**Linking Industry and Ecology** Ann Dale, James Tansey, 2007-11-01 The contributors to this volume draw on their experience in a variety of disciplines to explore the origins promise and relevance of the emerging field of industrial ecology They situate industrial ecology within the broader range of environmental management strategies and concepts from the practices of pollution prevention through life cycle management to the more fundamental shift toward dematerialization and ecological design Their work not only affirms what has been learned to date in this nascent field but also provides new insight by demonstrating that technologies are socially and politically embedded This book makes a compelling argument for the need to think ecologically to develop innovative and competitive industrial policy **Linking Industry and Ecology** Ray Côté, James Tansey, Ann Dale, 2015-08-01 It might at first glance seem to many that industry and ecology make strange bedfellows For proponents of sustainable development however such a union is crucial How else are we to make the industries that are so central to modern societies consistent with our visions of a sustainable future Linking Industry and Ecology explores the origins promise and relevance of the emerging field of industrial ecology It situates industrial ecology within the broader range of environmental management strategies and concepts from the practices of pollution prevention through life cycle management to the more fundamental shift toward dematerialization and ecological design The book makes a compelling argument for the need to think ecologically to develop innovative and competitive industrial policy The contributors to this volume draw on their experience in a variety of disciplines to chart a clear path for industrial ecology Their work not only affirms what has been learned to date in this nascent field but also provides new insight for a discourse traditionally dominated by natural scientists and engineers by demonstrating that technologies are socially and politically Routledge Handbook of Urban Landscape Research Kate Bishop, Linda Corkery, 2022-12-27 Landscape embedded architecture is one of the key professions dedicated to making cities hospitable and healthy places to live work and play while respecting and enhancing the natural environments and landscapes we inhabit This edited collection presents current writing about the pivotal roles that landscape architects play in addressing some of the most pressing problems facing the planet its environments and its populations through their research analysis and speculative practice. The book has assembled current writings on recent research structured around five major themes governance power and partnership infrastructure systems and performance environment resilience and climate change people place and design and culture heritage and identity As a collection the chapters demonstrate the diversity of themes and topics that are expanding the scholarly body of knowledge for the discipline and its relevance to the practice of landscape architecture The contributors to this book are academic researchers and practitioners from the discipline of landscape architecture The chapters draw on their research teaching and experience as well as analysis of project examples Fifty two contributors from the United Stsates United Kingdom Sweden Denmark the Netherlands Nigeria Malaysia Spain Colombia Australia New Zealand and Canada discuss a

diverse range of contemporary themes in urban landscape architecture Collectively the contributors demonstrate the breadth of experience shared concerns and distinct issues that challenge urban landscape architecture and cities in the 21st century

SME Mining Engineering Handbook, Third Edition Peter Darling, Society for Mining, Metallurgy, and Exploration (U.S.), 2011 This third edition of the SME Mining Engineering Handbook reaffirms its international reputation as the handbook of choice for today s practicing mining engineer It distills the body of knowledge that characterizes mining engineering as a disciplinary field and has subsequently helped to inspire and inform generations of mining professionals Virtually all of the information is original content representing the latest information from more than 250 internationally recognized mining industry experts Within the handbook s 115 thought provoking chapters are current topics relevant to today s mining professional Analyzing how the mining and minerals industry will develop over the medium and long term why such changes are inevitable what this will mean in terms of challenges and how they could be managed Explaining the mechanics associated with the multifaceted world of mine and mineral economics from the decisions associated with how best to finance a single piece of high value equipment to the long term cash flow issues associated with mine planning at a mature operation Describing the recent and ongoing technical initiatives and engineering developments in relation to robotics automation acid rock drainage block caving optimization or process dewatering methods Examining in detail the methods and equipment available to achieve efficient predictable and safe rock breaking whether employing a tunnel boring machine for development work mineral extraction using a mobile miner or cast blasting at a surface coal operation Identifying the salient points that dictate which is the safest most efficient and most versatile extraction method to employ as well as describing in detail how each alternative is engineered Discussing the impacts that social and environmental issues have on mining from the pre exploration phase to end of mine issues and beyond and how to manage these two increasingly important factors to the benefit of both the mining companies and other stakeholders **Urban Sustainability** Ann Dale, William Dushenko, Pamela J. Robinson, 2012-09-24 Given ongoing concerns about global climate change and its impacts on cities the need for sustainable planning has never been greater This book explores concrete ways to achieve urban sustainability based on integrated planning policy development and decision making Urban Sustainability is the first book to provide an applied interdisciplinary perspective on the challenges and opportunities that lay ahead in this area Bringing together researchers and practitioners to explore leading innovations on the ground this volume combines the theoretical underpinnings of urban sustainability with current practices through highly readable narrative case studies The contributors also provide fresh perspectives on how issues related to sustainable urban planning and development can be reconciled through collaborative partnerships and engagement processes **Public Spaces for Water** Maria Matos Silva, 2019-12-06 This illustrated notebook highlights the need for a change of paradigm in current flood management practices one that acknowledges the wide ranging and interdisciplinary benefits brought by public space design Reassessing and improving

established flood management methods public spaces are faced with a new and enhanced role as mediators of flood adaptation able to integrate infrastructure and communities together in the management of flood water as an ultimate resource for urban resilience. The book specifically introduces a path towards a new perspective on flood adaptation through public space design stressing the importance of local bottom up approaches Deriving from a solution directed investigation which is particularly attentive to design the book offers a wide range of systematized conceptual solutions of flood adaptation measures applicable in the design of public spaces Through a commonly used vocabulary and simple technical notions the book facilitates and accelerates the initial brainstorm phases of a public space project with flood adaptation capacities enabling a direct application in contemporary practice Furthermore it offers a significant sample of real case examples that may further assist the decision making throughout design processes Overall the book envisions to challenge established professionals such as engineers architects or urban planners to work and design with uncertainty in an era of an unprecedented climate Landscape and Agency Ed Wall, Tim Waterman, 2017-10-16 Landscape and Agency explores how landscape as an idea a visual medium and a design practice is organized appropriated and framed in the transformation of places from the local to the global It highlights how the development of the idea of agency in landscape theory and practice can fundamentally change our engagement with future landscapes Including a wide range of international contributions each illustrated chapter investigates the many ways in which the relationship between the ideas and practices of landscape and social and subjective formations and material processes are invested with agency They critically examine the role of landscape in processes of contemporary urban development environmental debate and political agendas and explore how these relations can be analysed and rethought through a dialogue between theory and practice Carbon Governance, Climate Change and Business Transformation Adam Bumpus, James Tansey, Blas Luis Pérez Henríquez, Chukwumerije Okereke, 2014-07-17 Transformation to a low carbon economy is a central tenet to any discussion on the solutions to the complex challenges of climate change and energy security Despite advances in policy carbon management and continuing development of clean technology fundamental business transformation has not occurred because of multiple political economic social and organisational issues Carbon Governance Climate Change and Business Transformation is based on leading academic and industry input and three international workshops focused on low carbon transformation in leading climate policy jurisdictions Canada USA and the UK under the international Carbon Governance Project CGP banner The book pulls insights from this innovative collaborative network to identify the policy combinations needed to create transformative change It explores fundamental questions about how governments and the private sector conceptualize the problem of climate change the conditions under which business transformation can genuinely take place and key policy and business innovations needed Broadly the book is based on emerging theories of multi levelled multi actor carbon governance and applies these ideas to the real world implications for tackling climate change through business transformation

Conceptually and empirically this book stimulates both academic discussion and practical business models for low carbon transformation Environment and Planning, 2006 Journal of urban planning and design Publishes research in the application of formal methods methods models and theories to spatial problems involving the built environment and the spatial structure of cities and regions Includes the application of computers to planning and design in particular the use of shape grammars artificial intelligence and morphological methods to buildings and towns the use of multimedia and GIS in urban and regional planning and the development of ideas concerning the virtual city Green Ethics and Philosophy Julie Newman, 2011-06-28 Covers the moral relationship between humans and their natural environment specifically targeting the Health and Sustainability in the Canadian Food System Rod MacRae, Elisabeth contemporary green movement Abergel, 2012-07-18 Civil society organizations are among the most vociferous critics of the modern food system Yet even after decades of campaigns governments have failed to address health and sustainability issues in a systematic way New approaches are in order and this volume showcases the research of experts from various disciplines who argue that solutions lie not just in lobbying elected officials but rather in initiatives at the subparliamentary level Case studies on a range of topics from breastfeeding and sustainable pest management promotion to programs such as Canada's Action Plan on Food Security tell a story of misquided campaigns and missed opportunities Real change this inspiring volume suggests is possible It will come when advocacy groups develop innovative strategies of influencing decision makers more resistant to public pressure business lobbies well connected to government agencies middle managers and ministries unused to collaborating across Policies for Sustainably Managing Canada's Forests Martin K. Luckert, David Haley, George departmental mandates Hoberg, 2011-09-15 With more than three guarters of Canada's forests under provincial control provincial forest policies are crucial for encouraging the sustainable management of the nation s forests Forest tenures which allow private companies to manage public forest resources are the key policy tool that provinces use to balance the requirements of sustainable management with the economic concerns of the forest industry By offering an up to date comparative examination of contemporary provincial forestry policies this book provides forest managers policy makers scholars and students with the information and concepts to critically examine Canada's complex forest tenure systems. The authors look at tenure stumpage fees and other forest practices to assess how well different provincial schemes achieve the goals of sustainable forest management They identify a number of essential policy attributes that could be used to guide tenure reform consider potential barriers that could prevent meaningful change and offer much needed practical guidance on overcoming these **Empowering Electricity** Julie L. MacArthur, 2016-07-13 Canada is known for being an energy producing obstacles nation with much attention being paid to the Alberta tar sands and their large carbon footprint This book looks at a very different part of the Canadian energy sector the hundreds of renewable energy co ops that have sprung up across the nation These co ops are democratically structured community based organizations that use sun wind rivers tides and plant and

animal waste as sources of local power generation Empowering Electricity offers an illuminating analysis of these co ops within the context of larger debates over climate change renewable electricity policy sustainable community development and provincial power sector ownership It looks at the conditions that led to this new wave of co operative development examines their form and location and shines a light on the promises and challenges accompanying their development Sea Change Ussif Rashid Sumaila, Derek Armitage, Megan Bailey, William W.L. Cheung, 2024-04-01 As climate change resource overexploitation and pollution leave ever more visible marks ocean ecosystems economies and people are all affected With coasts on the Atlantic Pacific and Arctic Canada faces a formidable challenge in building resilient sustainable oceans and supporting the communities that rely on them Sea Change reports on the OceanCanada Partnership a multidisciplinary project to take stock of what we know about Canada's oceans construct possible scenarios for coastal regions and create a national dialogue and vision Three themes emerge from this impressive synthesis of social cultural economic and environmental research ocean change access to ocean resources and ocean governance Indigenous and non Indigenous scholars and practitioners focus on finding solutions to rapid environmental and social transformation outlining the implications for legislation and offering policy recommendations Increasingly civil society will have to advocate for oceans and Sea Change will empower the voices of those who take up that task Sustainable Production Glen Toner, 2011-11-01 The issues associated with sustainable production are among the most important facing the world in the early 21st century While most of the scholarship in this area has been produced in the United States and Europe not much has been written from a Canadian perspective Sustainable Production establishes a Canadian presence in the sustainable production debate by analyzing the opportunities and constraints facing the public and private sectors as Canada strives to move public policy and industrial practice forward Sustainable production envisions an industrial system that would maximize resource efficiency minimize environmental impacts and replenish natural capital while providing safe and satisfying employment Striving for Environmental Sustainability in a Complex World George Francis, 2017-01-18 In the face opportunities of growing anxiety about the environmental sustainability of the world George Francis a leading authority in the field of sustainability studies examines initiatives undertaken in Canada over the past twenty five years to protect some of our unique environments With rich and varied insight spirited prose and a deep and personal engagement with the material the author documents the challenges faced by those who manage complex sustainability projects Focusing mainly on collaborative studies of sixteen landscape regions designated as Biosphere Reserves by UNESCO and fifteen regions designated as Model Forests by the Canadian Forest Service the book also summarizes a number of smaller sustainability initiatives in regions across the country The author concludes on a hopeful note looking forward to a future of solutions those considered proposed promoted and in some cases already implemented by groups striving to create sustainable societies in an increasingly complex world Adaptive Co-Management Derek Armitage, Fikret Berkes, Nancy Doubleday, 2010-10-01 In Canada and

around the world new concerns with adaptive processes feedback learning and flexible partnerships are reshaping environmental governance Meanwhile ideas about collaboration and learning are converging around the idea of adaptive co management This book provides a comprehensive synthesis of the core concepts strategies and tools in this emerging field informed by a diverse group of researchers and practitioners with over two decades of experience It also offers a diverse set of case studies that reveal the challenges and implications of adaptive co management thinking Farming in a Changing Climate Ellen Wall, Barry Smit, Johanna Wandel, 2011-11-01 In farming systems across Canada effective risk management is necessary to deal with drought flooding and extreme weather and to adapt to altered climate and weather conditions Unfortunately climate change risks and opportunities are not always well understood among researchers and policy makers in the Canadian agri food sector This book addresses that gap by providing a wide ranging synopsis of what climate change means for Canadian agriculture exploring different approaches to the topic and presenting examples of current research It covers all agricultural regions and a wide variety of commodity production and farming systems This comprehensive survey synthesizes twenty years of research on climate change and Canadian agriculture Design, Ecology, Politics Joanna Boehnert, 2018-02-08 Design Ecology Politics links social and ecological theory to design theory and practice critiquing the ways in which the design industry perpetuates unsustainable development Boehnert argues that when design does engage with issues of sustainability this engagement remains shallow due to the narrow basis of analysis in design education and theory The situation is made more severe by design cultures which claim to be apolitical Where design education fails to recognise the historical roots of unsustainable practice it reproduces old errors New ecologically informed design methods and tools hold promise only when incorporated into a larger project of political change Design Ecology Politics describes how ecological literacy challenges many central assumptions in design theory and practice By bringing design ecology and socio political theory together Boehnert describes how power is constructed reproduced and obfuscated by design in ways which often cause environmental harms She uses case studies to illustrate how communication design functions to either conceal or reveal the ecological and social impacts of current modes of production The transformative potential of design is dependent on deep reaching analysis of the problems design attempts to address Ecologically literate and critically engaged design is a practice primed to facilitate the creation of viable sustainable and just futures With this approach designers can make sustainability not only possible but attractive **How Digital Intelligence Drives Business Growth** Zhizhuan Business Research Institute, 2023-11-23 This book aims to build a framework for understanding how to achieve new business growth through digital intelligence It reveals the driving force and commercial logic behind the technology upgrade and transformation for enterprises analyzes how to improve enterprises branding product distribution channel marketing logistics and organization under the new context and studies the successful cases in digital intelligence of 6 Chinese enterprises For business school students researchers managers and practitioners it is helpful to build an overview and

understanding on strategy level as well as practice level
