses findings in the biological sciences in the past half century and explains what they reveal about the nature of life *The Trouble with Theory* Gavin Kitching, 2020-07-23 Postmodern theory has engaged the hearts and heads of the brightest students because of its apparent political and social radicalism Despite this Professor Gavin Kitching claims that At the heart of postmodernism is very poor deeply confused and misbegotten philosophy As a result even the very best students who fall under its sway produce radically incoherent ideas about language meaning truth and reality This is not another conservative attack on postmodernism Rather it is a carefully considered analysis from a dedicated university teacher who is convinced that we have gone terribly astray He shows that postmodern theory is at best irrelevant to and at worst undermining of persuasive political arguments and reveals the basic philosophical confusion at its heart which makes this so Essential reading for any student writing a thesis in the humanities and the social sciences and for their teachers It is the strongest and best attack on the ravages of routine post modernism that I have ever read I applaud the way he lists the good causes that students warmly espouse and then suggests a simpler way to support them without the self destructive it's all just language that is implicit in their work Professor Sir Bernard Crick Emeritus Professor of Politics Birkbeck College University of London Gavin Kitching rattles the cages Will the inmates hear this They should if only for the reason that there is virtue in learning to argue against yourself This is a serious

The Philosophy of Management Research Eric W.K. Tsang, 2016-08-19 The field of management research is commonly regarded as or aspires to be a science discipline As such management researchers face similar methodological problems as their counterparts in other science disciplines There are at least two ways that philosophy is connected with management research ontological and epistemological Despite an increasing number of scattered philosophy based discussions of research methodology there has not been a book that provides a systematic and more comprehensive treatment of the subject This book addresses this gap in the market and provides new ideas and arguments for guiding management researchers

*Oracles of Science* Karl Giberson, Mariano Artigas, 2009-02-27 *Oracles of Science* examines the popular writings of the six scientists who have been the most influential in shaping our perception of science how it works and how it relates to other fields of human endeavor especially religion Biologists Stephen Jay Gould Richard Dawkins and Edward O Wilson and physicists Carl Sagan Stephen Hawking and Steven Weinberg have become public intellectuals articulating a much larger vision for science and what role it should play in the modern worldview The scientific prestige and

literary eloquence of each of these great thinkers combine to transform them into what can only be called oracles of science. Their controversial often personal sometimes idiosyncratic opinions become widely known and perceived by many to be authoritative. Curiously the leading oracles of science are predominantly secular in ways that don't reflect the distribution of religious beliefs within the scientific community. Many of them are even hostile to religion creating a false impression that science as a whole is incompatible with religion. Karl Giberson and Mariano Artigas offer an informed analysis of the views of these six scientists carefully distinguishing science from philosophy and religion in the writings of the oracles. This book will be welcomed by many who are disturbed by the tone of the public discourse on the relationship between science and religion and will challenge others to reexamine their own preconceptions about this crucial topic.
