Vivaldi Michael Talbot, 2017-07-05 Since 1978 the 300th anniversary of Vivaldi's death there has been an explosion of serious writing about his music life and times Much of this has taken the form of articles published in academic journals or conference proceedings some of which are not easy to obtain The twenty two articles selected by Michael Talbot for this volume form a representative selection of the best writing on Vivaldi from the last 30 years featuring such major figures in Vivaldi research as Reinhard Strohm Paul Everett Gastone Vio and Federico Maria Sardelli Aspects covered include biography Venetian cultural history manuscript studies genre studies and musical analysis The intention is to serve as a first port of call for those wishing to learn more about Vivaldi or to refresh their existing knowledge An introduction by Michael Talbot reviews the state of Vivaldi scholarship past and present and comments on the significance of the articles [Vivaldi's](#)

[Music for Flute and Recorder](#) Michael Talbot, 2017-07-05 Federico Maria Sardelli writes from the perspective of a professional baroque flautist and recorder player as well as from that of an experienced and committed scholar in order to shed light on the bewildering array of sizes and tunings of the recorder and transverse flute families as they relate to Antonio Vivaldi's compositions Sardelli draws copiously on primary documents to analyse and place in context the capable and surprisingly progressive instrumental technique displayed in Vivaldi's music The book includes a discussion of the much disputed chronology of Vivaldi's works drawing on both internal and external evidence Each known piece by him in which the flute or the recorder appears is evaluated fully from historical biographical technical and aesthetic standpoints This book is designed to appeal not only to Vivaldi scholars and lovers of the composer's music but also to players of the two instruments students of organology and those with an interest in late baroque music in general Vivaldi is a composer who constantly springs surprises as even today new pieces are discovered or old ones reinterpreted Much has happened since Sardelli's book was first published in Italian and this new English version takes full account of all these new discoveries and developments The reader will be left with a much fuller picture of the composer and his times and the knowledge and insights gained from minutely examining his music for these two wind instruments will be found to have a wider relevance for his work as a whole Generous music examples and illustrations bring the book's arguments to life **The Vivaldi**

"Composition, Chromaticism and the Developmental Process " Henry Burnett,2017-07-05 Musicology having been transmitted as a compilation of disparate events and disciplines has long necessitated a magic bullet a unified field theory so to speak that can interpret the steady metamorphosis of Western art music from late medieval modality to twentieth century atonality within a single theoretical construct Without that magic bullet discussions of this kind are increasingly complicated and to make matters worse the validity of any transformational models and ideas of the natural evolution of styles is questioned and even frowned upon today as epitomizing a grotesque teleological bigotry Going against current thinking Henry Burnett and Roy Nitzberg claim that the teleological approach to observing stylistic change is still valid when considered from the purely compositional perspective The authors challenge the traditional understanding of development and advance a new theory of eleven pitch tonality as it relates to the corpus of Western composition The book plots the evolution of tonality and its bearing on style and the compositional process itself The theory is not based on the diatonic aspect of the various tonal systems exploited by composers rather the theory is chromatically based the chromatically inflected octave being the source not only of a highly ingenious developmental dialectic but also encompassing the moment

to moment progression of the musical narrative itself Even the most profound teachings of Schenker and the often startlingly original and worthwhile speculations of Riemann Tovey Dahlhaus and others still provide no theory of development and so are ultimately unable to unite the various tendrils of the compositional organism into a unified whole Burnett and Nitzberg move beyond existing theory and analysis to base their theory from the standpoint of chromatic pitch fields These fields are the specific chromatic pitch choices that a composer uses to inform and design a complete composition utilizing
