millions of others and have the potential to change the world From our unknown ancestors who made the first stone tools to those people in Northern Ireland who managed to put aside their differences in order to create a better future for their children from the most powerful man in the world deciding not to start a nuclear war to a woman on a bus standing up for her rights refusing to move seats History's Greatest Decisions looks at well known and not so well known examples of people who made the crucial decisions and got them right

**Leadership in a VUCA World** Michael Fuchs, Jochen Messner, Robert Sok, 2018-08-02 VUCA is not just another acronym. Originally coined by the American military to describe a situation fraught with a variety of challenges, it now has a permanent place in the realms of strategic leadership. Those who have made it into an enterprise management role are finding that their leadership skills are truly being tried and tested on account of the volatile, uncertain, complex, and ambiguous environment we are in. Agility is now the name of the game. Developing one's leadership skills to match this requirement and to not only surmount the challenges posed by the VUCA world but do so in a mature and authentic way is what this book is all about. It gently submerges the reader into an impressive tank of knowledge that the authors, experts in the field of personal development, have amassed during their careers. Psychology, mythology, and examples of real-life enterprises are accompanied by the excellent analogy of one of our best-known heroes, Luke Skywalker of the Star Wars films, to illustrate that there is nothing to fear; that we all have the potential to act courageously. At regular intervals throughout the book, the reader is presented with thought-provoking questions and statements the answers to which will help them eventually resurface with a clear picture of how to use their skills and talents to motivate themselves and others to proceed wisely in the corporate landscape.

Want to know what it's actually like to study languages at degree level? This book tells you what you need to know. Studying any subject at degree level is an investment in the future that involves significant cost. Now more than ever, students and their parents need to weigh up the potential benefits of university courses. That's where the Why Study series comes in. This series of books, aimed at students, parents, and teachers, explains in practical terms the range and scope of an academic subject at university level and where it can lead in terms of careers or further study. **Nuclear Proliferation and International Security** Sverre Lodgaard, Bremer Maerli, 2007-06-11 The Nuclear Non-Proliferation Treaty has long been key in non-proliferation and disarmament activities. The Treaty is the major international legal obstacle for states seeking nuclear weapon capabilities. In retrospect and despite setbacks, the overall impact of the Nuclear Non-Proliferation Treaty has been significant and gratifying. Its continued success is by no means guaranteed. As old nuclear dangers persist and new ones evolve, policies to halt nuclear proliferation are more disparate than at any other time. Nuclear weapons remain an essential part of the security policies of leading states, and many developmental states maintain strong nuclear weapon ambitions while terrorists have actively been seeking nuclear capabilities. In search of an overarching strategy that recognizes both the flaws

of the existing non proliferation regime and the value of some of the corrections proposed by regime critics this volume assesses contemporary efforts to stem nuclear proliferation In doing so Nuclear Proliferation and International Security examines a number of cases with a view to recommending better non proliferation tools and strategies The contributors comprise renowned international scholars who have been selected to obtain the best possible analyses of critically important issues related to international non proliferation dynamics and the future integrity of the Non Proliferation Treaty **A**
