The Groundwork of English Intonation Roger Kingdon, 1958      **Intonation and Stress** L. Varga, 2002-07-16 This is the first comprehensive account of Hungarian stress and intonation to appear in English The emphasis is on description but a large number of theoretical issues are also dealt with in an original way Hungarian is a Uralic or Finno Ugric language spoken by over thirteen million people in Central Europe The study of its stress and intonation will be of special interest to intonationists phonologists Hungarian language specialists and their students at intermediate level and above      **Stress,**

**Rhythm and Intonation Adapted from a Course of English Pronunciation** J. D. O'Connor, 1959      **Perceptual Training on Lexical Stress Contrasts** Shu-chen Ou, 2020-06-23 This book presents the effects of perceptual training on the perception of English lexical stress in rising intonation by Mandarin speaking EFL learners in Taiwan and shows that these effects can be positive as well as negative The book is of interest to researchers in lexical stress and intonation or issues related to acquisition of L2 suprasegmentals and native language impact on this process as well as for those designing a training course on lexical stress for EFL learners particularly those with a tone language background Learning to perceive non native sound contrasts can be a formidable task particularly when learners can't rely on cues from their native language experience A case in point is Mandarin speaking EFL learners perception of lexical stress They can accurately identify the stress patterns of target words in sentences that have a falling intonation However they experience considerable difficulties when the target words are in questions where the intonation is rising Where most training studies use only stimuli produced in falling intonation we implemented a perceptual training program to examine whether Mandarin speaking EFL learners could learn to perceive English lexical stress in both falling intonation and rising intonation      *Stress, Rhythm and*

*Intonation* J. D. O'Connor, 1975      **The Intonation of American English** Kenneth Lee Pike, 1979 This study explains the structure of the English intonation system in relation to the structural systems of stress pause and rhythm      **Stress and intonation** English Language Services, Inc, 1967      Discourse Intonation in L2 Dorothy M. Chun, 2002 Intonation rhythm and general melody of language are among the first aspects of speech that infants attend to and produce themselves Yet these same features are among the last to be mastered by adult L2 learners Why is this and how can L2 learners be helped This book first presents the latest linguistic theories of intonation in particular how intonation functions in discourse not only to signal sentence types and attitudinal meanings but also to provide turn taking and other conversational cues The second part of the book examines the research in applied linguistics on the acquisition of L2 phonology and intonation The third section offers practical applications of how to incorporate the teaching of intonation into L2 instruction with a focus on using new speech technologies The accompanying CD ROM makes a unique addition in allowing for simultaneous audio playback and visual display of the pitch contours of utterances contained in the book Users can start or stop the playback at any point

in the utterance and can observe first hand how such visual and audio representations could be useful for L2 learners
