J.D. Westwood,R.S. Haluck,H.M. Hoffman,2005-01-13 Magical describes conditions that are outside our understanding of cause and effect What cannot be attributed to human or natural forces is explained as magic super human super natural Even in modern societies magic based explanations are powerful because given the complexity of the universe there are so many opportunities to use them The history of medicine is defined by progress in understanding the human body from magical explanations to measurable results To continue medical progress physicians and scientists must openly question traditional models Valid inquiry demands a willingness to consider all possible solutions without prejudice Medical politics should not perpetuate unproven assumptions nor curtail reasoned experimentation unbiased measurement and well informed analysis For thirteen years Medicine Meets Virtual Reality has been an incubator for technologies that create new medical understanding via the simulation visualization and extension of reality Researchers create imaginary patients because they offer a more reliable and controllable experience to the novice surgeon With imaging tools reality is purposefully distorted to reveal to the clinician what the eye alone cannot see Robotics and intelligence networks allow the healer s sight hearing touch and judgment to be extended across distance as if by magic The moments when scientific truth is suddenly revealed after lengthy observation experimentation and measurement is the real magic These moments are not miraculous however They are human ingenuity in progress and they are documented here in this book *Ubiquitous Computing Systems* Hitomi

Murakami,Hideyuki Nakashima,Hideyuki Tokuda,Michiaki Yasumura,2005-07-20 This book is a collection of papers presented at UCS 2004 held on November 8 9 in Tokyo UCS is a series of international symposia sponsored by the special interest group Ubiquitous Computing Systems of the Information Processing Society of Japan The rst UCS was held on November 17 2003 in Kyoto It was held as an invitation based symposium UCS 2004 was the second of the series and the rst submission based conference UCS focuses on the emerging research area of ubiquitous computing systems This emergence is an outcome of the rapid evolution in smart appliances and devices as well as tremendous advances in wireless networks and mobile computing In the last few years various applications of information technology have been changing our everyday life rapidly and to a large extent The best example is the use of mobile phones By getting new sensing devices cameras their application field is no longer limited to communication but covers data communications including Internet access and data and program upload downloading and so on The symposium offered the opportunity for in depth exploration of the most recent research and development findings in the field of ubiquitous computing The submitted papers presented at UCS 2004 suggest such a direction to future technologies including mobile ad hoc networks sensor networks and context aware technologies **Learn**
