Electronic Cataloging Sheila S. Intner, Sally C. Tseng, Mary Lynette Larsgaard, 2024-11-15 Examine some of the most recent developments in bibliographic control Electronic Cataloging AACR2 and Metadata for Serials and Monographs is a collection of papers about recent developments in metadata and its practical applications in cataloging Acknowledged experts examine a wide variety of techniques for managing serials and monographs using standards and schemas like MARC AACR2 ISSN ISBD and Dublin Core From the broadest introduction of metadata usage to the revisions of AACR2 through 2000 this book offers vital analysis and strategy for achieving Universal Bibliographic Control Electronic Cataloging is divided into three parts The first is an introduction to metadata what it is and its relationship to the library in general The second portion focuses in more on how metadata can be utilized by a library system and the possibilities in the near future The third portion is very specific dealing with individual standards of metadata and elements such as AACR2 and MARC as well as current policies and prospects for the future Information covered in Electronic Cataloging includes an overview of metadata and why it is important to the cataloging community Universal Bibliographic Control what has succeeded so far in cataloging and how metadata will evolve the step by step process for creating an effective metadata repository for the community the inherent problems that accompany cataloging nonprint research materials such as electronic serials and the Web metadata schemas and the use of controlled vocabularies and classification systems standards of metadata including MARC Dublin Core RDF and AACR2 with emphasis on the revisions and efforts made with AACR2 through 2000 an overview of the ISSN International

Serials Standard Number and its relationships to current codes and metadata standards including AACR2 and much more Electronic Cataloging is the undertaking of three pioneers in library sciences Sheila S Intner Sally C Tseng and Mary L Larsgaard who co edited Maps and Related Cartographic Materials Cataloging Classification and Bibliographic Control Haworth 2000 With illustrations references additional reading lists and case studies this research tool offers you tips and strategies to make metadata work for you and your library No one currently involved in information cataloging should be without this book *Libraries Act on Their LibQUAL+ Findings* Fred M. Heath, Martha Kyrillidou, Consuella A. Askew, 2004 Documents the monumental impact of having a large community of libraries talking to a large community of users Provided by Publisher **The Architecture of Rome** Ulrich Fürst, 1998 Architects and artists have always acknowledged over the centuries that Rome is rightly called the eternal city Rome is eternal above all because it was always young always in its prime Here the buildings that defined the West appeared over more than 2000 years here the history of European architecture was written The foundations were laid even in ancient Roman times when the first attempts were made to design interiors and thus make space open to experience as something physical And at that time the Roman architects also started to develop building types that are still valid today thus creating the cornerstone of later Western architecture In it Rome's primacy remained unbroken whether it was with old St Peter's as the first medieval basilica or new St Peter's as the building in which Bramante and Michelangelo developed the High Renaissance or with works by Bernini and Borromini whose rich and lucid spatial forms were to shape Baroque as far as Vienna Bohemia and Lower Franconia and also with Modern buildings of which there are many unexpected pearls to be found in Rome All this is comprehensible only if it is presented historically i e in chronological sequence and so the guide has not been arranged topographically as usual but chronologically This means that one is not led in random sequence from a Baroque building to an ancient or a modern one but the historical development is followed successively Every epoch is preceded by an introduction that identifies its key features This produces a continuous lavishly illustrated history of the architecture of Rome and thus at the same time of the whole of the West Practical handling is guaranteed by an alphabetical index and detailed maps whose information does not just immediately illustrate the historical picture but also makes it possible to choose a personal route through history

Collection Development in a Digital Environment Sul H Lee, 2023-05-31 Librarians and other library professionals will find this informative book chock full of thought provoking papers that will help you find new solutions to the collection development problems your library may experience while facing this new digital age Collection Development in a Digital Environment is a result of papers presented at the 1998 University of Oklahoma Libraries Conference You will discover ways to help your library take the lead in advancing the academic agenda through technology while at the same time learning how technology requires change in the way libraries themselves operate Collection Development in a Digital Environment explores ethical and technological

dilemmas of collection development and gives several suggestions on how your library can successfully deal with these challenges and provide patrons with the information they need This guide covers many valuable ways that your library can be better prepared for developing a user friendly collection of materials in this new digital age You will discover how methods to shift your library from buying materials for collections for faculty or students that may need them sporadically to a system of responsiveness and customization where just in time and just for you are the standards of information access making you and your library both time effective and cost effective Collection Development in a Digital Environment brings to light many ways in which libraries can improve collection development methods such as using the Association of Research Libraries ARL initiatives to improve global access to information such as the Global Resources Program which features a seamless web of interconnected coordinated and interdependent research collections that are electronically accessible to users examining discussions on scenario driven planning and the benefits of having your patrons let you know what they are interested in instead of guessing what materials they may be interested in analyzing the influence of the World Wide Web on the role of libraries to discover how you can use these ideas to expand the collection of materials in your library gaining insight into how the concept of disintermediation in the publishing process will help libraries use the electronic environment to eliminate intermediate sources and collect materials directly from the publisher thus saving time and money From the insightful chapters in Collection Development in a Digital Environment you will find new and successful ways to use the new digital environment to enhance collection development in your library This unique book will help your library be more digitally accessible while still being user friendly to your clientele *The Economics of Information in the Networked Environment* Meredith A. Butler, Bruce R. Kingma, 1999 Originally published in 1996 by the Association of Research Libraries as conference proceedings and currently co published as Journal of Library Administration v 26 no 1 2 1998 Presents papers addressing many of the digital information cost issues that affect libraries including electronic publishing intellectual property rights resource sharing document delivery and institutional investment in digital resources No index Annotation copyrighted by Book News Inc Portland OR *Evaluating the Twenty-First Century Library* Donald L. DeWitt, 2013-10-31 Explore the ARL s initiatives for identifying formulating and testing new criteria for evaluating academic libraries in the digital age The proliferation of electronic information resources in the past decade has changed the ways in which research libraries evaluate their service and holdings This collection of articles thirteen of which previously appeared in ARL s bimonthly newsletter report on research issues and actions examines new measures for library evaluation that are being developed by the Association of Research Libraries It presents an overview of how the Association of Research Libraries new measures initiative developed plus insightful reports on the details of the SERVQUAL LibQUAL and E metrics projects Handy flow charts and tables make the information easily accessible and understandable From the editor The profound changes in library management and collection development brought about by digital technology in the closing decade of the twentieth

century have changed the way we think about libraries If we were to ask librarians who have been in the profession for more than a decade how they evaluated a library we probably would hear statistics about the number of volumes held and added annually the number of serial subscriptions how much money a library has to spend and how many professionals are on staff These are the traditional criteria by which libraries have been judged throughout much of the twentieth century Newer librarians however especially those who entered the profession in the late 1980s and 1990s use a different yardstick and frequently recite different statistics that include terms such as user satisfaction spending on electronic resources and services document delivery services numbers of databases and electronic journals available and services provided to distance learners In Evaluating the Twenty First Century Library you ll find valuable information on current performance measures for academic libraries the continuing search for accurate new performance measures the uses of learning outcomes assessment SERVQUAL LibQUAL and the ARL LibQUAL Pilot Project the results of the 2000 Symposium on Measuring Library Service Quality the uses of E metrics in assessing the academic networked environment and accurately measuring use users services resources and other factors an insightful discussion of the rise in spending on electronic information by research libraries
