Working Mother ,2002-10 The magazine that helps career moms balance their personal and professional lives **3D Printing in Mathematics** Maria Trnkova,Andrew Yarmola,2023-11-07 This volume is based on lectures delivered at the 2022 AMS Short Course 3D Printing Challenges and Applications held virtually from January 3 4 2022 Access to 3D printing facilities is quickly becoming ubiquitous across college campuses However while equipment training is readily available the process of taking a mathematical idea and making it into a printable model presents a big hurdle for most mathematicians

Additionally there are still many open questions around what objects are possible to print how to design algorithms for doing so and what kinds of geometries have desired kinematic properties This volume is focused on the process and applications of 3D printing for mathematical education research and visualization alongside a discussion of the challenges and open mathematical problems that arise in the design and algorithmic aspects of 3D printing The articles in this volume are focused on two main topics The first is to make a bridge between mathematical ideas and 3D visualization The second is to describe methods and techniques for including 3D printing in mathematical education at different levels from pedagogy to research and from demonstrations to individual projects We hope to establish the groundwork for engaged academic discourse on the intersections between mathematics 3D printing and education

Socioculturally Responsive Assessment

Randy E. Bennett, Linda Darling-Hammond, Aneesha Badrinarayan, 2025-05-01 Socioculturally Responsive Assessment assembles the best available thinking from within and outside the educational measurement community about the theoretical foundations and systems level policy implications of formal assessment programs designed to be socioculturally responsive Synthesized from culturally responsive assessment design and practices culturally relevant pedagogy and funds of knowledge universal design for learning the learning sciences and other literatures this emerging concept affirms that students learning and performance is inextricably tied to the social cultural and linguistic contexts in which they live and develop knowledge Across four sections this book provides an argument and initial evidence for impact on students users and assessment quality offers guidance for implementation and examines the potential limitations pitfalls barriers and measurement issues that such programs will inevitably raise Scholars teaching faculty test developers and policymakers will come away with integral foundations new assessment approaches and a greater sense of the potential for positive impact that these assessments may afford
