The background is a solid green color with a large, white, stylized 'L' shape that is slightly offset from the top-left corner. The 'L' has a thick border. To the right of the 'L', there are several horizontal, wavy white lines that resemble a topographical map or a stylized landscape. The overall aesthetic is minimalist and modern.

Greenspeak A Study Of Environmental Discourse:

Greenspeak Rom Harré, Jens Brockmeier, Mühlhäusler, 1998-11-12 In this interdisciplinary examination of the discourse of environmentalism the authors explore the linguistic philosophical psychological and cultural historical aspects of environmental discourse rather than environmental phenomena themselves This volume is not advocacy on environmentalism rather it is an analysis of the means of persuasion and the techniques of advocacy used by both sides of the environmental debate between conservationists and conservatives The book includes an analysis of the concepts of time and space in their linguistic manifestations Another theme is the interdependencies of the natural world with political and economic institutions

China's Embedded Activism Peter Ho, Richard Edmonds, 2007-10-19 In recent years China has been remarkable in achieving extraordinary economic transformation yet without fundamental political change To many observers this would seem to imply a weakness in Chinese civil society However though the idea of democracy as multitudes of citizens taking to the streets may be attractive it is simultaneously misleading as it disregards the nature of political change taking place in China today a gradual shift towards a polity adapted to a pluralist society At the same time one may wonder what the limited political space implies for the development of a social movement in China This book explores this question by focusing on one of the most active areas of Chinese civil society the environment China's Embedded Activism argues that China's semi authoritarian limitations on the freedom of association and speech coupled with increased social spaces for civic action has created a milieu in which activism occurs in an embedded fashion The semi authoritarian atmosphere is restrictive of but paradoxically also conducive to nationwide collective action with less risk of social instability and repression at the hand of the governing elite Rich in case studies about environmental civic organizations in China and written by a team of international experts on social movements NGOs democratization and civil society this book addresses a wide readership of students scholars and professionals interested in development geography and environment political change and contemporary Chinese society

Transformative Communication Studies Omar Swartz, 2008-01-01 This interdisciplinary collection of essays charts intersections between communication cultural studies and a variety of emergent emancipatory and liberatory discourses Every essay attempts in one way or another to speak to the following questions What would a theory of liberation look like that is premised on a communication view of the world How would such a view expand and even redefine our understanding of liberation Finally how would such a view enlarge our understanding of what is collectively communally and organizationally possible In other words the chapters articulate what can be loosely considered a humanist theory of communication and praxis The goal is to move beyond discourses of liberation that are grounded in essentialist assumptions and to move the conversation toward an engaged criticism on cultural and social levels that facilitates and encourages progressive action This edited collection thus has as its goal a theory of human liberation grounded in communication as a resource for social and spiritual transformation The chapters comprise a mix of conceptual and applied studies that interrogate the communicative practices that naturalize our hierarchical world reifying and stultifying our moral and political imaginations As an antidote to this problem the contributors consider the importance of uncertainty and contingency in the development of human potential Rather than fearing uncertainty and contingency and allowing that fear to control us contributors argue that we should find within these conditions the source of our humanity and the strength to question and resist unjust social reifications When we do this we will rediscover the power of communication and regain an agency and control over our lives We then can start the difficult but humanizing process of constructing the world anew Case study exemplars of this construction thus are showcased
