An Extensible Component & Connector Architecture Description Infrastructure for Multi-Platform Modeling Andreas Wortmann, 2016-11-08 Software engineering for complex systems requires abstraction multi domain expertise separation of concerns and reuse Domain experts rarely are software engineers and should formulate solutions using their domain s vocabulary instead of general purpose programming languages GPLs Successful integration of domain specific languages DSLs into a software system requires a separation of concerns between domain issues and integration issues while retaining a loose enough coupling to support DSL reuse in different contexts Component based software engineering CBSE increases reuse and separation of concerns by encapsulating functionalities in components Components are GPL artifacts which raises accidental complexities Model driven engineering MDE abstracts from GPLs by lifting models to primary development artifacts Models can be

abstract and better comprehensible by using domain vocabulary instead of a GPL They can be platform independent and translated into GPLs for different target platforms Component connector C C architecture description languages ADLs combine CBSE and MDE to compose of architectures from component models We present concepts for engineering software systems with exchangeable component behavior languages The concepts are realized in a software architecture modeling infrastructure that comprises modeling languages to develop applications based on C C software architectures with exchangeable component behavior DSLs It supports transformations from platform independent to platform specific software architectures and compositional code generation With this it enables domain experts to re use the most appropriate component behavior DSL and facilitates composition of domain solutions through encapsulation in components *SU-AFBE 2018* Andriati Fitriningrum,Busro ,Dwi Fajar Saputra,Robbi Rahim, This is the 22nd AFBE Conference a proud record for an academic conference and we hope it is also an indication of the value of AFBE to business and management scholars within the region Sampoerna University organizes the 2018 AFBE Conference with the theme of Business Innovation Sustainability and Disruption Technology Challenges and Opportunities This topic has taken growing attention among not only practitioners but also academics Nowadays there are numerous new ventures that offer novel products or services that may disrupt established industry More and more people should be aware of the challenges and opportunities and thus forced to become more agile and competitive in the today s business environment There is four invited speakers Ir Airlangga Hartanto MBA Minister of Industry of the Republic of Indonesia Dr Chris Perryer University of Western Australia Dr Marthin Nanere La Trobe University Australia and Reza Ashari Nasution Ph D Institut Teknologi Bandung Exploring Higher Vocational Software Technology Education Chen Ping,2024-09-30 Exploring Higher Vocational Software Technology Education offers a comprehensive analysis of the current landscape of software technology education in Chinese vocational colleges It addresses the challenges and opportunities in cultivating skilled software professionals in the rapidly evolving digital economy The book covers key areas such as curriculum design practical teaching and faculty development providing actionable insights for educators administrators and policymakers Through comparative analysis with international best practices it offers recommendations for optimizing software technology education to better meet industry demands The book also features case studies highlighting innovative approaches such as school enterprise collaboration and project driven learning which are essential in bridging the gap between theory and practice This work serves as a valuable reference not only for Chinese educators but also for an international audience interested in understanding China s vocational education model and how it can inform global education reform Whether you re an academic a practitioner or a policymaker this book offers practical pathways for enhancing the quality of technical talent development in today s competitive global market

American Sugar Industry ,1919 *The Indonesian Crisis* Aris Ananta,2002-12-05 The book focuses on the impact of the 1997 99 economic crisis on human development in Indonesia especially in 1998 its worst year Based on the definition

used by the UNDP human development is analysed as covering human capital education and health and purchasing power In this book the concept of human capital is broadened to include freedom from fear health education and migration The first part of the book discusses the economic situation in Indonesia The second elaborates on what happened to human capital during the crisis and the third part examines its effects on purchasing power Because human development does not occur in a vacuum the fourth part discusses some emerging issues in Indonesia The book concludes with some thoughts on people centred development which may contribute to more sustainable development than the development concept that simply pursues high economic growth With this people centred development growth rates of about 3 to 4 per cent are adequate as long as Indonesia achieves success in human development **Drug and Chemical Markets** ,1920 Drug & Chemical Markets ,1920
