their lives carrying a higher risk of infection compared to the general population and working in high risk environments while mourning for their colleagues and still being obligated to work for extended hours under these conditions Additionally vaccination procedures have been difficult and problematic particularly in developing countries where full coverage has been difficult to achieve This Research Topic aims to cover topics related to the impact and challenges of the pandemic and syndemic on pediatric healthcare focusing on specific areas such as the prehospital system emergency departments ICUs medical branches preventive medicine rehabilitation sports medicine and infection surveillance *Emergency Care and Transportation of the Sick and Injured* Benjamin Gulli, Joseph A.
