annotated bibliography of over 600 picture books for students in grades 8 through 12 is organized by content area and will enable teachers and library media specialists to select appropriate books for use with students. Picture books provide an extraordinary opportunity to combine illustration and thoroughly researched text to introduce topics in the arts, health, literature, mathematics, science, and social science content areas. They can be used together with companion titles or as springboards to stimulate student interest. No longer just for children, picture books have matured in the last decade to become a format for all ages. The recommended fiction and nonfiction titles in this resource have been carefully selected as appropriate for older readers because of their sophisticated content. Almost all have been published in the late 1980s through 1996. For ease of use by the teacher or young adult librarian, the bibliography is arranged into six content areas: the arts, health, literature, and language, mathematics, science, and nature, and social studies and history. Within each content area, entries are organized alphabetically by author. Each annotation includes the book's content, subject breakdown, artistic style, and medium, suggested companion titles, and ideas for use in the classroom. Annotations are numbered for ease of use and indexed by subject, author, and illustrator. Appendixes include a glossary of terms used to describe picture books, a checklist to guide teachers and students when using picture books, and a list of professional sources that will assist teachers in exploring the picture book format. This easy-to-use guide is an indispensable resource for teachers and librarians seeking to motivate students and stimulate their interest.

The Horn Book Guide to Children's and Young Adult Books, 1992 **Wild Cats of the World** Luke Hunter, 2015-10-22 Wild Cats of the World provides detailed accounts for all 38 species of wild cat accompanied by magnificent artwork and stunning photography. From the rabbit-sized Black-footed Cat of southern Africa to bear-killing Amur tigers of the Russian Far East, the 38 members of the Cat Family include some of the world's most fascinating and magnificent species on earth. Supremely adapted for the kill, all cats are obligate carnivores; they survive only by preying upon other animals, and they have become one of evolution's most successful predatory lineages of mammals. Wild Cats of the World explores the spectacular Cat Family in unprecedented depth. Drawing on thousands of scientific papers and direct observations in the field, each species is profiled at length, covering all aspects of felid behaviour and ecology. The book is profusely illustrated with colour plates, black and white sketches showing important aspects of cat life, and accurate images of every species' skull. Over 400 spectacular photographs are included, many of them showing extremely rare and little-known cats published here for the first time. Each profile includes an up-to-date range map and explains the most current science on how cats are classified and

related to each other including some very recent surprising discoveries Despite their great evolutionary success the challenges facing felids in the modern world are profound Only one the ubiquitous domestic cat does not require dedicated conservation action to ensure survival for the next century The book also explores the current conservation issues facing wild cats the increasingly perilous status of many species and how they can be saved Trickster Tales ,1996 Stories from cultures including ancient Babylonia China India Eastern Europe Morocco Hunter-trader-trapper ,1912 *Something about the Author* Kevin S.
