aiming to determine whether the same pattern could be used to explain the happiness index In order to represent the applications of fuzzy set theory as well as neuro fuzzy in industry a literature review of these topics is carried out As some researchers have efficiently utilized fuzzy logic and neuro fuzzy in depth discussions are provided for stimulating future investigations Following this using the L Zadeh theory of fuzzy sets the authors consider all types of uncertainties in oil fields and oil production to make a decision as to what model is best in such a fuzzy environment Additionally several challenges are explored such as the fuzzy random finite difference numerical method possibilistic uncertainty modeling and the development of a fuzzy Wilks theorem to model the hybrid structure of randomness and fuzziness modeling In closing a standard fuzzy arithmetic method is used for solving fuzzy equations as well as for the optimization of fuzzy objectives The fuzzy variable of the equation is fuzzified using a fuzzy set
