Intelligent Document Retrieval Udo Kruschwitz,2005-10-24 Collections of digital documents can nowadays be found everywhere in institutions universities or companies Examples are Web sites or intranets But searching them for information can still be painful Searches often return either large numbers of matches or no suitable matches at all Such document collections can vary a lot in size and how much structure they carry What they have in common is that they typically do have some structure and that they cover a limited range of topics The second point is significantly different from the Web in general The type of search system that we propose in this book can suggest ways of refining or relaxing the query to assist a user in the search process In order to suggest sensible query modifications we would need to know what the documents are about Explicit knowledge about the document collection encoded in some electronic form is what we need However typically such knowledge is not available So we construct it automatically **Intelligent Document Retrieval** Udo Kruschwitz,2009-09-03 Collections of digital documents can nowadays be found everywhere in institutions universities or companies Examples are Web sites or intranets But searching them for information can still be painful Searches often return either large numbers of matches or no suitable matches at all Such document collections can vary a lot in size and how much structure they carry What they have in common is that they typically do have some structure and that they cover a limited range of topics The second point is significantly different from the Web in general The type of search system that we propose in this book can suggest ways of refining or relaxing the query to assist a user in the search process In order to suggest sensible query modifications we would need to know what the documents are about Explicit knowledge about the document collection encoded in some electronic form is what we need However typically such knowledge is not available So we construct it automatically *Intelligent Document Retrieval* Udo Kruschwitz,2006-01-09 Collections of digital documents can nowadays be found everywhere in institutions universities or companies Examples are Web sites or intranets But searching them for information can still be painful Searches often return either large numbers of matches or no suitable matches at all Such document collections can vary a lot in size and how much structure they carry What they have in common is that they typically do have some structure and that they cover a limited range of topics The second point is significantly different from the Web in general The type of search system that we propose in this book can suggest ways of refining or relaxing the query to assist a user in the search process In order to suggest sensible query modifications we would need to know what the documents are about Explicit knowledge about the document collection encoded in some electronic form is what we need However typically such knowledge is not available So we construct it automatically **Visualization for Information Retrieval** Jin Zhang,2007-11-24 The amount of digitized information available on the Internet in digital libraries and other forms of information systems grows at an exponential rate while becoming more complex and more dynamic As a consequence information organization information retrieval and the presentation of retrieval

results have become more and more difficult Information visualization offers a unique method to reveal hidden patterns and contextual information in a visual presentation and allows users to seek information in an intuitive way Jin Zhang provides a systematic explanation of the latest advancements in information retrieval visualization from both theoretical and practical perspectives He reviews the main approaches and techniques available in the field explains theoretical relationships between information retrieval and information visualization and presents major information retrieval visualization algorithms and models He then takes a detailed look at the theory and applications of information retrieval visualization for Internet traffic analysis and Internet information searching and browsing The author also addresses challenges such as ambiguity metaphorical applications and system evaluation in information retrieval visualization environments Finally he compares these information retrieval visualization models from the perspectives of visual spaces semantic frameworks projection algorithms ambiguity and information retrieval and discusses important issues of information retrieval visualization and research directions for future exploration Readers of this book will gain an in depth understanding of the current state of information retrieval visualization They will be introduced to existing problems for researchers and professionals along with technical and theoretical findings and advances made by leading researchers The book also provides practical details for the implementation of an information retrieval visualization system   **New Directions in Cognitive Information Retrieval** Amanda Spink,Charles Cole,2006-08-25 New Directions in Cognitive Information Retrieval presents an exciting new direction for research into cognitive oriented information retrieval IR research a direction based on an analysis of the user s problem situation and cognitive behavior when using the IR system This contrasts with the current dominant IR research paradigm which concentrates on improving IR system matching performance The chapters describe the leading edge concepts and models of cognitive IR that explore the nexus between human cognition information and the social conditions that drive humans to seek information using IR systems Chapter topics include Polyrepresentation cognitive overlap and the boomerang effect Multitasking while conducting the search Knowledge Diagram Visualizations of the topic space to facilitate user assimilation of information Task relevance selection state knowledge need and knowledge behavior search training built into the search children s collaboration for school projects and other cognitive perspectives on IR concepts and issues

Information Extraction: Algorithms and Prospects in a Retrieval Context Marie-Francine Moens,2006-10-10 Currently there is a considerable interest in integrating the results of information extraction in retrieval systems because of the growing demand for search engines that return precise answers to flexible information queries Advanced retrieval models satisfy that need and they rely on tools that automatically build a probabilistic model of the content of a multi media document The book focuses on content recognition in text It elaborates on the past and current most successful algorithms and their application in a variety of domains e g news filtering mining of biomedical text intelligence gathering competitive intelligence legal information searching and processing of informal text An important part discusses current statistical and

machine learning algorithms for information detection and classification and integrates their results in probabilistic retrieval models The book also reveals a number of ideas towards an advanced understanding and synthesis of textual content
