**Profiles of Personality (Second Edition)** Eugene DeRobertis, 2021-06-14 *Profiles of Personality* offers a refreshingly different approach to learning personality Designed to serve as a primary or supplementary textbook for courses on personality theory *Profiles of Personality* gently guides the reader to go beyond learning about the theories of personality to encouraging critical thought about them Drawing on many years of teaching experience DeRobertis writes in an accessible engaging manner that keeps the reader engaged The second edition of this text has been expanded and updated with over 100 pages of new content Personality textbooks come in two forms each with their own style of organizing content They will either be organized in terms of historical affiliation e.g. Freud and those theories that are historically affiliated with Freud etc or they will offer a series of disparate research foci Both approaches make it difficult for students to

attain a coherent synoptic grasp of the subject matter Profiles of Personality offers an alternative It presents personality theories on the basis of a meta narrative that guides the student through an unfolding story of personality and personal becoming The meta narrative of the text reflects the whole person emphasis that gave rise to the study of personality in the first place As Walter Mischel once noted the study of personality was intended to become the meta discipline for integrating the findings and general principles of psychology as a whole as they speak to the person as a whole In contrast to the most contemporary texts take a more restrictive approach the current text returns to the macro integrative orientation of those early 20th Century personality theorists who helped to bring about the emerging humanistic revolution in psychology The macro integrative orientation has always been guided by the deeply held belief that the personality psychologist should not conflate objectivity with the objectification of the person or the personality The aim of the approach is to be theoretically open inclusive and capable of speaking to the fullness of human existence its drama far beyond the aims of adaptation to given biosocial conditions Macro integrative investigations target the full range of human experience from highly conflicted forms of pathology to highly self transcendent forms of personal fulfillment Beginning with the contributions of the micro integrative tradition Profiles of Personality moves progressively deeper into the world of macro integrative theorizing increasingly exposing the role of paradox in the differential integrative process of personality formation Highlights of this new edition include brief discussions of gerotranscendence gender and education additions to the analysis of narrative and an expanded section on multiculturalism and the ecopsychological culture of place
