**Mastering XPages** Martin Donnelly,Mark Wallace,Tony McGuckin,2014-04-18

IBM's Best Selling Guide to XPages Development Now Updated and Expanded for Lotus Notes Domino 9 0 1 XPages instantly revolutionized Notes Domino application development and the newest versions deliver unprecedented performance and flexibility. Now the popular insider's guide to XPages development has been updated and expanded to reflect all these improvements through IBM Notes Domino 9 0 1 and beyond. Three key members of the IBM XPages team have brought together comprehensive knowledge for delivering outstanding solutions. They have added several hundred pages of new content including four new chapters. Drawing on their unsurpassed experience they present new tips samples and best practices reflecting the platform's growing maturity. Writing for both XPages newcomers and experts they cover the entire project lifecycle including problem debugging performance optimization and application scalability. This second edition of Mastering XPages fully addresses enhancements to the XPages data sources for Domino views and documents the latest XPages mobile library the new Domino Designer Server Side JavaScript debugger and improvements to integrated technologies such as Dojo and CKEditor. Nearly every chapter contains at least one downloadable sample application offering extensive hands on practice. This guide concludes with complete references to XSP tags relevant Java JavaScript classes and XSP style classes. Coverage includes Understanding XPages development paradigm tooling runtime framework and application architecture Configuring Domino Designer and integrating XPages Extension Library Constructing application logic and using data binding controls Reading writing Notes documents from use cases to design properties Using Views including examples of accessing calendars via REST Making the most of Notes Domino 9 0's new DataView control Coding from the basics to fully customized behavior Advanced scripting AJAX Dojo Functions managed beans and more Extending the Rich Text Editor's functionality Building and consuming new controls with Extensibility APIs Taking web applications offline in the Notes client Building mobile apps controls design patterns and best practices Debugging Server Side JavaScript with Domino Designer 9 0 Creating apps that look and work great for local and global audiences Systematically optimizing performance and scalability Protecting data and users leveraging Domino and Notes security models *Java Frameworks and Components* Michael Nash, 2003-06-16 This book is a practical tool for Java TM programmers. It provides the necessary information for finding evaluating and selecting an application framework for programming needs. It explains in plain language the benefits of frameworks and component technologies specifically in relation to web application development. The book is unique it does not focus on any specific technology and uses examples from several different frameworks to explain the underlying principles. As the market for web applications begins its second wave this volume provides the critical information for developers to make the transition into componentized framework based development keeping them ahead in an increasingly competitive market **Java EE 7: The Big Picture** Danny Coward, 2014-10-11 The Definitive Guide to Java Platform Enterprise Edition 7 Java EE 7 The Big Picture uniquely explores the entire Java EE 7 platform in an all encompassing style while examining each tier of the platform in enough detail so that you can select the right technologies.

for specific project needs In this authoritative guide Java expert Danny Coward walks you through the code applications and frameworks that power the platform Take full advantage of the robust capabilities of Java EE 7 increase your productivity and meet enterprise demands with help from this Oracle Press resource Explore the features of the Java servlet model and Java servlet API Create dynamic web content with JavaServer Pages and JavaServer Faces Build websites for nonbrowser clients with JAX RS Push data to web clients using Java WebSockets Secure web applications Work with web component APIs Maximize enterprise beans for multithreading asynchronous processes transactions and more Access relational databases with the Java Database Connectivity APIs and the Java Persistence API Understand the packaging and deployment mechanisms of Java EE applications Work with Java EE Contexts and Dependency Injection Secure enterprise beans in a Java EE application Enable parallel processing with Java EE concurrency APIs
