Innovation Policy in Panama Design, Implementation and Evaluation OECD,2015-04-28 This report reviews the experience of Panama in designing and implementing innovation policy It presents an overview of economic and innovation indicators in the country in a comparative perspective with other economies in Latin America and beyond and it analyses the design and implementation **The Oxford Handbook of Industrial Policy** Arkebe Oqubay,Christopher Cramer,Ha-Joon Chang,Richard Kozul-Wright,2020-10-20 Industrial policy has long been regarded as a strategy to encourage sector industry or economy wide development by the state It has been central to competitiveness catching up and structural change in both advanced and developing countries It has also been one of the most contested perspectives reflecting ideologically inflected debates and shifts in prevailing ideas There has lately been a renewed interest in industrial policy in academic circles and international policy dialogues prompted by the weak outcomes of policies pursued by many developing countries under the direction of the Washington Consensus and its descendants the slow economic recovery of many advanced economies after the 2008 global financial crisis and mounting anxieties about the national consequences of globalization The Oxford Handbook of Industrial Policy presents a comprehensive review of and a novel approach to the conceptual and theoretical foundations of industrial policy The Handbook also presents analytical perspectives on how industrial policy connects to broader issues of development strategy macro economic policies infrastructure development human capital and political economy By combining historical and theoretical perspectives and integrating conceptual issues with empirical evidence drawn from advanced emerging and developing countries The Handbook offers valuable lessons and policy insights to policymakers practitioners and researchers on developing productive transformation technological capabilities and international competitiveness It addresses pressing issues including climate change the gendered dimensions of industrial policy global governance and technical change Written by leading international thinkers on the subject the volume pulls together different perspectives and schools of thought from neo classical to structuralist development economists to discuss and highlight the adaptation of industrial policy in an ever changing socio economic and political landscape

International Development Governance Ahmed Shafiquel Huque,Habib Zafarullah,2017-09-25 The establishment of good governance is a major challenge for the developing world along with the need to sustain the progress resulting from developmental efforts Although there are numerous studies on the development and governance of emerging nations few volumes make a serious effort to bring together these two critical concepts International Development Governance combines the two concepts development and governance by examining the issues and problems faced by nations in their attempts to establish sustainable governance This textbook also initiates discussions on the concept of development governance in an

international context The book fills the gap in existing literature by drawing upon the experience and expertise of scholars from a broad spectrum of knowledge Their views explain the issues and problems with reference to a number of tools that could establish development governance and sustain it The text offers in depth examinations of developmental sectors resulting in a textbook that will inspire future public officials policy makers and consultants to contribute to the betterment of life for citizens of developing countries *Handbook on the Theory and Practice of Program Evaluation* Albert N.

Link,Nicholas S. Vonortas,2013-01-01 The economic crisis has simultaneously placed a strong emphasis on the role of R D as an engine of economic growth and a demand that limited public resources are demonstrated to have had the maximum possible impact Rigorous evaluation is the key to meeting these needs This Handbook brings together highly experienced leaders in the field to provide a comprehensive and well organised state of the art overview of the range of methods available It will prove invaluable to experienced practitioners students in the field and more widely to those who want to increase their understanding of the complex and pervasive ways in which technological advance contributes to economic and social progress Luke Georghiou University of Manchester UK Theoretical and empirical research on program evaluation has advanced rapidly in scope and quality A concomitant trend is increasing pressure on policymakers to show that programs are effective Now is the time for a comprehensive status report on state of the art research and methods by leading scholars in a variety of disciplines on program evaluation This outstanding collection of contributions will serve as a valuable reference tool for academics policymakers and practitioners for many years to come Donald S Siegel University at Albany SUNY US There has been a dramatic increase in expenditures on public goods over the past thirty years particularly in the area of research and development As governments explore the many opportunities for growth in this area they and the general public are becoming increasingly concerned with the transparency accountability and performance of public programs This pioneering Handbook offers a collection of critical essays on the theory and practice of program evaluation written by some of the most well known experts in the field As this volume demonstrates a wide variety of methodologies exist to evaluate particularly the objectives and outcomes of research and development programs These include surveys statistical and econometric estimations patent analyses bibliometrics scientometrics network analyses case studies and historical tracings Contributors divide these and other methods and applications into four categories economic non economic hybrid and data driven in order to discuss the many factors that affect the utility of each technique and how that impacts the technological economic and societal forecasts of the programs in question Scholars practitioners and students with an interest in economics and innovation will all find this Handbook an invaluable resource **The Research System in Transition** Susan E. Cozzens,Peter Healey,Arie Rip,John Ziman,2012-12-06 On a mountainside in sunny Tuscany in October 1989 96 people from 23 countries on five continents gathered to learn and teach about the problems of managing contemporary science The diversity of economic and political systems represented in the group was matched by our occupations which stretched from

science policy practitioners through research scientists and engineers through academic observers of science and science policy It was this diversity along with the opportunities for informal discussion provided by long meals and remote location that made the conference a special learning experience Except at lecture time it was impossible to distinguish the students at this event from the teachers and even the most senior members of the teaching staff went away with a sense that they had learned more from this group than from many a standard conference on science policy they had attended The flavor of the conference experience cannot be captured adequately in a proceedings volume and so we have not tried to create a historical record in this book Instead we have attempted to illustrate the core problems the participants at the conference shared discussed and debated using both lectures delivered by the formal teaching staff and summaries of panel discussions which extended to other participants and therefore increased the range of experiences reported

Convergence National Research Council, Division on Earth and Life Studies, Board on Life Sciences, Committee on Key Challenge Areas for Convergence and Health, 2014-06-16 Convergence of the life sciences with fields including physical chemical mathematical computational engineering and social sciences is a key strategy to tackle complex challenges and achieve new and innovative solutions However institutions face a lack of guidance on how to establish effective programs what challenges they are likely to encounter and what strategies other organizations have used to address the issues that arise This advice is needed to harness the excitement generated by the concept of convergence and channel it into the policies structures and networks that will enable it to realize its goals Convergence investigates examples of organizations that have established mechanisms to support convergent research This report discusses details of current programs how organizations have chosen to measure success and what has worked and not worked in varied settings The report summarizes the lessons learned and provides organizations with strategies to tackle practical needs and implementation challenges in areas such as infrastructure student education and training faculty advancement and inter institutional partnerships

Public Policy Evaluation Stuart S. Nagel, 2018-08-13 First published in 1998 this volume examines how super optimum decisions involve finding alternatives to controversies whereby Conservatives Liberals or other major groups can all come out ahead of their best initial expectations simultaneously This book is organized in terms of concepts methods causes process substance and the policy studies profession Concepts clarify that policy evaluation traditionally involves 1 Goals to be achieved 2 Alternatives available for achieving them 3 Relations between goals and alternatives 4 Drawing a conclusion as to the best alternative in light of the goals alternatives and relations and 5 Analysing how the conclusion would change if there were changes in the goals alternatives or relations Super optimizing also involves five related steps but with the following improvements 1 Goals are designed as conservative liberal or neutral 2 Alternatives get the same designations 3 Relations are simplified to indicate which alternatives are relatively high or low on each goal 4 The conclusion involves arriving at an alternative that does better on Goal A than Alternative A and simultaneously better on Goal B than Alternative

B and 5 The fifth step involves analysing the super optimum or win win alternative in terms of its feasibility as to the economic technological psychological political administrative and legal matters Handbook of Innovation Indicators and Measurement Fred Gault,2013-01-01 A great book to understand and foster innovation at all levels a truly innovative piece of work Enrico Giovannini Minister of Labour and Social Policies Italy This book brings together original contributions from world leading experts on innovation indicators and is unique in several respects First the focus is upon innovation in terms of commercialized products and processes and not on secondary indicators of research or patenting Second it combines academic perspectives with user perspectives from industry and international organizations Third it strikes a good balance between old and new indicators opening up new dimensions of innovation for measuring It is a book worth reading for scholars studying innovation for policy makers and not least for innovation managers in the private sector Bengt ke Lundvall Aalborg University Denmark and Sciences Po Paris France This Handbook comprehensively examines indicators and statistical measurement related to innovation as defined in the OECD Eurostat Oslo Manual It deals with the development and the use of innovation indicators to support decision making and is written by authors who are practitioners who know what works and what does not in order to improve the development of indicators to satisfy future policy needs This unique volume presents the historical and geographical context for innovation indicators and measurement practical examples of how measurement is actually undertaken new areas of innovation indicators and measurement including consumer innovation public sector innovation and social innovation This informative Handbook will appeal to policy makers in government departments statistical offices and research institutes and international organizations such as the EU OECD and the UN as well as university departments of economics sociology law science and technology and public policy
