Feature Interactions in Telecommunications Systems, III Kong E. Cheng, Tadashi Ohta, 1995 In an information society heavily dependent on communications and distributed systems feature interactions are likely to become an even more important problem than they are today A particularly interesting issue given the current work on agents is whether feature interactions will be more likely in systems with many autonomous agents performing tasks The current demand for better and more convenient communications requires development of a variety of new services as quickly as possible As the number of services becomes larger however feature interactions create incompatibilities between the various functions needed to implement them In developing telecommunication systems we now spend huge numbers of person hours on software modifications and testing whenever a new function is added Much of this time is spent on detecting and eliminating problems arising from feature interaction In the future as ever more services are offered feature interactions will become a major bottleneck in the development of software for telecommunications systems This book presents opinions on the technical problems involved in feature interactions and definitions of features and feature interactions

Algebraic Methodology and Software Technology Armando M. Haeberer, 1998-12-15 AMAST's goal is to advance awareness of algebraic and logical methodology as part of the fundamental basis of software technology Ten years and seven conferences after the start of the AMAST movement I believe we are attaining this The movement has propagated throughout the world assembling many enthusiastic specialists who have participated not only in the conferences which are now annual but also in the innumerable other activities that AMAST promotes and supports We are now facing the Seventh International Conference on Algebraic

Methodology and Software Technology AMAST 98 The previous meetings were held in Iowa City USA 1989 and 1991 in Enschede The Netherlands 1993 in Montreal Canada 1995 in Munich Germany 1996 and in Sydney Australia 1997 This time it is Brazil's turn in a very special part of this colorful country Amazonia Thus if we have done more it is by standing on the shoulders of giants The effort started by Teodor Rus Arthur Fleck and William A Kirk at AMAST 89 was consolidated in AMAST 91 by Teodor Rus Maurice Nivat Charles Rattray and Giuseppe Scollo Then came modular construction of the building wonderfully carried out by Giuseppe Scollo Vangalur Alagar Martin Wirsing and Michael Johnson as Program Chairs of the AMAST conferences held between 1993 and 1997

Service Provision Kenneth J. Turner, Evan H. Magill, David J. Marples, 2005-01-28 This book provides the first overview of the service technologies available to telecoms operators working in a post convergence world Previous books have focused either on computer networks or on telecoms networks This is the first to bring the two together and provide a single reference source for information that is currently only to be found in disparate journals tool specifications and standards documents In order to provide such broad coverage of the topic in a structured and logical fashion the book is divided into 3 parts The first part looks at the underlying network support for services and aims to explain the technology that makes the user visible services possible This section covers multimedia

networking both traditional legacy and future softswitch call processing intelligent networks the Internet and Wireless networks Part 2 deals with how these services may be analysed and managed Chapters cover topics such as commercial issues service management quality of service security standards and APIs Part 3 concludes the book by looking ahead at evolving technologies and more speculative possibilities discussing the kinds of services that may be possible in the future and the technologies that will support them Focuses is on how the technology supports the services rather than on technology for its own sake Contributors drawn from both academia and industry companies such as Marconi BT Telcordia Cisco Analysys to give both theoretical and real world perspectives Unique single reference source for a wide range of material currently found only in disparate papers specs and documentation Covers brand new technologies such as JAIN JTAPI Parlay IP multimedia networking active networks WAP wireless LANs agent based services etc Managing QoS in Multimedia Networks and Services José Neuman de Souza, Raouf Boutaba, 2013-04-17 Welcome to the third International Conference on Management of Multimedia Networks and Services MMNS 2000 in Fortaleza Brazil The first MMNS was held in Montreal Canada in July 1997 and the second MMNS was held in Versailles France in November 1998 The MMNS conference takes place every year and a half and is aimed to be a truly international event by bringing together researchers and practitioners from all around the world and by organising the conference each time in a different continent country Over the past several years there has been a considerable amount of research within the fields of multimedia networking and network management Much of that work has taken place within the context of managing Quality of Service in broadband integrated services digital networks such as the ATM and more recently in IP based networks to respond to the requirements of emerging multimedia applications ATM networks were designed to support multimedia traffic with diverse characteristics and can be used as the transfer mode for both wired and wireless networks A new set of Internet protocols is being developed to provide better quality of service which is a prerequisite for supporting multimedia applications Multimedia applications have a different set of requirements which impacts the design of the underlying communication network as well as its management Several QoS management mechanisms intervening at different layers of the communication network are required including QoS routing QoS based transport QoS negotiation QoS adaptation FCAPS management and mobility management **Encyclopedia of Computer Science and Technology** Allen Kent, James G. Williams, 1999-05-14 An Approach to Complexity from a Human Centered Artificial Intelligence Perspective to The Virtual Workplace **Language Constructs for Describing Features** Stephen Gilmore, Mark Ryan, 2012-12-06 A feature is a small modification or extension of a system which can be seen as having a self contained functional role such as Call Forwarding Automatic Call back and Voice Mail in telephone services to which users can subscribe Feature interaction happens when one feature modifies or subverts the operation of another and this problem has received a great deal of attention from industry and academics especially in the field of telecommunications where new services are constantly being

developed and deployed This volume contains refereed papers resulting from the ESPRIT FIREworks working group The papers focus on the language constructs which have been developed describing features and advocate a feature oriented approach to software design including requirements specification languages and verifications logics **Intelligent Networks and Intelligence in Networks** Jorgen Norgaard,Villy Baek Iversen,2013-03-20 The IFIP International Working Conference on Intelligent Networks 95 was held at the Technical University of Denmark DTU in Copenhagen The conference was organised jointly by the Center for Tete Information at DTU and Tele Danmark Research during August 30 31 1995 and was hosted by the Center for Tete Information The conference was sponsored by IFIP TC6 The papers contained in this book are edited versions of the papers from the conference and some of the tutorial presentations that were arranged prior to the conference The mixture of tutorial papers and conference papers gives a broad and yet thorough coverage of activities and central areas of development in the IN world at this point in time Future developments especially in the area of extended mobility support and multimedia capabilities are also pre sented BACKGROUND The theme of the conference was the two major trends in Intelligent Networks IN develop ment ITU and ETSI based IN standards such as CS 1 and the upcoming CS 2 and long term development as undertaken by for example the TINA consortium and the Euro pean RACE and ACTS programmes The present IN technology based on capability sets is on its way into the networks and opera tors are pushing for open platforms to be deployed in the networks in the near future in order to obtain greater freedom in selecting platforms for service provisioning *IP Multimedia Subsystem (IMS) Handbook* Mohammad Ilyas,Syed A. Ahson,2018-10-03 Take Part in the Future of Wireless Wireline Convergence The IP multimedia subsystem IMS established as the foundation for future wireless and wireline convergence is the bedrock that will facilitate easy deployment on new rich personalized multimedia communication services that mix telecom and data services Designers planners and researchers of communication systems will need to make full use of the technology occurring with this convergence if they want to be the ones providing end users with new and efficient services that are as cost effective as they are innovative To provide researchers and technicians with the tools they need to optimize their role in this communication revolution the IP Multimedia Subsystem IMS Handbook presents all the technical aspects of the IMS needed to support the growth of digital traffic and the implementation of underlying networks This guide covers everything from basic concepts to research grade material including the future direction of the architecture Organized in three sections the book brings together the technical savvy of 50 pioneering experts from around the world providing complete coverage of relevant concepts technologies and services Learn How IMS Will Speed Innovation Filling the gap between existing traditional telecommunications and Internet technologies IMS has led to an environment in which new services and concepts are introduced more quickly than ever before such as reusable service components and real time integration The technology promises to be a cost effective evolutionary path to future wireless and wireline convergences that will meet next generation service requirements
