## Java Data Objects:

**Java Data Objects** David Jordan, Craig Russell, 2003-04-22 This is a definitive guide to JDO API It provides a thorough introduction to JDO Java Data Objects starting with a simple application that demonstrates many of JDO's capabilities It shows the reader how to make classes persistent how to configure JDO at runtime how to make queries and more [Java Data Objects](#) David Jordan, 2003 The result is software that is truly object oriented not code that is partially object oriented with a large database shaped lump on the back end JDO lets you save plain ordinary Java objects and does not force you to use different data models and types for dealing with storage As a result your code becomes easier to maintain easier to re use and easier to test And you're not tied to a specific database vendor your JDO code is entirely database independent You don't even need to know whether the datastore is a relational database an object database or just a set of files [Core Java Data Objects](#) Sameer Tyagi, 2003 JDO's transparent persistence will accelerate software development Includes practical examples and best practices as well as a full case study Written by experienced members of the JDO Expert Group The CD ROM includes community and evaluation editions of JDO software from a number of vendors [Using and Understanding Java Data Objects](#) David Ezzio, 2008-01-01 JAVA DATA OBJECTS JDO specifies a transparent persistence service for Java objects The specification describes a general framework for storing and retrieving the persistent state of Java objects The JSR 12 expert group defined JDO using the Java Community Process JDO includes a specification a reference implementation and a technology compatibility kit TCK All three can be downloaded from the JavaCommunityProcessWebsite <http://www.jcp.org/jsr/detail/12.jsp> A number of vendors have created implementations of JDO and provide versions of their products that you can download from the Web URLs to some of these vendors are found near the end of this introduction Java programmers use tools to make their projects successful Most applications and server side components involve moving data between objects in memory and persistent storage JDO promises to change the way that Java programmers store and retrieve object state JDO simplifies the application's code increases the application's portability and helps to separate concerns in the application's design Compared to existing alternatives JDO makes persistence easier to understand easier to model and easier to code Who Should Read This Book This book is intended for Java programmers and application architects It assumes that you know how to program in Java and it assumes that you want to use JDO and understand how it works This book emphasizes what you need to know to use JDO effectively *Java Data Objects*, 2004 **Objects and Databases** Klaus R. Dittrich, Giovanna Guerrini, Isabella Merlo, Marta Oliva, M. Elena Rodriguez, 2003-06-29 These post proceedings contain the revised versions of the papers presented at the Symposium on Objects and Databases which was held in Sophia Antipolis France June 13 2000 in conjunction with the Fourteenth European Conference on Object Oriented Programming ECOOP 2000 This event continued the tradition established the year before in Lisbon Portugal with the First Workshop on Object Oriented Databases The goal of the symposium was to bring together researchers working in various corners of the field of

objects and databases to discuss the current state of research in the field and to critically evaluate existing solutions in terms of their current usage their successes and limitations and their potential for new applications The organizing committee received 21 papers which were reviewed by a program committee of people active in the field of objects and databases There were 3 reviews for each paper and finally the organizing committee selected 9 long papers 2 short papers and a demonstration to be presented and discussed at the symposium The selected papers cover a wide spectrum of topics including data modeling concepts persistent object languages consistency and integrity of persistent data storage structures class versioning and schema evolution query languages and temporal object oriented databases In addition to the regular papers the symposium included an invited presentation given by Prof Malcolm Atkinson from the University of Glasgow Scotland where he heads the Persistence and Distribution Group Java Data Objects (JDO) Case Study Srinivas Neshangi, 2004

**Object Databases** Moira C. Norrie, Michael Grossniklaus, 2010-07-30 This book constitutes the thoroughly refereed post conference proceedings of the 2nd International Conference on Object Databases ICOODB 2009 held in Zurich Switzerland in July 2009 The 6 revised full papers presented together with 3 invited papers were carefully reviewed and selected from the presentations at the research track during two rounds of reviewing and improvement These papers address a wide range of issues related to object databases including topics such as applications methodologies design tools frameworks and standards as well as core object database technologies **Objects, Components, Architectures, Services, and**

**Applications for a Networked World** Mehmet Aksit, Mira Mezini, 2003-02-25 This book constitutes the thoroughly refereed post proceedings of the international conference NetObjectDays 2002 held in Erfurt Germany in October 2002 The 26 revised full papers presented were carefully selected during two rounds of reviewing and revision The papers are organized in topical sections on embedded and distributed systems components and MDA Java technology Web services aspect oriented software design agents and mobility software product lines synchronization testing refactoring and CASE tools Objects and Databases Alan Dearle, Roberto V. Zicari, 2010-09-21 According to Francois Bancillon and Won Kim SIGMOD RECORD Vol 19

No 4 December 1990 object oriented databases started in around 1983 Twen seven years later this publication contains the proceedings of the Third International Conference on Object Oriented Databases ICOODB 2010 Two questions arise from this why only the third and what is of interest in the field of object oriented databases in 2010 The first question is easy in the 1980s and 1990s there were a number of conferences supporting the community the International Workshops on Persistent Object Systems started by Malcolm Atkinson and Ron Morrison the EDBT series and the International Workshop on Database Programming Languages These database oriented conferences complimented other OO conferences including OOPSLA and ECOOP but towards the end of the last century they dwindled in popularity and eventually died out In 2008 the First International Conference on Object Databases was held in Berlin In 2009 the second ICOODB conference was held at the ETH in Zurich as a scientific peer reviewed conference What is particular about ICOODB is that the conference series was est

lished to address the needs of both industry and researchers who had an interest in object databases in innovative ways to bring objects and databases together and in alternatives extensions to relational databases The rst conference set the mould for those to follow a combination of theory and practice with one day focusing on the theory of object databases and the second focusing on their practical use and implementation

JDO (java Data Objects) Concepts and Implementation Gilberto J. Vázquez, 2007 **Java data objects (JDO)** Mustapha Lahmar, 2003\* *The Java Tutorial* Mary Campione, Kathy Walrath, Alison Huml, 2001 Based on the online version that has become one of the world's most visited programmer documentation sites this is a remarkably clear practical hands on introduction to the Java 2 Platform The bonus CD ROM contains all major versions of the Java Platform **Java Data Objects** Robin M. *OOIS 2001* Xingxu Wang, Shushma Patel, Ronald Johnston, 2012-12-06 Welcome to OOIS 01 and Calgary This is the 7th International Conference on Object Oriented Information Systems OOIS that focus on Object Oriented and Web Based Frameworks for Information Systems In the last few years we've seen significant new development in this field from one off design technologies to

reusable frameworks and from web applications to bioinformatic systems We perceive that information processing is one of the most important activities of human beings Object orientation and frameworks have been the main stream technologies for design and implementation of large scale and complex information systems Recent research advances and industrial innovations in information systems modeling and Internet applications have explored the new trends in shifting information system vendors from component and system developers to services providers Users of information systems are increasingly demanding higher performance mobility and personalization in order to realize the dream to access and obtain necessary information anywhere and anytime The new development requires the investigation of new architectures frameworks processes and inter connectivity of information systems at society organization team and personal levels The OOIS 01 Proceedings has put together a program of 53 papers from leading researchers and practitioners in the field of object technology and information systems

*ECOOP 2004 - Object-Oriented Programming* Martin Odersky, 2004-11-24 ECOOP is the premier forum in Europe for bringing together practitioners searchers and students to share their ideas and experiences in a broad range of disciplines woven with the common thread of object technology It is a collage of events including outstanding invited speakers carefully refereed technical papers practitioner reports reflecting real world experience panels topic focused workshops demonstrations and an interactive posters session The 18th ECOOP 2004 conference held during June 14 18 2004 in Oslo Norway represented another year of continued success in object oriented programming both as a topic of academic study and as a vehicle for industrial software development Object oriented technology has come of age it is now the commonly established method for most software projects However an expanding field of applications and new technological challenges provide a strong demand for research in foundations design and programming methods as well as implementation techniques There is also an increasing interest in the integration of object orientation with other software development techniques We anticipate therefore that object oriented programming will be a fruitful subject of research for many years to come This year the program committee received 132 submissions of which 25 were

accepted for publication after a thorough reviewing process. Every paper received at least 4 reviews.

Papers were evaluated based on relevance, significance, clarity, originality, and correctness. The topics covered include programming concepts, program analysis, software engineering aspects and components, middleware verification systems, and implementation techniques. These were complemented by two invited talks from Matthias Felleisen and Tom Henzinger. Their titles and abstracts are also included in these proceedings.

**Learning Java** Patrick Niemeyer, Daniel Leuck, 2013. Java is the preferred language for many of today's leading edge technologies, everything from smartphones and game consoles to robots, massive enterprise systems, and supercomputers. If you're new to Java, the fourth edition of this bestselling guide provides an example-driven introduction to the latest language features and APIs in Java 6 and 7. Advanced Java developers will be able to take a deep dive into areas such as concurrency and JVM enhancements. You'll learn powerful new ways to manage resources and exceptions in your applications and quickly get up to speed on Java's new concurrency utilities and APIs for web services and XML. You'll also find an updated tutorial on how to get started with the Eclipse IDE and a brand new introduction to database access in Java. Publisher's description.
