**Human Rights and Good Governance** Hans-Otto Sano, Gudmundur Alfredsson, Robin Clapp, 2021-08-04 This volume the result of an ongoing Nordic research project undertaken under the auspices of the Danish Centre for Human Rights in Copenhagen and the Raoul Wallenberg Institute for Human Rights and Humanitarian Law in Lund examines the relationship and possible interaction between good governance and human rights The contributors consist of academics and professionals with backgrounds in development studies economics law political science and sociology Together they demonstrate the need for interdisciplinary dialogue and clarification of concepts contents and processes of realisation While good governance is mainly pursued in a development context it is a central message of the book that good governance guidelines ought to have universal applicability affecting international organisations and public and private actors in Northern as well as Southern countries Yet an established consensus does not exist on how good governance and human rights can or should complement each other The book therefore assesses the advantages of using existing links and identifies ways of building new bridges for mutual support between governance and human rights The authors examine their topics on the basis of theory best practices law the experiences of societies undergoing democratic transition and other empirical evidence without attempting to come up with a common definition of good governance The plurality of interpretations will hopefully further strengthen good governance and human rights as integral elements of a global agenda

*Blue Economy and Ocean Sustainable Development in a Globalised World: Social, Political, Economic and Environmental Issues* Ibukun J. Adewumi, Andrei Polejack, Joanna Vince, Maree E. Fudge, 2023-12-05 In the last decade the concept of a Blue Economy has ignited a deep theoretical debate Ranging from the integration of the triple bottom line of sustainability to the optimization of profit from ocean exploitation the meaning of the term blue economy differs considerably between epistemic communities and even more so among national and regional policies There is a general sense of the opportunity to realise enhanced social and economic benefits from the sustainable utilisation of their ocean and coastal resources under the umbrella framework of blue economy Blue economy is gaining traction already as a significant component of national policies even in spite of a clear conceptualization of the term Many countries are now preparing national policies towards realising their blue economy ambitions utilizing the concept as they see fit Likewise multilateral

and regional organisations are developing guidelines and providing investment in new research technologies and financing tools that promote blue economy Critical challenges abound in particular in less privileged countries These include the gap in research capabilities governments prioritizing social wellbeing and economic profit in contrast to environmental protection the identification of new and emerging areas of ocean economic activity that are both socially and ecologically sustainable and holds viable business models that can attract private investment
