History's Greatest Decisions Bill Price, 2017-01-29 History's Greatest Decisions identifies and profiles the many important and difficult decisions leaders have made through history which shaped the world as we know it today One of the defining features of being human is our capacity for complex problem solving Most of the time we deal with mundane concerns like what to have for breakfast or which pair of shoes to wear but occasionally people face decisions about rather weightier matters History's Greatest Decisions is concerned with this second category those important and difficult decisions which only a very few people get to make and which can impact on the lives of millions of others and have the potential to change the world From our unknown ancestors who made the first stone tools to those people in Northern Ireland who managed to put aside their differences in order to create a better future for their children from the most powerful man in the world deciding not to start a nuclear war to a woman on a bus standing up for her rights refusing to move seats History's Greatest Decisions looks at well known and not so well known examples of people who made the crucial decisions and got them right

Making Great Decisions in Business and Life David R. Henderson, Charles L. Hooper, 2006 The phrase work smarter not harder has been repeatedly ridiculed in the Dilbert comic strip and elsewhere not because it is a bad idea but because it is thrown like a brick lifesaver to drowning employees To tell someone to work smarter is like telling someone to be happier healthier and richer It is not much help to merely repeat the objective what people need

is a plan for achieving the objective In Making Great Decisions we show our readers how to achieve their objectives We write to help those in business and those in the business of life i e everyone to work smarter Our ideas are both simple and powerful We offer a better way to look at problems so that the solutions are easier to find We help supplement our readers clear thinking by summarizing some of the most powerful techniques we have discovered Have you ever driven through corn country From a distance all you see are corn stalks and more corn stalks in a jumbled mess Then suddenly when you get closer your perspective changes and you can see down the rows and realize that the corn was planted perfectly in straight lines Your perception of the crop changes from a messy jumble to a clear picture simply because you re in the right spot This book puts readers in that ideal spot So many problems seem like hopeless jumbles but then when you start using the techniques we discuss here they start to look as straightforward as the straightest line in an Iowa cornfield What motivated us to write this book is that over the years both of us have regularly come across people in organizations often bright people with MBAs or other graduate degrees who don t think they have time energy or skills to make good decisions They have many clues but don t know how to put them together They regularly face situations that they could analyze with some of the tools they learned in their courses but they don t realize that We don t hold ourselves apart from this group and stories of our successes and failures are sprinkled throughout Making Great Decisions in Business and Life Great Decisions of the U.S. Supreme Court Maureen Harrison, Steve Gilbert, 2003 Making Good Decisions Michael Preston-Shoot, 2019-05-14 What does the law require of social workers when deciding how to intervene to protect children and adults at risk What social work standards should guide decisions about whether when and how to invoke statutory powers and duties in practice Making Good Decisions provides an accessible and practical guide to the legal rules and principles that should guide everyday social work practice It sets out the key elements of administrative law equality and human rights legislation which shape how social workers practise and illustrates how knowledge and use of legal principles can support core social work goals including empowerment equality and social justice An invaluable reference point for all students and practitioners this book will support and empower social workers to feel more confident in making and challenging decisions more credible when presenting assessments and plans and more creative when working with service users and carers The text is supported by a range of innovative features and boxed information to aid learning and stimulate reflection Key Case Analysis boxes summarise the details of particular legal cases and outline the implications for social work practice Practice Focus boxes apply legal principles and processes to practice through the use of social work scenarios On The Spot Questions reinforce understanding and encourage critical reflection Big Data for Big Decisions Krishna Pera, 2022-12-30 Building a data driven organization DDO is an enterprise wide initiative that may consume and lock up resources for the long term Understandably any organization considering such an initiative would insist on a roadmap and business case to be prepared and evaluated prior to approval This book presents a step by step methodology in order to create a roadmap and business

case and provides a narration of the constraints and experiences of managers who have attempted the setting up of DDOs. The emphasis is on the big decisions, the key decisions that influence 90% of business outcomes starting from decision first and reengineering the data to the decisions process chain and data governance so as to ensure the right data are available at the right time every time. Investing in artificial intelligence and data driven decision making are now being considered a survival necessity for organizations to stay competitive. While every enterprise aspires to become 100% data driven and every Chief Information Officer (CIO) has a budget, Gartner estimates over 80% of all analytics projects fail to deliver intended value. Most CIOs think a data driven organization is a distant dream especially while they are still struggling to explain the value from analytics. They know a few isolated successes or a one time leveraging of big data for decision making does not make an organization data driven. As of now there is no precise definition for data driven organization or what qualifies an organization to call itself data driven. Given the hype in the market for big data analytics and AI, every CIO has a budget for analytics but very little clarity on where to begin or how to choose and prioritize the analytics projects. Most end up investing in a visualization platform like Tableau or QlikView which in essence is an improved version of their BI dashboard that the organization had invested into not too long ago. The most important stakeholders, the decision makers, are rarely kept in the loop while choosing analytics projects. This book provides a fail safe methodology for assured success in deriving intended value from investments into analytics. It is a practitioners handbook for creating a step by step transformational roadmap prioritizing the big data for the big decisions, the 10% of decisions that influence 90% of business outcomes and delivering material improvements in the quality of decisions as well as measurable value from analytics investments. The acid test for a data driven organization is when all the big decisions, especially top level strategic decisions, are taken based on data and not on the collective gut feeling of the decision makers in the organization. **Vital Signs** David A. Nelson, 2006-05-26. It was the best of elections, it was the worst of elections. The 2004 presidential contest mobilized a record number of voters with 121 million Americans showing up at the polls. But in many eyes the 2004 race also plumbed new depths. It was the most expensive presidential election in history with a price tag of 2.2 billion. It was also marked by unprecedented negativity for example both George W. Bush and John Kerry came under fire for their activities during the Vietnam War which ended three decades ago. In *Vital Signs*, David Dulio and Candice Nelson analyze the Bush and Kerry campaigns and use them as the springboard for a broader exploration of the current U.S. campaign system and its strengths and weaknesses. The book addresses four key issues: Who's in charge of modern campaigns? How effective are the key players? What role does money play? And are campaigns being conducted in an ethical manner? In answering these questions, Dulio and Nelson draw on a wide range of sources including focus groups, interviews with campaign professionals and a unique dataset based on multiple surveys of political consultants, party operatives and the public. The culmination of the seven year Improving Campaign Conduct project, *Vital Signs* should become an integral part of the debate about American campaigns.

Increasing Climate Variability and Change James Salinger, Mannava VK Sivakumar, Raymond P. Motha, 2005-12-06 One of the major challenges facing humankind is to provide an equitable standard of living for this and future generations adequate food water and energy safe shelter and a healthy environment Human induced climate change and increasing climate variability as well as other global environmental issues such as land degradation and loss of biological diversity threaten our ability to meet these basic human needs It is undisputed that the last two decades have been the warmest this century and likely to be the warmest for the last 1000 years sea level is rising rain and snowfall patterns are changing Arctic sea ice is thinning and the frequency and intensity of El Ni o events appear to be increasing In addition the frequency of extreme events is rising and many parts of the world have recently suffered major heat waves floods and droughts leading to significant loss of life and economic costs This requires the global community to give urgent attention to addressing key issues The range of adaptation options for agriculture and forestry is generally increasing because of technological advances thus reducing the vulnerability of these systems to climate change However some regions of the world particularly developing countries have limited access to these technologies

Agriculture and forestry are currently not optimally managed with respect to today's natural climate variability. Decreasing the vulnerability of agriculture and forestry to increasing climatic variability will go a long way towards reducing the long term vulnerability to climate change. This book represents a major step in assessing the science of climate variability and change and their likely impacts on agriculture and forestry with clear adaptation strategies required to reduce their vulnerability.

Learning is most powerful when it is both hard work and fun. This usually means that it is interactive and based on experience, challenging but at the same time possible. This book presents a wide variety of games, activities and techniques that any teacher, tutor or team leader can use to help others learn. Each of the chapters has a short introduction followed by several exercises that are interactive, fun and will reinforce learning in knowledge, skills and attitudes. The tools provided describe not only how to do an exercise but also when, with whom, what will make it work well, what can go wrong and give insights into the impact it might make. The authors are experienced in leading teams, planning and providing education and the tools are tried and tested in real teaching and learning situations. The ideas can be used in and across all disciplines and settings.
